Shape Of Things A Philosophy Of Design:

Shape of Things Vilém Flusser, 2013-06-01 This book presents for the first time in English an array of essays on design by the seminal media critic and philosopher Vilém Flusser. It puts forward the view that our future depends on design. In a series of insightful essays on such ordinary things as wheels, carpets, pots, umbrellas, and tents, Flusser emphasizes the interrelationships between art and science, theology and technology, and archaeology and architecture. Just as formal creativity has produced both weapons of destruction and great works of art, Flusser believed that the shape of things and the designs behind them represent both a threat and an opportunity for designers of the future. *The Shape of Things* Vilém Flusser, 1999

The Ontology of Design Research Miguel Ángel Herrera Batista, 2020-11-23 This book seeks to establish the meaning of design research, its role in the field, and the characteristics that differentiate research in design from research in other fields. The author introduces a model to explain the relationship between the components of the ontological reality of design: the designed object, the designer, and the user. Addressing design research across disciplines, the author establishes a foundational understanding of research and research paradigms for the design disciplines. This will be crucial for the emerging field of design research to find its own identity and move forward, building its own knowledge base as it finds its positioning between science and art. The book will be of interest to scholars working in design history, design studies, graphic design, industrial design, interior design, architecture, fashion design, and service design.

The Palgrave Handbook of Image Studies Krešimir Purgar, 2021-10-01 This handbook brings together the most current and hotly debated topics in studies about images today. In the first part, the book gives readers an historical overview and basic diachronical explanation of the term image, including the ways it has been used in different periods throughout history. In the second part, the fundamental concepts that have to be mastered should one wish to enter into the emerging field of Image Studies are explained. In the third part, readers will find analysis of the most common subjects and topics pertaining to images. In the fourth part, the book explains how existing disciplines relate to Image Studies and how this new scholarly field may be constructed using both old and new approaches and insights. The fifth chapter is dedicated to contemporary thinkers and is the first time that theses of the most prominent scholars of Image Studies are critically analyzed and presented in one place.

Deleuze and Design Betti Marenko, 2015-06-08 Whether we are dealing with products or scenarios, packaging or experiences, territories or digital platforms, design is never a thing but a process of change, invention, and speculation that always has material, tangible implications that affect behaviours and lives. Drawing on a range of contributors, case studies, and examples, this book examines ways in which we can think about design through Deleuze and how Deleuze's thought can be experimented upon and re-designed to produce new concepts. This book taps into the emerging networks between philosophy as an act of inventing concepts and design as the process of inventing the world.

Designing in Dark Times Virginia Tassinari,Eduardo Staszowski,2020-11-12 The architectural historian and critic Kenneth Frampton never recovered from the force of Hannah Arendt's teaching at The New School in New York The philosopher Richard J Bernstein considers her the most perceptive political theorist and observer of dark times a concept which drawing from Brecht she made her own Building on the revival of interest in Hannah Arendt and on the increasing turn in design towards the expanded field of the social this unique book uses insights and quotations drawn from Arendt's major writings The Human Condition The Origins of Totalitarianism Men in Dark Times to assemble a new kind of lexicon for politics designing and acting today Taking 56 terms from Action Beginnings and Creativity through Mortality

Natality and Play to Superfluity Technology and Violence and inviting designers and scholars of design world wide to contribute Designing in Dark Times An Arendtian Lexicon offers up an extraordinary range of short essays that use moments and quotations from Arendt s thought as the starting points for reflection on how these terms can be conceived for contemporary design and political praxis Neither simply dictionary nor glossary the lexicon brings together designing and political philosophy to begin to create a new language for acting and designing against dark times *Crafting Textiles in the Digital Age* Nithikul Nimkulrat,Faith Kane,Kerry Walton,2016-09-08 In an era of increasingly available digital resources many textile designers and makers find themselves at an interesting juncture between traditional craft processes and newer digital technologies Highly specialized craft design practitioners may now elect to make use of digital processes in their work but often choose not to abandon craft skills fundamental to their practice and aim to balance the complex connection between craft and digital processes The essays collected here consider this transition from the viewpoint of aesthetic opportunity arising in the textile designer s hands on experimentation with material and digital technologies available in the present Craft provides the foundations for thinking within the design and production of textiles and as such may provide some clues in the transition to creative and thoughtful use of current and future digital technologies Within the framework of current challenges relating to sustainable development globalization and economic constraints it is important to interrogate and question how we might go about using established and emerging technologies in textiles in a positive manner

Architecture and Progress Mark Blumberg,Matthew Hall,2025-11-03 This volume proposes an interdependent relationship between progress and obstacles in architecture and the built environment It challenges the positive notion of progress and the conception of progress and obstacle as a dichotomy For shapers of the world finding the solution is often a mark of progress that becomes embedded in culture society and history Progress is ever present Through the exploration of diverse positions in history theory and practice this book explores the potential utility of the progressively problematic rather than the natural tendency towards the progressively solved Chapters draw on historic spaces technological advancement incorporation of the natural world alterative production and the consideration of human experience both sensory and psychological Challenging the positive connotation of progress the writings also explore reversing the notion of obstacle from disruptive anti tool to obstacle of utilitarian method a useful tool pressing approach and overarching value system This will be interesting reading for upper level students and scholars of Architecture Urban Design Philosophy and Sociology
