Resumen

Desde la perspectiva del institucionalismo histórico la obra de Collier y Collier representa un paradigma de estudio comparativo en el campo de la ciencia política y de la propia historia. Los autores estudian el surgimiento de las distintas formas de control y movilización de la clase obrera a través del Estado y de los partidos y buscan explicar las distintas trayectorias y los cambios de la arena política en cada uno de los países seleccionados. El presente artículo busca dar a conocer los rasgos más sobresalientes de esta teoría, la aplicación al caso de Colombia, las imprecisiones históricas y problemas del método.

Palabras clave: Incorporación de la clase obrera, Colombia, Collier and Collier.

Shaping The Political Arena:

Shaping the Political Arena Ruth Berins Collier, David Collier, 2002 This book is a disciplined paired comparison of the eight Latin American countries with the longest history of urban commercial and industrial development Brazil and Chile Mexico and Venezuela Uruguay and Colombia Argentina and Peru The authors show how and why state party responses to the emergence of an organized working class have been crucial in shaping political coalitions party systems patterns of stability or conflict and the broad contours of regimes and their changes The argument is complex yet clear the analysis systematic yet nuanced The focus is on autonomous political variables within particular socioeconomic contexts the treatment of which is lengthy but rewarding Overall a path breaking volume Foreign Affairs Excellent comparative historical analysis of eight countries Argentina Brazil Chile Colombia Mexico Peru Uruguay and Venezuela focuses on emergence of different forms of control and mobilization of the labor movement By concentrating on alternative strategies of the State in shaping the labor movement authors are able to explain different trajectories of national political change in countries with longest history of urban commerce

The Structure of Political Competition in Western Europe Zolt Enyedi, Kevin Deegan-Krause, 2013-09-13 Is European party politics hovering above society Why do voters pick one party over others Is it a question of class Of religion Of attitudes about taxes or immigration or global warming Or is it something else entirely The Structure of Political Competition in Western Europe takes a detailed look at the ways in which Western Europe's party systems are anchored in social and ideological structures The book's first section focuses on the role of social structures particularly education class and religion and analyzes the complex interplay among these factors The second section addresses the ways that the sociological structures such as class and religion interact with voters values The third section examines the way that these structures and values shape the space of political competition among parties The conclusion integrates the findings of the empirical articles putting them into broader comparative perspective discussing whether relatively predictable structures have been overwhelmed by media driven spectacles political personalities and focus on short term economic performance This volume will appeal to scholars and graduate students in Europe and those from North America Asia and other regions who study European politics political parties cleavages and political behaviour This book was published as a special issue of West European Politics

Shaping the Political Arena Critical Junctures, the Labor Movement, and Regime Dynamics in Latin America RB Collier, D Collier, 2002 This book is a disciplined paired comparison of the eight Latin American countries with the longest history of urban commercial and industrial development Brazil and Chile Mexico and Venezuela Uruguay and Colombia Argentina and Peru

Wealth, Power, and Authoritarian Institutions Michaela Collord, 2024-07-16 Through an analysis of the recent political history of Tanzania and Uganda Wealth Power and Authoritarian Institutions offers a novel explanation of why authoritarian parties and legislatures vary in strength and why this variation matters Michaela Collord elaborates a view of authoritarian political institutions as both reflecting and

magnifying elite power dynamics While there are many sources of elite power the book centres on material power It outlines how diverse trajectories of state led capitalist development engender differing patterns of wealth accumulation and elite contestation across regimes These differences in turn influence institutional landscapes Where accumulation is more closely controlled by state and party leaders as was true in Tanzania until economic liberalization in the 1980s rival factions remain subdued Ruling parties can then consolidate relatively strong institutional structures and parliament remains marginal Conversely where a class of private wealth accumulators expands as occurred in Tanzania after the 1980s and in Uganda after the National Resistance Movement took power in 1986 rival factions can more easily form simultaneously eroding party institutions and encouraging greater legislative strength Collord uses this analysis to reassess the significance of a stronger legislature She considers its influence on distributive politics both regressive and progressive She also considers its relation to democratization particularly in a context of broader liberalizing reforms The book ultimately encourages a closer examination of how would be democratic institutions interact with an underlying power distribution shaping in whose interests they operate Oxford Studies in African Politics and International Relations is a series for scholars and students working on African politics and International Relations and related disciplines Volumes concentrate on contemporary developments in African political science political economy and International Relations such as electoral politics democratization decentralization gender and political representation the political impact of natural resources the dynamics and consequences of conflict comparative political thought and the nature of the continent s engagement with the East and West Comparative and mixed methods work is particularly encouraged Case studies are welcomed but should demonstrate the broader theoretical and empirical implications of the study and its wider relevance to contemporary debates The focus of the series is on sub Saharan Africa although proposals that explain how the region engages with North Africa and other parts of the world are of interest General Editors Nic Cheeseman Peace Medie and Ricardo Soares de Oliveira

The CQ Press Guide to Urban Politics and Policy in the United States Christine Kelleher Palus, Richardson Dilworth, 2016-02-11 The CQ Press Guide to Urban Politics and Policy in the United States will bring the CQ Press reference guide approach to topics in urban politics and policy in the United States If the old adage that all politics is local is even partially true then cities are important centers for political activity and for the delivery of public goods and services U S cities are diverse in terms of their political and economic development demographic makeup governance structures and public policies Yet there are some durable patterns across American cities too Despite differences in governance and or geographic size most cities face similar challenges in the management of public finances the administration of public safety and education And all U S cities have a similar legal status within the federal system This reference guide will help students understand how American cities from old to new have developed over time Part I how the

various city governance structures allocate power across city officials and agencies Part II how civic and social forces interact with the organs of city government and organize to win control over these organs and or their policy outputs Part III and what patterns of public goods and services cities produce for their residents Part IV The thematic and narrative structure allows students to dip into a topic in urban politics for deeper historical and comparative context than would be possible in either an A to Z encyclopedia entry or in an urban studies course text FEATURES Approximately 40 chapters organized in major thematic parts in one volume available in both print and electronic formats Front matter includes an Introduction by the Editors along with biographical backgrounds about the Editors and the Contributing Authors Back matter includes a compilation of relevant topical data or tabular presentation of major historical developments population growth size of city budgets etc or historical figures e g mayors a bibliographic essay and a detailed index Sidebars are provided throughout and chapters conclude with References Further Readings and Cross References to related chapters as links in the e version This Guide is a valuable reference on the topics in urban politics and policy in the United States The thematic and narrative structure allows researchers to dip into a topic in urban politics for a deeper historical and comparative context than would be possible in either an A to Z encyclopedia entry or in an urban studies course text **Soundbitten** Sarah

Sobieraj, 2011-06-13 An ethnographic portrait of fifty diverse organizations over the course of two campaign cycles that reveals that while most activist groups equate political success with media success and channel their energies accordingly their efforts fail to generate news coverage and come with deleterious consequences Sobieraj shows that activists impact on public political debates is minimal and carefully unravels the ways in which their all consuming media work and unrelenting public relations approach undermine their ability to communicate with pedestrians comes at the expense of other political activities and perhaps most perniciously damages the groups themselves This portrait of activism in the United States lays bare the challenges faced by outsiders struggling to be heard in a mass media dominated public sphere that proves exclusionary and shows that media centrism is not only ineffective but also damaging to group life From publisher description [Inequality and Political Cleavage in Africa](#) Catherine Boone, 2024-04-25 This pathbreaking work integrates African countries into broader comparative theories of how spatial inequality shapes political competition over the construction of markets states and nations Existing literature on African countries has found economic cleavages institutions and policy choices to be of low salience in national politics This book inverts these arguments Boone trains our analytic focus on the spatial inequalities and territorial institutions that structure national politics in Africa showing that regional cleavages find expression in both electoral competition and policy struggles over redistribution sectoral investment market integration and state design Leveraging comparative politics theory Boone argues that African countries regional and core periphery tensions are similar to those that have shaped national economic integration in other parts of the world Bringing together electoral and economic geography the book offers a new and powerful map of political competition on the African continent

, *Territorial Development in Latin America* Diana Morales, Laura Sariego-Kluge, Tiago Teixeira, 2025-04-23 This book explores one of the most pressing issues of our time development a concern that has persisted from the past century through to today and is increasingly intertwined with challenges related to environmental sustainability and growing inequalities Despite numerous academic and policy interventions development remains an elusive goal Hence this book explains how conceptualisations alternative to economic growth have evolved in Latin American geographical literature and shows their practical applications in various contexts The book argues for a broader more inclusive approach to development territorial development that integrates ecological cultural economic and social concerns By focusing on territorial development seen from a theoretical perspective but also applied through case studies the book underscores the importance of understanding the historical and power dynamics that influence how territories are shaped for whom and by whom The book is divided into two parts The first part provides a theoretical and historical background on development and territory in Latin America presenting critical methodological perspectives for aligning academic research with community and environmental wellbeing The second part consists of case studies that illustrate how different understandings of territory influence development agendas in diverse settings across the region Scholars researchers and post graduate students will find this an invaluable resource as will policymakers and organizations interested in developmental practices
