alternative purchasing arrangements Cassandra Simmons, Mirjam Pot, Kai Leichsenring, 2024-01-16 This scoping review aimed to identify alternative purchasing arrangements apart from fee for service FFS and pay for performance P4P and their associated service delivery models that countries have used to improve the quality of chronic care as well as to assess how these purchasing arrangements have impacted the quality of care A scoping review of academic and grey literature published between 2013 and 2022 was carried out on alternative purchasing arrangements and their impact on the quality of chronic care using causal inference methods The analytical approach consisted of clustering articles around similar purchasing arrangements or programmes summarizing the evidence across the clusters and highlighting the service delivery aspects and institutional design features that potentially impacted the quality of care This research provided information to the WHO and OECD joint publication Purchasing for quality chronic care summary report *Reimagining Pensions* Olivia S. Mitchell, Richard C. Shea, 2016-01-21 The 1964 termination of the Studebaker Corporation's pension plan wiped out or significantly reduced the pensions of thousands of the automaker's employees and retirees In response the US Congress passed the 1974 Employee Retirement Income Security Act ERISA a monumental and revolutionary piece of legislation crafted to address corporate pension underfunding The bill also set new rules regarding defined benefit DB and other retirement plans and it established the Pension Benefit Guaranty Corporation as a government run insurer to serve as a backdrop to US corporate pensions Despite the bill's far ranging scope in the decades since its passage it has become evident that ERISA failed to achieve many of its intended objectives The corporate pension scene today is in turmoil and most private employers have terminated or frozen their traditional DB plans In their place employers are increasingly substituting defined contribution DC retirement saving plans which pose a new set of responsibilities on employees and their firms This volume investigates how and why traditional approaches to pension risk management have failed and we also explore the new mechanisms required to strengthen retirement security for the future Lessons from international experience are also included ranging from Singapore to Switzerland and the Netherlands to Australia **Water Security** Bruce Lankford, Karen Bakker, Mark Zeitoun, Declan Conway, 2013-10-15 The purpose of this book is to present an overview of the latest research policy practitioner academic and international thinking on water security an issue that like water governance a few years ago has developed much policy awareness and momentum with a wide range of stakeholders As a concept it is open to multiple interpretations and the authors here set out the various approaches to the topic from different perspectives Key themes addressed include Water security as a foreign policy issue The interconnected variables of water food and human security Dimensions other than military and international relations concerns around water security Water security theory and methods tools and audits The book is loosely based on a masters level degree plus a short professional course on water security both given at the University of East Anglia delivered by international authorities on their subjects It should serve as an introductory textbook as well as be of value to professionals NGOs and policy makers
