Donald, 2018-10-04 When comparing the laws of different jurisdictions one often sees only the forest or the trees This is particularly problematic in comparative company law where students hope both to understand the overall framework of the law and grasp its practical application This text s structure now in its second edition solves that dilemma Chapters open with discursive analyses of the law in each of Germany the UK and the US Delaware the ABA Model Business Corporation Act and federal securities laws and set out the high level governing framework particularly for the EU and its member states This analysis is succinct and pointed with numerous references to both the law and leading scholarship The whole text is arranged to highlight comparative aspects Diagrams are used where helpful Chapters close with edited judicial decisions from at least two of the jurisdictions discussed which allows fresh exploration of comparison in more detail and pointed questions to guide class discussion *Shareholder Rights Protection Mechanisms for Chinese Financial Holding Companies* Kailiang Ma, 2025-03-11 This book aims to answer the question of how Chinese financial holding companies should structure their shareholder rights protection mechanisms in a global context And this book uses the two part approach to clarify the issue of shareholder rights protection of financial holding companies The first part describes the external protection mechanism financial market regulation and the second part describes the internal protection mechanism internal corporate governance Moreover this book mainly adopts three methodologies including doctrinal analysis comparative analysis Chinese law French law UK law and US law and historical analysis to illustrate the viewpoints And in the light of the comprehensive and comparative analysis this book provides an

insightful perspective to deal with the problem of protecting shareholders rights in Chinese financial holding companies The novelty of this approach lies in its comprehensiveness On the one hand it analyses shareholder rights protection mechanisms including external and internal mechanisms On the other hand it provides a comprehensive overview of the regulation of financial holding companies in all 193 member states of the United Nations At the same time its comparative approach focuses on Chinese law American law English law and French law Such peer comparisons are relatively rare The target audience for this book includes interested laypersons undergraduate and postgraduate students and researchers Both legal and financial markets are the main target markets *Protection of Shareholders' Rights Act of 1980* United States.
