Jones,2019-11-11 In Wild Capital Barbara Jones demonstrates that looking at nature through the lens of the marketplace is a surprisingly effective approach to protecting the environment Showing that policy makers and developers rarely associate wild places with monetary values Jones argues that nature can and should be viewed as a capital asset like any other in order for environmental preservation to be a competitive alternative to development Jones describes how the ecosystem services model a tool that connects human well being with the services nature provides can play a critical role in assigning species and their habitats measurable values She uses five highly recognizable animal species moose manatees sharks wolves and bald eagles as examples to show how highly valued charismatic fauna can serve as symbolic representations of entire ecosystems at risk Through an emphasis on branding incentives and ecotourism Jones advocates for channeling the social and economic power of these and other faces of nature to inspire greater environmental awareness and stewardship Contending that many people don t realize how fiscally pragmatic environmental initiatives can be Jones is optimistic that by recognizing the costs of habitat destruction and diminished biodiversity we will make better choices regarding conservation and development In doing so we can more readily move toward co existence with nature and a sustainable future *Sharks Ahoy!* Pasquale De Marco,2025-07-16 Embark on an exhilarating journey into the captivating world of sharks with Sharks Ahoy This comprehensive guide unveils the wonders of these magnificent marine predators taking you on an immersive exploration of their biology behavior and significance in the marine ecosystem Dive deep into the realm of sharks and uncover their intriguing adaptations from their sleek and streamlined bodies to their exceptional sensory capabilities Discover how sharks navigate the depths of the ocean with grace and precision detecting prey from afar and sensing even the slightest vibrations in the water Unravel the mysteries of shark behavior from their hunting strategies and feeding habits to their complex social interactions Witness the remarkable diversity of sharks from filter feeders that sieve plankton from the water to ambush predators that lie in wait for unsuspecting prey Learn about the fascinating reproductive strategies employed by sharks ranging from egg laying species to live bearing sharks that give birth to fully developed young Explore the intricate relationship between sharks and humans spanning both fascination and fear Delve into the cultural
