Sharks Still Dont Get Cancer The Continuing Story Of Shark Cartilage Therapy:

Sharks Still Don't Get Cancer I. William Lane, Linda Comac, 1996 As events and research continue to unfold shark cartilage may prove to be the first major step toward preventing and conquering cancer Benefits of shark cartilage as healing agent

In the Name of Sharks François Sarano, 2023-10-17 Twenty metres below water the oceanographer François Sarano came face to face with a five and a half metre great white shark Seduced by the gentle elegance of this majestic creature Sarano experienced a profound sense of affinity with her as they swam side by side shoulder to shoulder eye to eye cutting a single figure through the ocean depths It was an experience which made him realize the depth of our ignorance of the lives of sharks leading him to become a passionate advocate for their protection Drawing on the latest scientific research on the biology and ethology of sharks and their exceptional characteristics this book aims to break through the barrier of prejudice and to pay homage to their true nature Representing a last vestige of wilderness their populations are nevertheless under threat like so many species they have been hunted and exploited by humans Sarano argues for a change of mindset in which we lose ourselves in the world of the other so that each living entity human and non human can take their rightful place in the broader global ecosystem Also available as an audiobook

The Empty Ocean Richard Ellis, 2013-03-19 In *The Empty Ocean* acclaimed author and artist Richard Ellis tells the story of our continued plunder of life in the sea and weighs the chances for its recovery Through fascinating portraits of a wide array of creatures he introduces us to the many forms of sea life that humans have fished hunted and collected over the centuries from charismatic whales and dolphins to the lowly menhaden from sea turtles to cod tuna and coral Rich in history anecdote and surprising fact Richard

Ellis's descriptions bring to life the natural history of the various species the threats they face and the losses they have suffered. Killing has occurred on a truly stunning scale with extinction all too often the result leaving a once teeming ocean greatly depleted. But the author also finds instances of hope and resilience of species that have begun to make remarkable comebacks when given the opportunity. Written with passion and grace and illustrated with Richard Ellis's own drawings, *The Empty Ocean* brings to a wide audience a compelling view of the damage we have caused to life in the sea and what we can do about it. The Publishers Weekly, 1996

Bad Medicine Christopher Wanjek, 2003-04-07 Christopher Wanjek uses a take no prisoners approach in debunking the outrageous nonsense being heaped on a gullible public in the name of science and medicine. Wanjek writes with clarity, humor, and humanity and simultaneously informs and entertains. Dr. Michael Shermer, Publisher, *Skeptic* magazine, monthly columnist, *Scientific American* author of *Why People Believe Weird Things*. Prehistoric humans believed cedar ashes and incantations could cure a head injury. Ancient Egyptians believed the heart was the center of thought, the liver produced blood, and the brain cooled the body. The ancient Greek physician Hippocrates was a big fan of bloodletting. Today we are still plagued by countless medical myths and misconceptions. *Bad Medicine* sets the record straight by debunking widely held yet incorrect notions of how the body works, from cold cures to vaccination fears. Clear, accessible, and highly entertaining, *Bad Medicine* dispels such medical convictions as "You only use 10% of your brain," "CAT, PET, and MRI scans all prove that there are no inactive regions of the brain, not even during sleep," "Sitting too close to the TV causes nearsightedness," "Your mother was wrong. Most likely, an already nearsighted child sits close to see better." Eating junk food will make your face break out. Acne is caused by dead skin cells, hormones, and bacteria, not from a pizza with everything on it. If you don't dress warmly, you'll catch a cold. Cold viruses are the true and only cause of colds. Protect yourself and the ones you love from bad medicine; the brain you save may be your own.

Wie man mit Haien schwimmt François Sarano, 2023-08-15 Das packende, reich illustrierte Buch über eine vom Aussterben bedrohte Tierart und die Schönheit des Meeres. Kenntnisreich und begeistert erzählt der Tiefseeforscher und Taucher Sarano von seinen Begegnungen Schulter an Flosse mit Haien von Momenten absoluter Glückseligkeit. Und davon wie er, der im Team von Jacques-Yves Cousteau arbeitete, das Bild vom mörderischen Raubtier revidierte. Haie zählen zu den ältesten und langlebigsten Tieren der Gattung. Der Hai kann bis zu 500 Jahre alt werden. Bis heute bevlkern 536 Arten die Ozeane vom Walhai über den Zitronenhai bis zum Weißen Hai. Sie verfügen über einen außergewöhnlichen Geruchssinn und orientieren sich auf ihren weltumspannenden Reisen am Magnetfeld der Erde. Wäre da nicht der Mensch, der ihre Existenz ernsthaft bedroht. Im Namen der Haie. Ein Plädoyer für die Herrscher der Ozeane. Mit Unterwasserfotos und QR Codes zu Videoclips der Tauchgänge.
