His own experiences as a father and a keen observer of life allowed him to tap into the exuberance of childhood, asserting its significance even amidst the more sober adult realities. These personal dimensions are evident throughout his poetry, enriching the text's appeal. *Nonsense for Old and Young* is highly recommended for readers seeking to relive the joys of childhood or to share the wonder of whimsical literature with future generations. Its cleverness will enchant children while adults will appreciate the subtle commentary on the interplay between maturity and the innocence of youth.

On the Hypersonic Sharp Leading Edge Problem for Bodies Other Than Flat Plates Jay M. Solomon, 1965. The flow near the tip of pointed-nosed bodies in hypersonic flight is considered. In particular, the region where continuum concepts are applicable but where boundary layer theory is no longer valid is studied using the model proposed by Oguchi (ref. 1) for the flat plate problem. Both two-dimensional and axially symmetric bodies are considered. Solutions are obtained in the form of expansions valid near the nose tip. The surface pressure is found to approach a finite value as the tip is approached; numerical results for this limit value are obtained for various wall-to-total temperature ratios and tip semi-vertex angles.
