Comprehensive Neonatal Nursing Care Carole Kenner, Judy Lott, 2013-08-21 Print CourseSmart **Neonatal Nursing: A Global Perspective** Julia Petty, Tracey Jones, Agnes van den Hoogen, Karen Walker, Carole Kenner, 2022-04-22 This textbook is written in line with the Council of International Neonatal Nurses Inc COINN vision for global unity for neonatal nursing The core values and goals of COINN are based on excellence and advocacy for high quality newborn care as well as respecting diversity by integrating cultural norms and values among the care of newborns and their families The book promotes neonatal nursing as a global speciality through evidence research and education of neonatal nurses and offers key examples of the millennium goals and global outcomes as well as variations in outcomes for babies The first part focuses on global perspectives of neonatal nursing from different continents aligning with the World Health Organizations global regions The Americas USA Canada and South America Western Pacific region Australia and New Zealand European region UK and Europe African region South East Asia and Eastern Mediterranean region For each region education and competencies challenges and opportunities research and evidence based practice EBP as well as practice regulations are described The second part elaborates on key topics for neonatal nursing across the globe such as the continuity of neonatal care in the community patient and family centered care in neonatal settings sleep and brain development the fundamental care needs of the neonate and family and global perspectives on hypothermia hypoglycaemia and hypoxia Written in a formal academic but reader style using key literature and evidence this textbook enables an understanding from a large audience with academic levels and experience both staff and students bedside nurses advanced practice nurses midwives and allied professionals In addition first person story based reflective narrative are interspersed throughout the book to capture the perspectives of nurses staff and parents in the form of vignettes This textbook is aimed at neonatal nurses across the world as well as current and aspiring students in this field *Neonatal Nursing* Doreen Crawford, Maryke Morris, 2013-11-11 There are many books on the care of the sick infant and some are excellent Most however are written with medicine in mind

This book is written mainly by experienced neonatal nurses although some chapters have been written by the appropriate specialists. It is intended primarily for nurses who look after sick infants and is not intended to be an exhaustive reference but to address some of the issues and concepts of neonatal care in the 1990s. Nursing models are an important part of neonatal care in the 1990s but this book has not been written within this framework. There are several reasons for this: arguably no current model is ideally suited to neonates and the favouring of one particular model might restrict the book's applicability. Also, as contributors from other disciplines were invited to contribute, we were anxious that these chapters did not stand out as oddities. Additionally, much neonatal care overlaps and was a framework to be used in its entirety for each nursing care chapter. We felt that there could be some repetition; conversely, if a framework was fragmented in some chapters to cover specific areas of care, we were concerned that the overall effect would have been better. We felt that such treatment of nursing models would have been unjustifiable. In this book, the terms infant and baby are used interchangeably and where the term he is used, the term she is equally appropriate.

Neonatal Nursing Care Handbook, Third Edition Carole Kenner, Marina V. Boykova, 2021-10-28. This benchmark handbook for neonatal nurse practitioners describes the most common conditions and procedures in an easy-to-access, streamlined format. This thoroughly revised third edition continues to promote the foundational principles of evidence-based nursing practice worldwide while taking the resources and requirements of different practice settings into account. It delivers updated information on trauma-informed care and offers new sections on parent perspectives about transition to home, neonatal opioid withdrawal syndrome (NOWS) and therapeutic hypothermia.
