Harvey, 2013-12-19 This Handbook presents up to date scholarship on the causes and predictors processes and consequences of divorce and relationship dissolution Featuring contributions from multiple disciplines this Handbook reviews relationship termination including variations depending on legal status race ethnicity and sexual orientation The Handbook focuses on the often neglected processes involved as the relationship unfolds such as infidelity hurt and remarriage It also covers the legal and policy aspects the demographics and the historical aspects of divorce Intended for researchers practitioners counselors clinicians and advanced students in psychology sociology family studies communication and nursing the book serves as a text in courses on divorce marriage and the family and close relationships **Confronting Chronic Neglect** Institute of Medicine, Board on Children, Youth, and Families, Committee on the Training Needs of Health Professionals to Respond to Family Violence, 2002-04-04 As many as 20 to 25 percent of American adults or one in every four people have been victimized by witnesses of or perpetrators

of family violence in their lifetimes Family violence affects more people than cancer yet it s an issue that receives far less attention Surprisingly many assume that health professionals are deliberately turning a blind eye to this traumatic social problem The fact is very little is being done to educate health professionals about family violence Health professionals are often the first to encounter victims of abuse and neglect and therefore they play a critical role in ensuring that victims as well as perpetrators get the help they need Yet despite their critical role studies continue to describe a lack of education for health professionals about how to identify and treat family violence And those that have been trained often say that despite their education they feel ill equipped or lack support from by their employers to deal with a family violence victim sometimes resulting in a failure to screen for abuse during a clinical encounter Equally problematic the few curricula in existence often lack systematic and rigorous evaluation This makes it difficult to say whether or not the existing curricula even works Confronting Chronic Neglect offers recommendations such as creating education and research centers that would help raise awareness of the problem on all levels In addition it recommends ways to involve health care professionals in taking some responsibility for responding to this difficult and devastating issue Perhaps even more importantly Confronting Chronic Neglect encourages society as a whole to share responsibility Health professionals alone cannot solve this complex problem Responding to victims of family violence and ultimately preventing its occurrence is a societal responsibility **Home**
