Redefining German Health Care Michael E. Porter,Clemens Guth,2012-01-25 The German health care system is on a collision course with budget realities Costs are high and rising and quality problems are becoming ever more apparent Decades of reforms have produced little change to these troubling trends Why has Germany failed to solve these cost and quality problems The reason is that Germany has not set value for patients as the overarching goal defined as the patient health outcomes achieved per euro expended This book lays out an action agenda to move Germany to a high value system care must be reorganized around patients and their medical conditions providers must compete around the outcomes they achieve health plans must take an active role in improving subscriber health and payment must shift to models that reward excellent providers Also private insurance must be integrated in the risk pooling system These steps are practical and achievable as numerous examples in the book demonstrate Moving to a value based health care system is the only way for Germany to continue to ensure access to excellent health care for everyone

Value Driven Healthcare and Geriatric Medicine James S. Powers,2018-05-04 Value driven healthcare is the lasting legacy of the Affordable Care Act which had three goals to improve access to healthcare by

increasing healthcare insurance coverage to improve the patient's experience and quality of care and to slow the rate of increase in healthcare costs. Regardless of changes to the financing of healthcare or changes in policy, value-based purchasing for healthcare is to remain a constant feature of the healthcare horizon. Value-based purchasing is a demand-side strategy to reward quality in health care delivery. Value-based purchasing involves cost considerations and includes the actions of employers, the public sector health plans, and individual consumers in making healthcare decisions. Effective health care services and high performing health care providers are incentivized to provide quality outcomes and to control cost. Value-based purchasing drives quality metrics which are publicly reported and serve as important levers for changes in healthcare delivery. Geriatric patients consume a disproportionate share of healthcare resources so CMS directs Medicare and drives geriatric healthcare models. All other insurers generally model CMS Medicare guidelines. Innovative geriatric care models which demonstrate improved outcomes and cost moderation are scaled and lessons learned used to create new healthcare models. The best data for broader value-driven healthcare comes from the geriatric models which currently have the best data available. This book traces the origins of value-based purchasing and current geriatric care models and synthesizes their implications for today's changing health system. It also discusses healthcare accountability and risk sharing. The audience includes geriatric healthcare professionals but also a wider audience interested in broader healthcare models and value-driven healthcare from a policy, economic, and ethical perspective. These include primary care physicians, specialists who work with aging patients, hospital administrators, healthcare educators, healthcare organizations, and all medical professionals working with aging patients and patients affected by healthcare reform.

Clinical Wards Secrets E-Book
Mitesh S. Patel, Derek K. Juang, 2011-12-01 Finally a book that answers the questions you have as you begin your clinical rotations. In the popular format of the Secrets Series, this book will help ease the transition from the classroom to the clinical wards. The popular Q&A history taking, neurological exam, and miscellaneous for even more complete coverage.

Handbook of Primary Care Psychology Leonard J. Haas, 2004-08-19 This handbook is designed to provide authoritative information to the psychologist working in primary care settings and to those seeking to learn about clinical issues in such settings. Scholarly and at the same time practical, this volume offers both the clinician and the researcher a wide-ranging look at the contexts in which psychological services become of paramount importance to the health of the patient. The handbook will cover the prevalent psychological conditions in the primary care setting: depression, anxiety, somatization, eating disorders, and alcoholism; illnesses in which psychological disorders play a major role such as heart disease, diabetes, cancer, pain management, headache, asthma, low back pain, sleep disorders, among others; and issues of concern to psychologists treating children: ADHD, disciplinary problems, etc. Treating women: abuse, infertility, menopause, sexual dysfunction; treating men: workaholic, alcoholism, sexual dysfunction; and treating the older patient: death and dying, cognitive impairment, late life depression. Other important topics include psychological side effects of common medications, resistance to treatment, spiritual

concerns in the treatment of patients cultural differences in healing suicide AIDS prevention of disease and many others Leonard Haas is a noted authority in the area of primary care psychology and has recruited expert contributors for the 41 chapters and two appendices that make up this definitive handbook for a growing and important subspecialty in clinical psychology The work may also be used in graduate courses in health psychology

The Medical School's Mission and the Population's Health Kerr L. White, Julia E. Connelly, 2012-12-06 Medical schools exist as part of a complex educational and health care system with affiliations to universities teaching hospitals outpatient clinics students and communities Those of us who serve as trustees and volunteers on boards and committees of medical schools carry obvious responsibilities for the performance of the institution with regard to those affiliations including those that relate to the community By what criteria and by what standards do we as trustees assess that performance For trustees of medical schools I suggest that the most important criteria are those concerned with the purpose for which the school was originally established and those that relate to the community that supports it and is served by it For a medical school performance criteria should be defined in a statement of purpose the mission of the school This mission statement should provide trustees with direction on such vital matters as the following What does the medical school seek to accomplish Whom does it serve Where is it going What is the relationship to the geographic region or other community that it may seek to serve Such questions are stated more easily than they are answered but they should be asked For trustees who are responsible for the education of students the management of faculty and the stewardship of funds they are a matter of serious concern

Preventive and Community Medicine in Primary Care William H. Barker, 1976

Burden of diarrhoeal diseases Amir Abdoli, Ali Taghipour, D. Md Robiul Karim, Milad Badri, 2023-07-27

Handbook of Psychology, Health Psychology Irving B. Weiner, Arthur M. Nezu, Christine M. Nezu, Pamela A. Geller, 2012-10-16 Psychology is of interest to academics from many fields as well as to the thousands of academic and clinical psychologists and general public who cannot help but be interested in learning more about why humans think and behave as they do This award winning twelve volume reference covers every aspect of the ever fascinating discipline of psychology and represents the most current knowledge in the field This ten year revision now covers discoveries based in neuroscience clinical psychology's new interest in evidence based practice and mindfulness and new findings in social developmental and forensic psychology

Biohealth Raymond Downing, 2011-09-01 The development of modern medicine is on a very steep trajectory upward a rise that began only about a hundred years ago This rise is certainly quantitative but it is accompanied by qualitative changes in the way we understand and deliver healthcare This book begins with a look at three recognized periods of medical development from 1900 until World War II from the war until about 1980 and the period since 1980 While the common response is to celebrate these developments this book suggests that perhaps we should also be wary especially of the qualitative changes Since World War II these medical developments have entered more and more areas of our lives It is precisely this process of medicalization that should be critically examined Since 1980

we have medicalized life itself Drawing from medical sociology the book examines four characteristics of contemporary Western health care health as a system risk as a means of understanding health health as a commodity and individual responsibility for health Critical examination of these four tendencies in contemporary health care forms the core of the argument of this important book about the essence of biohealth and medical practice

This is likewise one of the factors by obtaining the soft documents of this **Outpatient And Primary Care Medicine** by online. You might not require more mature to spend to go to the books foundation as without difficulty as search for them. In some cases, you likewise get not discover the broadcast Outpatient And Primary Care Medicine that you are looking for. It will extremely squander the time.

However below, in imitation of you visit this web page, it will be as a result completely simple to get as with ease as download lead Outpatient And Primary Care Medicine

It will not acknowledge many get older as we run by before. You can do it though play a role something else at house and even in your workplace. for that reason easy! So, are you question? Just exercise just what we come up with the money for under as skillfully as evaluation **Outpatient And Primary Care Medicine** what you like to read!
