Patterns Of Modernity Volume 1 The West:

Modernity in Islamic Tradition Florian Zemmin, 2018-07-23 What does it mean to be modern This study regards the concept of society as foundational to modern self understanding Identifying Arabic conceptualizations of society in the journal al Manar the mouthpiece of Islamic reformism the author shows how modernity was articulated from within an Islamic discursive tradition The fact that the classical term umma was a principal term used to conceptualize modern society suggests the convergence of discursive traditions in modernity rather than a mere diffusion of European concepts

Judaism Within Modernity Michael A. Meyer, 2001 A collection of articles most of them published previously The following deal with antisemitism **Globalization** Roland Robertson, 1992-07-27 A stimulating appraisal of a crucial contemporary theme this comprehensive analysis of globalizat on offers a distinctively cultural perspective on the social theory of the contemporary world This perspective considers the world as a whole going beyond conventional distinctions between the global and the local and between the universal and the particular Its cultural approach emphasizes the political and economic significance of shifting conceptions of and forms of participation in an increasingly compressed world At the same time the book shows why culture has become a globally contested issue why for example competing conceptions of world order have political and economic consequences **Modern Greek Lessons** James D. Faubion, 1995-10-30 Through a blend of lively detail and elegant narration James Faubion immerses us in the cosmopolitan intellectual life of Athens a centerless city of multiplicities and fragmentations a city on the margins of Europe recovering from the repressive rule of a military junta Drawing inspiration from Athens and its cultural elite Faubion explores the meaning of modernity finding it not in the singular character of Western civilization but instead in an increasingly diverse family of practices of reform

Rethinking Modernity Gurinder K. Bhambra, 2023-02-16 The second edition of this influential book addresses how the experiences and claims of non European others have been rendered invisible to the standard narratives and analytical frameworks of sociological understandings of modernity In challenging the dominant Euro centred accounts of the emergence and development of modernity Bhambra puts forward an argument for connected histories in the reconstruction of historical sociology at a global level This updated version of the original published in 2007 adds a new preface which explores key themes that Bhambra has further developed over the intervening years specifically how the rethinking of modernity enables us to reconstruct sociology and a call for a reparatory sociology committed to the repair of the social sciences and the securing of global justice *The Politics of Postmodernity* John R Gibbins, Bo Reimer, 1999-07-06 What happens to politics in the postmodern condition The Politics of Postmodernity is a political tour de force that addresses this key contemporary question Politics in postmodernity is carefully contextualized by relating its specific sphere the polity to those of the economic social technological and cultural The authors confront globalization and the notion of postmodernity as disorganized capitalism They analyze the role of the mass media the changing ways in which politics is used the role of the

state and the progressive potential of politics in postmodern times Closing with a postscript on the future of the discipline of political science this book offers a profound yet highly accessible account **Rethinking Modernity** G.

Bhambra,2007-04-11 Arguing for the idea of connected histories Bhambra presents a fundamental reconstruction of the idea of modernity in contemporary sociology She criticizes the abstraction of European modernity from its colonial context and the way non Western others are disregarded It aims to establish a dialogue in which others can speak and be heard The

Anthropology of Complex Economic Systems Niccolo Leo Caldararo,2013-11-14 Today we live in what Ulrich Beck has aptly characterized as a risk society shaped by intensifying crises outside of our control and seemingly outside of our comprehension The master narrative that was supposed to lead us to secular salvation economics has proved to be a large part of the problem rather than the much anticipated solution In The Anthropology of Complex Economic Systems Niccolo Caldararo offers a much more radical and challenging answer that the fundamental assumptions on which the modern science of economics has been erected are false and that it is through the medium of anthropology particularly the relatively neglected field of economic anthropology that an alternative and sound basis for both the understanding of economic behavior and for the shaping of economic futures can be constructed Caldararo not only challenges the foundational assumptions of conventional economic theory but situates economic behavior something quite different and universal amongst human beings in both a historical and an ecological context Contemporary discussions of sustainability especially in the field of development studies have oddly neglected to look to anthropology Economic anthropology is the repository of a vast store of wisdom both about actual alternative and workable economic systems and about their evolution By drawing on this source Caldararo builds a model of the evolution of human economies which stir up substantial debate shows how economic anthropology provides a tool for the interrogation of economic theory and ties economics to ecology It has been the rupture of this fundamental relationship that lies at the basis of much of our present crisis and the unsustainable economic patterns that humans have created By bringing together in a new configuration economic anthropology ecology and culture history Caldararo not only proposes a new model of human social evolution but equally importantly creates a methodology for speaking to and against our present economic and environmental situation **Jewish History and Jewish Memory** Yosef

Hayim Yerushalmi,1998 Publication of Yosef Yerushalmi's *Zakhor* in 1982 inspired a generation of scholarly inquiry into historical images and myths the construction of the Jewish past and the making and meaning of collective memory Here eminent scholars in their respective fields extend the lines of his seminal study into topics that range from medieval rabbinics homiletics kabbalah and Hasidism to antisemitism Zionism and the making of modern Jewish identity Essays are clustered around four central themes historical consciousness and the construction of memory the relationship between time and history in Jewish thought the demise of traditional forms of collective memory and the writing of Jewish history in modern times **The Ambivalence of the Sacred** Scott R. Appleby,1999-11-23 Terrorists and peacemakers may grow up in the

same community and adhere to the same religious tradition The killing carried out by one and the reconciliation fostered by the other indicate the range of dramatic and contradictory responses to human suffering by religious actors Yet religion s ability to inspire violence is intimately related to its equally impressive power as a force for peace especially in the growing number of conflicts around the world that involve religious claims and religiously inspired combatants This book explains what religious terrorists and religious peacemakers share in common what causes them to take different paths in fighting injustice and how a deeper understanding of religious extremism can and must be integrated more effectively into our thinking about tribal regional and international conflict

The Meanings of Social Life Jeffrey C. Alexander,2003-09-18 In *The Meanings of Social Life* Jeffrey Alexander presents a new approach to how culture works in contemporary societies Exposing our everyday myths and narratives in a series of empirical studies that range from Watergate to the Holocaust he shows how these unseen yet potent cultural structures translate into concrete actions and institutions Only when these deep patterns of meaning are revealed Alexander argues can we understand the stubborn staying power of violence and degradation but also the steady persistence of hope By understanding the darker structures that restrict our imagination we can seek to transform them By recognizing the culture structures that sustain hope we can allow our idealistic imaginations to gain more traction in the world A work that will transform the way that sociologists think about culture and the social world this book confirms Jeffrey Alexander s reputation as one of the major social theorists of our day

Todorova,2018-09-11 *Scaling the Balkans* puts in conversation several fields that have been traditionally treated as discrete Balkan studies Ottoman studies East European studies and Habsburg and Russian studies By looking at the complex interrelationship between countries and regions demonstrating how different perspectives and different methodological approaches inflect interpretations and conclusions it insists on the heuristic value of scales The volume is a collection of published and unpublished essays dealing with issues of modernism backwardness historical legacy balkanism post colonialism and orientalism nationalism identity and alterity society and nation building historical demography and social

Ghiloni, 2019-08-01 Motivated by the intellectual historian Shahab Ahmed's observation that the history of Islamic

paideia has yet to be written Islam as Education explores multiple forms that the search for knowledge and the transmission of wisdom have taken in Islam focusing on the classical period 800 1500 CE Ghiloni draws on a wide range of Islamic primary source material ranging from sacred texts and parables to neglected pedagogical literature and paintings He depicts three Islamic religious practices pilgrimage prophecy and jihad as modes of pedagogy embodied ways of defining defusing and defending sacred knowledge Islam as Education s educational heuristic not only aids in understanding Islam but also provides guidance for intercultural and interreligious relations Ghiloni argues that Islam s grand knowledge tradition serves as a bridge between Muslims and non Muslims and compares it with the educational theory of John Dewey the celebrated American pragmatist Based on this discussion a final chapter develops practical tools for learning from cultural and religious difference
