Lim,Eve Rosenhaft,2021-02-10 This open access book provides a concise introduction to a critical development in memory studies A global memory formation has emerged since the 1990s in which memories of traumatic histories in different parts of the world often articulated in the terms established by Holocaust memory have become entangled reconciled contested conflicted and negotiated across borders As historical actors and events across time and space become connected in new ways new grounds for contest and competition arise claims to the past that appeared de territorialized in the global memory formation become re territorialized deployed in the service of nationalist projects This poses challenges to scholarship but also to practice How can we ensure that shared or comparable memories of past injustice continue to be grounds for solidarity between different memory communities In chapters focusing on Europe East Asia and Africa five scholars respond to these challenges from a range of disciplinary perspectives in the humanities **Bulletin of the Atomic Scientists**

The Arizona Quarterly ,1990 *Soviet Life* ,1982 [African Americans Against the Bomb](#) Vincent J Intondi,2023-05-25 A well researched succinct account of African American involvement in the crusade to contain the threat of atomic warfare Highly recommended CHOICE Well before Rev Dr Martin Luther King Jr spoke out against nuclear weapons African Americans were protesting the Bomb Historians have generally ignored African Americans when studying the anti nuclear movement yet they were some of the first citizens to protest Truman s decision to drop atomic bombs in Hiroshima and Nagasaki in 1945 Now for the first time *African Americans Against the Bomb* tells the compelling story of those black activists who fought for nuclear disarmament by connecting the nuclear issue with the fight for racial equality Intondi shows that from early on blacks in America saw the use of atomic bombs as a racial issue asking why such enormous resources were being spent building nuclear arms instead of being used to improve impoverished communities Black activists fears that race

played a role in the decision to deploy atomic bombs only increased when the US threatened to use nuclear weapons in Korea in the 1950s and Vietnam a decade later For black leftists in Popular Front groups the nuclear issue was connected to colonialism the US obtained uranium from the Belgian controlled Congo and the French tested their nuclear weapons in the Sahara By expanding traditional research in the history of the nuclear disarmament movement to look at black liberals clergy artists musicians and civil rights leaders Intondi reveals the links between the black freedom movement in America and issues of global peace From Langston Hughes through Lorraine Hansberry to President Obama African Americans Against the Bomb offers an eye opening account of the continuous involvement of African Americans who recognized that the rise of nuclear weapons was a threat to the civil rights of all people Praise for African Americans Against the Bomb Intondi s original research will shake the complacent assumption that the civil rights and anti nuclear movements could be segregated Intondi shows that ever since the Bomb first was dropped on people of color in 1945 African Americans have been in the forefront of the campaign to stop the deployment of nuclear weapons Brilliant Tom Hayden Director of the Peace and Justice Resource Center Dr King spoke of the need to fight against racism materialism and militarism and Intondi s stirring narrative effectively shows how nuclear disarmament was part of the broader struggle This is an important read for those who are interested in properly understanding the black freedom movement and U S foreign policy Benjamin Todd Jealous former President and CEO of the NAACP

The Day the Sun Rose in the West Oishi Matashichi, 2011-07-22 On March 1 1954 the U S exploded a hydrogen bomb at Bikini in the South Pacific The fifteen megaton bomb was a thousand times more powerful than the atomic bomb that destroyed Hiroshima and its fallout spread far beyond the official no sail zone the U S had designated Fishing just outside the zone at the time of the blast the Lucky Dragon 5 was showered with radioactive ash Making the difficult voyage back to their home port of Yaizu twenty year old Oishi Matashichi and his shipmates became ill from maladies they could not comprehend They were all hospitalized with radiation sickness and one man died within a few months The Lucky Dragon 5 became the focus of a major international incident but many years passed before the truth behind U S nuclear testing in the Pacific emerged Late in his life overcoming social and political pressures to remain silent Oishi began to speak about his experience and what he had since learned about Bikini His primary audience was schoolchildren his primary forum the museum in Tokyo built around the salvaged hull of the Lucky Dragon 5 Oishi s advocacy has helped keep the Lucky Dragon 5 incident in Japan s national consciousness Oishi relates the horrors he and the others underwent following Bikini the months in hospital the death of their crew mate the accusations by the U S and even some Japanese that the Lucky Dragon 5 had been spying for the Soviets the long campaign to win government funding for medical treatment the enduring stigma of exposure to radiation The Day the Sun Rose in the West stands as a powerful statement about the Cold War and the U S Japan relationship as it impacted the lives of a handful of fishermen and ultimately all of us who live in the post nuclear age

Remembering Asia's World War Two Mark R. Frost, Daniel Schumacher, Edward

Vickers,2019-03-27 Over the past four decades East and Southeast Asia have seen a proliferation of heritage sites and remembrance practices which commemorate the region's bloody conflicts of the period 1931-45. *Remembering Asia's World War Two* examines the origins, dynamics and repercussions of this regional war memory boom. The book analyzes the politics of war commemoration in contemporary East and Southeast Asia. Featuring contributions from leading international scholars, the chapters span China, Japan, Malaysia, Hong Kong and Singapore, covering topics such as the commemoration of the Japanese military's comfort women system, forms of dark tourism or commemorative pilgrimages (e.g. veterans' tours to wartime battlefields) and the establishment and evolution of various war-related heritage sites and museums. Case studies reveal the distinctive trajectories of new and newly discovered forms of remembrance within and across national boundaries. They highlight the growing influence of non-state actors over representations of conflict and occupation, as well as the increasingly interconnected and transnational character of memory making. Taken together, the studies collected here demonstrate that across much of Asia, the public commemoration of the wars of 1931-45 has begun to shift from portraying them as a series of national conflicts with distinctive local meanings to commemorating the conflict as a common pan-Asian or even global experience. Focusing on non-textual vehicles for public commemoration and considering both the local and international dimensions of war commemoration, *Remembering Asia's World War Two* will be a crucial reference for students and scholars of History, Memory Studies and Heritage Studies, as well as all those interested in the history, politics and culture of contemporary Asia.

Humanitarian Internationalism Under Empire Michiko Suzuki,2024-08-20 This book examines the history of the Japanese Red Cross Society (JRCS) and through it offers a new account of the humanitarian movement in modern Japan. Michiko Suzuki argues that contrary to its typical portrayal, the JRCS was not wholly subordinate to the government and the Imperial Family, nor was it derivative of Western values and institutional models. Instead, the JRCS operated within a transnational discourse, both contributing to and borrowing from peacetime and wartime international humanitarianism. Grounded in extensive research in the JRCS archives and archives outside Japan, this book explores the melding of Western and Japanese humanitarian traditions and organizational forms. Suzuki examines the role of grassroots efforts in the steady growth of the JRCS, showing how the society became Japan's largest international organization by the First World War, as well as its pioneering role in Red Cross disaster relief. She traces the inclusion of non-Western national societies in the International Red Cross and Red Crescent Movement and the evolution of the JRCS from a national into a transnational organization with branches in Japan's overseas empire as well as in the Asia-Pacific and the Americas. A comprehensive chronicle of the JRCS, *Humanitarian Internationalism Under Empire* provides a fresh vantage point on major historical questions relating to Japanese modernization and internationalism before the Second World War.

Pathways to the Present Mansel G. Blackford,2018-03-31 Ranging from the Hawaiian Archipelago to the Aleutian Islands, from Silicon Valley to Guam, *Pathways to the Present* is a thoroughly researched and concisely argued account of economic and

environmental change in the postwar American Pacific Following a brief survey of the history of the Pacific the author takes the Hawaiian Islands as the center of American activities in the region and looks at interactions among native Hawaiian developmental military and environmental issues in the archipelago after World War II He then turns to land and water use problems that have intersected with more nebulous quality of life concerns to generate policy controversies in the Seattle region and the San Francisco Bay area especially Silicon Valley Economic expansion and environmentalism in Alaska are examined through the lens of changes occurring along the Aleutians From there the study considers Hiroshima after its destruction by the atomic bomb in 1945 looking at residents desire to combine urban planning concepts The author investigates the effort to remake Hiroshima as a high tech city in the 1990s an attempt inspired by the perceived success of Silicon Valley and postwar planning on Okinawa where American influences were particularly strong The final chapter takes into account issues raised on Guam regarding the growth of tourism and the use of the island for military purposes and links these to developments in the Philippines to the west and American Samoa to the south
