Animated Encounters Daisy Yan Du, 2019-02-28 China s role in the history of world animation has been trivialized or largely forgotten In *Animated Encounters* Daisy Yan Du addresses this omission in her study of Chinese animation and its engagement with international forces during its formative period the 1940s 1970s She introduces readers to transnational movements in early Chinese animation tracing the involvement of Japanese Soviet American Taiwanese and China s ethnic

minorities at socio historical or representational levels in animated filmmaking in China Du argues that Chinese animation was international almost from its inception and that such border crossing exchanges helped make it Chinese and subsequently transform the history of world animation She highlights animated encounters and entanglements to provide an alternative to current studies of the subject characterized by a preoccupation with essentialist ideas of Chineseness and further questions the long held belief that the forty year period in question was a time of cultural isolationism for China due to constant wars and revolutions China's socialist era known for the pervasiveness of its political propaganda and suppression of the arts unexpectedly witnessed a golden age of animation Socialist collectivism reinforced by totalitarian politics and centralized state control allowed Chinese animation to prosper and flourish artistically In addition the double marginality of animation a minor art form for children coupled with its disarming qualities and intrinsic malleability and mobility granted animators and producers the double power to play with politics and transgress ideological and geographical borders while surviving censorship both at home and abroad A captivating and enlightening history Animated Encounters will attract scholars and students of world film and animation studies children's culture and modern Chinese history

Becoming Japanese Joy Hendry, 1989-01-01 The children are more than mere pictures. They tell us the truths about Japan. So wrote a visitor to Japan at the turn of the century and this view underlies the title of this book. The first few years of a child's life are vitally important for preparing it to be a member of the society to which it belongs. Japanese methods of childcare are consequently directed towards taking advantage of the receptivity of the early years. They are also different in many ways from Western methods and much of the colorful detail in this book will be of great interest to mothers everywhere from family beds and toilet training to the elaborate religious ceremonies of childhood. Joy Hendry looks at customs and traditions, at rewards and punishments and at the day to day life of children at home, at school and in the wider world. Joy Hendry's research involved working with Japanese mothers and other care takers and with kindergartens and day nurseries. She has drawn on the work of sociologists, psychologists and educationalists in English and Japanese but the theoretical framework for the study is drawn from social anthropology.
