

Power structure

Power structure is a term that describes the hierarchical distribution of authority and influence within an organization. It encompasses the formal power that comes with job titles and positions, as well as the informal power that arises from personal relationships, expertise, and access to critical resources. Power structure defines who makes decisions, who has a say in those decisions, and how conflicts are resolved.

Structure and Change in Indian Society Milton B. Singer, Bernard S. Cohn, Recent theoretical and methodological innovations in the anthropological analysis of South Asian societies have introduced distinctive modifications in the study of Indian social structure and social change This book reporting on twenty empirical studies of Indian society conducted by outstanding scholars reflects these trends not only with reference to Indian society itself but also in terms of the relevance of such trends to an understanding of social change more generally The contributors demonstrate the adaptive changes experienced by the studied groups in particular villages towns cities and regions The authors view the basic social units of joint family caste and village not as structural isolates but as intimately connected with one another and with other social units through social and cultural networks of various kinds that incorporate the social units into the complex structure of Indian civilization Within this broadened conception of social structure these studies trace the changing relations of politics economics law and language to the caste system Showing that the caste system is dynamic with upward and downward mobility characterizing it from pre British times to the present the studies suggest that the modernizing forces which entered the system since independence parliamentary democracy universal suffrage land reforms modern education urbanization and industrial technology provided new opportunities and paths to upward mobility but did not radically alter the system The chapters in this book show that the study of Indian society reveals novel forms of social structure change They introduce methods and theories that may well encourage social scientists to extend the study of change in Indian society to the study of change in other areas Milton Singer 1912 1994 was Paul Klapper Professor of Social Sciences and professor of anthropology at the University of Chicago He was a fellow of the Academy of Arts and Sciences He was also chosen as a distinguished lecturer by the American Anthropological Association and was the recipient of the Distinguished Scholar Award of the Association for Asian Studies Bernard S Cohn 1918 2003 was Professor Emeritus of Anthropology at the University of Chicago He was widely known for his work on India during the British colonial period and wrote many books on the subject of India including *India The Social Anthropology of a Civilization* 1971 *An Anthropologist among the Historians and Other Essays* 1987 and *Colonialism and its Forms of Knowledge* 1996 **Power and Society** Harold D. Lasswell, 2017-07-05 In *Power and Society* Harold D Lasswell collaborates with a brilliant young philosopher Abraham Kaplan to formulate basic theoretical concepts and hypotheses of political science providing a framework for further inquiry into the political process

This is a classic book of political theory written by two of the most influential social scientists of the twentieth century. The authors find their subject matter in interpersonal relations not abstract institutions or organizations and their analysis of power is related to human values. They argue that revolution is a part of the political process and ideology has a role in political affairs. The importance of class both as social fact and social symbol is reflected in their detailed analysis and emphasis on merit rather than rank, skill rather than status as keystones of democratic rule. The authors note that power is only one of the values and instruments manifested in interpersonal relations; it cannot be understood in abstraction from other values. Lasswell and Kaplan call for the replacement of power politics both in theory and in practice by a conception in which attention is focused on the human consequences of power as the major concern of both political thought and political action. The basic discussions of core concepts in political science make *Power and Society* of continuing importance to scholars, government officials and politicians. [Power & Society](#) IIs 50 Harold D. Lasswell, 2013-07-04 First published in 1998. The present book is a by-product of the Research Project on Wartime Communication which was organized within the framework of the Library of Congress shortly before World War II. As a guide to research and analysis it was necessary to review the then current state of knowledge of political communication particularly of war communication. The manuscript was finished by the end of 1945 and then within the next five years there have been many changes both in the state of research in the field and in thinking about these problems. But the task of developing a framework for inquiry contemporaneous with the state of research is an unending one.

Religion, Power, and Society in Suriname and Guyana R. Kirtie Algie, 2022-05-30 This book surveys the development of the religious landscape in Suriname and Guyana focusing on the interaction between Hindus, Muslims and Christians and responses to Christian dominance. It reflects on how and why these religiously diverse Caribbean societies are characterized by relative harmony whereas interreligious relationships in other parts of the world have been marked by extreme conflict and violence. The chapters explore ideological and institutional dimensions including the role of government policies, religious demography, religious leadership and private religious institutions. The author takes a critical stance towards a negative approach to power struggles and offers a perspective that does not necessarily consider religious diversity a hindrance for religious harmony. Making valuable data accessible to scholars in the English language, this volume provides a framework for the study of interreligious relations and for understanding the religious worlds of the Caribbean. Miller, Miller Robert A., 2018-12-12 This book is a stimulating contribution to the new literature It is not intended as a comprehensive review of the full range of topics nor is it solely a summary of research findings It consists in essence of an open ended debate on a limited series of related issues in which the reader is invited to participate Who might profit by an examination of these topics What can a reader expect to learn through perusing this particular account and even vicariously joining in the discussion of the social structure of power the role of bureaucracy in American life today and what is meant by a democratic society In addition the book offers the perceptive reader an illuminating example of a much neglected topic in that segment of the new literature which stems from the social sciences namely the role of the observer in relationship to what is observed The editors should be commended for bringing together not a bland series of polite statements but a stimulating discussion which raises more questions than it answers More important it raises questions that have to be posed in any significant appraisal of America today John Useem Head Sociology and Anthropology Michigan State University *The Power Structure* Arnold Marshall Rose, 1967 **Class, Power and the State in Capitalist Society** P. The Dynamics of Modern Society William Goode, 2017-09-05 Social research efforts are often more concerned with basic social processes or patterns than with the dynamic relationship between social processes and social institutions In this classic collection contributors posit generalizations drawn from contemporary sociology Their analyses go beyond elementary principles they interpret them qualify them or state them more precisely Each of the contributors focuses on the modern American social structure and they are either explicitly comparative or have made observations that clearly are meant to apply to many countries This volume both embodies and draws attention to newer developments in sociology Like most steps forward in an advancing science this orientation does not reject the older knowledge accumulated during earlier generations but incorporates and expands upon it The differences are in emphasis rather than any denial of the main body of accepted theory On the other hand the collection may be said to represent a response to the many criticisms by humanists and sociologists alike of the mainstream of contemporary sociology as it existed at the time of original publication in the late 1960s Inquiries into social changes like sociological studies of historical phenomena may be viewed as modes of a comparative sociology They permit us to test more fully sociological generalizations The emphasis in this volume on historical and comparative studies and on social change parallels the growing attention of sociology to these problems During the 1960s social science turned from a nearly exclusive preoccupation with middle class populations to a concern with social relations in other societies past as well as present In addition to enriching our knowledge this broader view has increased both the precision and generalizing power of sociological principles

Power, Place, and State-Society Relations in Korea Jongwoo

Han,2013-11-26 No book has addressed the simultaneous phenomena of Korea's rapid economic development and its vibrant democratization in a single coherent paradigm. The late developmentalist approach emphasizes the strong role of Korea's state and bureaucratic efficiency but does not explain how political development was concurrent with the economic miracles in the Han River modernization and dependence theories also fail to explain the aspect of simultaneity in this phenomenon. What these three theories commonly miss is the unique relationship between state and society in Korea's long history of political culture. In this book Jongwoo Han takes a holistic approach to understanding these phenomena by examining the state's role in the unprecedented economic development and society's capabilities to resist the state's centralized power. Han re-articulates state-society relations through Onuf's social constructivist approach based on three rules of a political community: hegemony, hierarchy, and heteronomy. This book expands upon this effort to re-construct the state and society relations in two ways. First, it produces case studies of the capital city of Hanyang, Joseon Dynasty from 1392 to 1910, Gyeongseong, Japanese colonial control from 1910 to 1945, and Seoul 1945-current. The capital city is analyzed as a container for the major ideologies and ways of thinking that have shaped three important political eras. Second, it adopts two indigenous thoughts, Neo-Confucianism and geomancy, as sources of the main political and cultural ideologies that shape Korea's state and society relations. These sources have never been treated as units of political analysis. This book finds that both Neo-Confucianism and geomancy over two periods of Hanyang and Gyeongseong are two main contributing factors of the emergence of the developmental state and vibrant democracy in Korea in the Seoul era.

Subversion, Power and Hierarchy in Organisations and Society Jo Trevenna,2024-10-31 *Subversion Power and Hierarchy in Organisations and Society* Carnavalesque Leadership explores a leadership strategy that dates back centuries but has become so normalised that it can be invisible as a strategy. Extrapolating Mikhail Bakhtin's ideas on carnival and its potential for communal freedom and subversive challenge to existing hierarchies, this book identifies components of the carnivalesque, considers why and how they have impact, and then maps the application of Carnavalesque Leadership to a series of case studies. Exploratory in nature, these diverse case studies focus on the historic evolution of carnivals in Trinidad and Notting Hill, the safety valve mechanisms ubiquitous in the education sector, the standardisation of control and release within the corporate sector, and the dynamic tension between protest challenge and fun in Pride events. Readers will benefit from an increased awareness of a strategised Carnavalesque Leadership model and a greater understanding of the potential, not only for the safety valve release of pressure in society and in organisations but also for longer term change through exposure to alternatives to the official norm.
