Leppla,Deepankar Choudhury,2016-09-19 The book deals with the geotechnical analysis and design of foundation systems for high rise buildings and other complex structures with a distinctive soil structure interaction The basics of the analysis of stability and serviceability necessary soil investigations important technical regulations and quality and safety assurance are explained and possibilities for optimised foundation systems are given Additionally special aspects of foundation systems such as geothermal activated foundation systems and the reuse of existing foundations are described and illustrated by examples from engineering practice **Concrete Buildings in Seismic Regions** George G. Penelis,Gregory G.

Penelis,2014-03-24 Bearing in mind that reinforced concrete is a key component in a majority of built environment structures Concrete Buildings in Seismic Regions combines the scientific knowledge of earthquake engineering with a focus on the design of reinforced concrete buildings in seismic regions This book addresses practical design issues providing an integrated comprehensible and clear presentation that is suitable for design practice It combines current approaches to seismic analysis and design with a particular focus on reinforced concrete structures and includes an overview of structural dynamics analysis and design of new R C buildings in seismic regions post earthquake damage evaluation pre earthquake assessment of buildings and retrofitting procedures seismic risk management of R C buildings within urban nuclei extended numerical example applications Concrete Buildings in Seismic Regions determines guidelines for the proper structural system for many types of buildings explores recent developments and covers the last two decades of analysis design and earthquake engineering Divided into three parts the book specifically addresses seismic demand issues and the basic issues of structural dynamics considers the capacity of structural systems to withstand seismic effects in terms of strength and deformation and highlights existing R C buildings under seismic action All of the book material has been adjusted to fit a modern seismic code and offers in depth knowledge of the background upon which the code rules are based It complies with the last edition of European Codes of Practice for R C buildings in seismic regions and includes references to the American Standards in effect for seismic design 地震工学の基礎と応用 (Japan),1900 Foundation Engineering Handbook

Handbook Hsai-Yang Fang,2013-06-29 More than ten years have passed since the first edition was published During that period there have been a substantial number of changes in geotechnical engineering especially in the applications of foundation engineering As the world population increases more land is needed and many soil deposits previously deemed unsuitable for residential housing or other construction projects are now being used Such areas include problematic soil regions mining subsidence areas and sanitary landfills To overcome the problems associated with these natural or man made

soil deposits new and improved methods of analysis design and implementation are needed in foundation construction As society develops and living standards rise tall buildings transportation facilities and industrial complexes are increasingly being built Because of the heavy design loads and the complicated environments the traditional design concepts construction materials methods and equipment also need improvement Further recent energy and material shortages have caused additional burdens on the engineering profession and brought about the need to seek alternative or cost saving methods for foundation design and construction

Developments in Geotechnical Engineering: from Harvard to New Delhi 1936-1994 A.S. Balasubramaniam,D.T. Bergado,S.W. Hong,P. Nutalaya,N. Phien-Wej,2021-06-30 This book reviews the developments that have taken place in the field of geotechnical engineering since the first international conference on Soil Mechanics and Foundation Engineering was held in Harvard University in 1936 until the January 1994 conference in New Delhi India
