Return to Philosophy Cyril Edwin Mitchinson Joad,1942 [Return to Philosophy](#) Cyril Edwin Mitchinson Joad,1945 *Return to Philosophy* Thomas Molnar,2018-04-17 From its earliest beginnings and through much of its history the philosophical enterprise has rooted its intellectual procedures in common sense Ordinary discourse is what the pre Socratic thinkers did at the dawn of speculation The same approach was characteristic of the medieval mystics Pascal in the seventeenth century and Gaston Bachelard in the twentieth century However with the ascendancy of the physical sciences mathematics and depth psychology as influences in contemporary thought philosophical language and forms of expression became increasingly distant from ordinary language This created estrangement and confusion in the learner s mind In *Return to Philosophy* Thomas Molnar diagnoses the verbal derailment of philosophy and shows how it might be reconnected to the realities of human life While granting that philosophy must use a somewhat specialized language Molnar attacks jargon laden thought by tracing certain root assumptions that go deeper than the issue of language itself He locates these assumptions in the work of philosophers who espousing modernity no longer trust the reality of the real and are convinced that the world and our perception of it are elusive offering no foundation except in the human mind which however is also the result of a social contract a temporary consensus or transient network of meanings readily discardable According to changing ideologies and social structures we use signs linguistic psychological hermeneutical structuralist existentialist not to express reality but to establish communication with others Philosophy then shifts from the task of knowing reality to the task of communicating here and now *Return to Philosophy* is a unique endeavor Molnar s book unmasks the modern derailment and shows that many leading philosophers do not so much philosophize but merely elaborate verbal technical instruments in what may be little more than trivial language games This volume will be of interest to philosophers cultural historians and sociologists

[Return to Philosophy](#) Cyril Edwin Mitchinson Joad,1937 **Return to Philosophy** Cyril Edwin Mitchinson Joad,1935 **Infinite Thought** Alain Badiou,2014 [Philosophy's Higher Education](#) Nigel Tubbs,2006-01-26 At about the age of 13 I began to realise that my formal education was separating itself off from my

philosophical education Of course at the time I did not know it in this way I experienced it as a split between what I was being taught and my experience of what I was being taught It was I now know the philosophical experience of formal schooling It was not until beginning the study of sociology at 16 that I came across the idea of dualisms pairs of opposites that always appeared together but were never reconciled In sociology it was the dualism of the individual and society The question most asked in our classes was always regarding which aspect of the dualism dominated the other The answer we always leaned towards was that both were mutually affected by the other The answer seemed to lie somewhere in the middle It was only at university first as an undergraduate and then as a postgraduate that I came across the idea of the dialectic Slowly I began to recognise that the dualisms which plagued social theory I and we self and other good and evil modernity and post modernity autonomy and heteronomy freedom and nature truth and relativism and so many more were not only dialectical in being thought about but also that the thought of them being dialectical had an even stranger quality It was the same experience as being at school

Return to Philosophy C. E. M. Joad, 2019-01-13 Many people today adopt an instinctively derogatory attitude to reason It is not they say a free activity of the mind reaching conclusions under no compulsion save that of the evidence it is the tool of instinct and the handmaid of desire They are sceptical also in their attitude towards values Beauty they hold is not an intrinsic quality of things it is merely the compliment which we bestow upon the objects which have been fortunate enough to give us pleasure One man's pleasure is as good as another's and all the art criticism in the world is only an elaborate series of variations upon the theme This is what I happen to like As with art so with morals To act rightly is merely to act in a way of which other people approve It is the object of the following pages to criticize this subjectivist attitude and to expose its inadequacy in art in morals and in thought The book is therefore in effect a restatement in modern terms of certain traditional beliefs that reason if properly employed can give us truth that beauty is a real value which exists and that we can train our minds and form our tastes to discern it that some things are really right in a sense in which others are really wrong and that the endeavour to know truth and to discern value is the noblest pursuit of the adult civilized intelligence The best name for this pursuit is philosophy This conclusion is reached by a number of different routes each of which starting from some distinctive characteristic of modern life or thought an aeroplane shed a quasi religious cult or an essay of Aldous Huxley converges upon the same position The defence of reason the affirmation of values and the plea for philosophy thus constitute the underlying theme which links together the various essays which follow

Foreword **The Church Quarterly Review**, 1916 **The Return of Religion in France** E. McCaffrey, 2009-05-07 The author examines how social change and philosophical crisis in the 1980s created the conditions for the return of religion to contemporary French intellectual life It highlights a critical conjuncture in recent French history when religion was revitalized in French secularism as an expression of individual identity

The Presbyterian and Reformed Review Benjamin Breckinridge Warfield, 1894 Includes section Reviews of recent theological literature *Return to Reason* Stephen Edelston

Toulmin,2009-06-30 Stephen Toulmin argues that the potential for reason to improve our lives has been hampered by a serious imbalance in our pursuit of knowledge The centuries old dominance of rationality has diminished the value of reasonableness Toulmin issues a powerful call to redress the balance between rationality and reasonableness

Modernity, Civilization and the Return to History Anthony F. Shaker,2017-01-03 The modern concept and study of civilization have their roots not in western Europe but in the spirit of scientific investigation associated with a self conscious Islamicate civilization What we call modernity cannot be fathomed without this historical connection We owe every major branch of science known today to the broad tradition of systematic inquiry that belongs to a region of being as Heidegger would say whose theoretical practical and institutional dimensions the philosophy of that civilization played an unprecedented role in creating This book focuses primarily on the philosophical underpinnings of questions relating to civilization personhood and identity Contemporary society and thinking in western Europe introduced new elements to these questions that have altered how collective and personal identities are conceived and experienced In the age of globalization expressions of identity individual social and cultural survive precariously outside their former boundaries just when humanity faces perhaps its greatest challenges environmental degradation policy inertia interstate bellicosity and a growing culture of tribalism Yet the world has been globalized for at least a millennium a fact dimmed by the threadbare but still widespread belief that modernity is a product of something called the West One is thus justified in asking as many people do today if humanity has not lost its initiative This is more a philosophical than an empirical question There can be no initiative without the human agency that flows from identity and personhood i e the way we the acting subject live and deliberate about our affairs Given the heavy scrutiny under which the modern concept of identity has come Dr Shaker has dug deeper bringing to bear a wealth of original sources from both German thought and ikmah Islamicate philosophy the latter based on material previously unavailable to scholars Posing the age old question of identity anew in the light of these two traditions whose special historical roles are assured may help clear the confusion surrounding modernity and hopefully our place in human civilization Proximity to Scholasticism and therefore Islamicate philosophy lent German thought up to Heidegger a unique ability to dialogue with other thought traditions Two fecund elements common to Heidegger Q naw and Mull adr are of special importance Logos utterance speech as the structural embodiment at once of the primary meaning essential reality of a thing and of divine manifestation and the idea of unity in difference which adr finally formulated as the substantial movement of existence But behind this complexity is the abiding question of who Man is which cannot be answered by theory alone Heidegger who occupies a good portion of this study questioned the modern ontology at a time of social collapse and deep spiritual crisis not unlike ours Yet that period also saw the greatest breakthroughs in modern physics and social science The concluding chapters take up more specifically identity renewal in Western literature and Muslim reformism The renewal theme reflects a point of convergence between the Eurocentric worldview in which modernism has its secular aesthetics

roots and a current originating in Ibn Taymiyyah's reductionist epistemology and skeptical fundamentalism. It expresses a hopeless longing for origin in a historically pristine golden age, an obvious deformation of philosophy's millennial concern with the commanding creative oneness of the Being of beings.

Deleuze and the Three Syntheses of Time Keith W. Faulkner, 2006. In the most important theory of time since Heidegger, Deleuze challenges Kant's unity of apperception as well as the phenomenological account of time. This book, using the principles of structuralism, exposes how Freud's unconscious mechanisms synthesize time. It also gives a vibrant and original account of Deleuze's theory of the pure Event using detailed examples from Hamlet and Oedipus as well as Nietzsche's doctrine of the eternal return. This book is essential reading for students and scholars who wish to understand Deleuze's dissolved subject as well as our modern sense of fragmented time.

Philosophy's Moods: The Affective Grounds of Thinking Hagi Kenaan, Irit Ferber, 2011-08-13. *Philosophy's Moods* is a collection of original essays interrogating the inseparable bond between mood and philosophical thinking. What is the relationship between mood and thinking in philosophy? In what sense are we always already philosophizing from within a mood? What kinds of mood are central for shaping the space of philosophy? What is the philosophical imprint of Aristotle's wonder, Kant's melancholy, Kierkegaard's anxiety, or Nietzsche's shamelessness? *Philosophy's Moods* invites its readers to explore the above questions through diverse methodological perspectives. The collection includes twenty-one contributions by internationally renowned scholars as well as younger and emerging voices. In pondering the place of the subjective and personal roots that thinking is typically called to overcome, the book challenges and articulates an alternative to a predominant tendency in philosophy to view the theoretical content and the affective side of thought as opposed to one another.

The Significance of the Lvov-Warsaw School in the European Culture Anna Brożek, Friedrich Stadler, Jan Woleński, 2017-07-24. This volume is a result of the international symposium *The Tradition of the Lvov-Warsaw School in European Culture* which took place in Warsaw, Poland, September 2015. It collects almost all the papers presented at the symposium as well as some additional ones. The contributors include scholars from Austria, the Netherlands, Ireland, and Poland. The papers are devoted to the history and reception of the Lvov-Warsaw School, a Polish branch of analytic philosophy. They present the School's achievements as well as its connections to other analytic groups. The contributors also show how the tradition of the School is developed contemporarily. The title will appeal to historians of analytic philosophy as well as historians of philosophy in Central Europe.
