

Evaluating and Prioritizing Risks with a Risk Matrix

Many people use a risk matrix to assess risk before and after corrective actions. The following is a SAMPLE risk matrix.

			Likelihood				
			Rare The event may occur in exceptional circumstances.	Unlikely The event could occur at some time.	Moderate The event will probably occur at some time.	Likely The event will occur in most circumstances.	Certain The event is expected to occur in all circumstances.
			Less than once in 2 years	At least once per year	At least once in 6 months	At least once per month	At least once per week
Level			1	2	3	4	5
Consequence	Negligible No injuries; low financial loss	0	0	0	0	0	0

Risk Assessment In The Food Chain:

Risk Assessment in the Food Chain of Children Peter J. Aggett, Harry A. Kuiper, 2000 his volume presents objective guidelines for assessing the health risks of childhood exposure to food contaminants Leading experts discuss the complex processes of characterizing hazards in the food chain assessing exposures and establishing acceptable intakes Chapters examine the development of metabolic mechanisms for xenobiotics the role of the gastrointestinal tract in handling such substances the susceptibility of children to hepatic toxicity and the neurologic consequences of perinatal exposure to PCBs and dioxins Other topics covered include hazards in breast milk management of pesticide risks in baby food manufacturing bovine spongiform encephalopathy and public health and assessment of novel food hazards *Quality and risk management in agri-food chains* Brigitte Petersen, Manfred Nüssel, Martin Hamer, 2023-09-04 An apple a day keeps the doctor away While it may be true that a balanced diet is a prerequisite for good health how good is what we eat and drink every day And is it actually possible to fulfil every customer desire with the vast array of foodstuffs on offer BSE dioxin in eggs EHEC sprouts in the light of repeated food safety crises the issue of quality assurance as well as customer oriented quality management has become of prime importance for the agri food industry This sector features highly complex value added chains which means that quality deficiencies or contaminations can quickly lead to far reaching problems with serious consequences for consumers and businesses What can be done to reduce this vulnerability to crises The only solution is to establish systematic methods of quality management which will facilitate the establishment and protection of high standards across companies This book will show which methods are available and how they can reasonably be used The authors present an easy to read guide which not only includes the most important legal provisions standards and accreditation and certification procedures but also develops practical quality assurance strategies and shows how they can be implemented within the agri food industry **Tracing Pathogens in the Food Chain** Stanley Brul, P M Fratamico, Thomas A. Microbiological Risk Assessment in Food Processing M. Brown, M. Stringer, 2002-09-26. The chilling and freezing of meat remains an essential way of extending shelf life and maintaining quality. Based on the work of the internationally renowned Food Refrigeration and Process Engineering Centre (FRPERC), Meat refrigeration provides an authoritative guide both to the impact of refrigeration on meat and best practice in using it to maximise meat quality for the consumer. Part one considers the impact of refrigeration on meat quality. There are chapters on the microbiology of refrigerated meat and its influence on shelf life, drip production, weight loss and the effect of refrigeration on colour and texture. Part two looks at best practice in managing the cold chain from carcass to consumer. The authors discuss primary chilling, freezing, thawing and tempering, transport, storage, retail display and consumer handling. Part three of the book looks at aspects of process control, including chapters on such issues as temperature measurement, the design and optimal use of refrigeration systems. Both authoritative and practical, Meat refrigeration is a standard work for all those wishing to maximise the quality of refrigerated meat. The standard work on meat refrigeration. Covers both individual quality issues and the management of the cold chain from carcass to consumer.

Sustainable Food Processing Brijesh K. Tiwari, Tomas Norton, Nicholas M. Holden, 2013-12-31. Sustainable Food Processing. Food processors face numerous challenges from ever-changing economic, social and environmental conditions. With global inequalities increasing, ingredient costs climbing and global climate change becoming a major political issue, food producers must now address environmental concerns, social responsibility and economic viability when shaping their food processing techniques for the future. Food production, preservation and distribution contribute to greenhouse gas emissions from the agri-food sector; therefore, food producers require detailed, industrially relevant information that addresses these challenges. The food industry, as one of the world's largest users of energy, must embrace new ways of meeting the needs of the present without compromising future viability. It is important that the industry does not merely focus on simple indicators of sustainability that are relatively easy to calculate and hold appeal for governments and the public but which do not properly address the many dimensions of sustainability. This book provides a comprehensive overview of both economic sustainability and the environmental concerns that relate to food processing. It is divided into four sections. Part one deals with principles and assessment of sustainability in the context of food processing. Part two summarises sustainability in various food processing applications within the food industry. Part three considers sustainability in food manufacturing operations that are vital in food production systems, and Part four addresses sustainable food distribution and consumption. As the most comprehensive reference book for industry to date, this book will provide engineers, educators, researchers, policy makers and scientists working in the food industry with a valuable resource for their work.
