Share Repurchases:

Share Repurchases Theo Vermaelen, 2005 This survey derives some of the key results on the taxation of international investment in variants of one model of multinational investment The Impact of Targeted Share Repurchases (greenmail) on Stock Prices, 1984 Announcement effects of share repurchases in India. Abnormal returns or information asymmetry? Jonas Wirth, 2023-06-05 Master's Thesis from the year 2022 in the subject Economics Finance grade 1.0 University of Passau language English abstract In this paper market based and firm specific determinants are introduced to measure their association with abnormal returns around the announcement of a share buyback conducted through tender and open market offers in India To test the valuation effect of market based variables uncertainty which is determined by implied market volatility and economic policy uncertainty Liquidity risk which is investigated through two illiquidity proxies and the impact of the monetary environment represented by the three month Mumbai Interbank Offer Rate MIBOR and the gold price are included In addition the main firm specific hypotheses are tested to identify potential key drivers The valuation effects examined cover the period from April 1 2011 to March 31 2021 during which a total of 359 share repurchases were made 231 through tender offer and the remaining 128 through the open market Beside separating the two buyback methods I examine different categories in addition to the full sample to determine whether market participants reaction to share repurchase announcements leads to abnormal returns The rest of the paper is organized as follows Next section provides an overview about the regulatory framework of share buyback in India Section 3 states a brief overview about the share repurchase literature with reference to uncertainty and liquidity in global context and firm specific literature in Indian context Then the hypotheses are stated Sections 5 and 6 present the methodology and data and section 7 presents the empirical results Section 8 provides concluding remarks Stock Buyback Motivations and Consequences: A Literature Review Alvin Chen, Olga A. Obizhaeva, 2022-02-09 Once infrequently used stock buybacks have become the dominant form of corporate payouts in the new century Hundreds of billions of dollars flow from public companies to their shareholders via share repurchases every year This literature review presents the main findings from the academic literature on stock buybacks in the United States and around the world Where appropriate and possible it compares and contrasts the insights of researchers to the views of practitioners There has been much controversy about share repurchases in recent years On the one hand proponents of share repurchases say that this payout method provides liquidity and price support returns excess cash in a flexible way corrects undervaluation and conveys information to the market These aspects of buybacks are also often cited by practitioners as motivations for their share repurchase decisions Academic research provides evidence that supports this view as well On the other hand opponents of buybacks argue that the practice may be used to manipulate executive compensation and mislead investors While these aspects of share repurchase are rarely mentioned by corporate executives academic research lends some credence to these concerns Overall academic researchers agree that while stock

buybacks may be misused this payout method has clear advantages Hence the challenge is to provide the right combination of oversight that allows companies to benefit from those advantages while minimizing potential costs Finally the studies surveyed in this review point out that a company's buyback decision is tightly linked to many of its other policies such as capital structure compensation risk management and disclosure Consequently share repurchase policy discussions should also recognize the implications of the proposed changes for other corporate policies
