Shared Capitalism at Work Douglas L. Kruse, Richard B. Freeman, Joseph R. Blasi, 2010-06-15 The historical relationship between capital and labor has evolved in the past few decades One particularly noteworthy development is the rise of shared capitalism a system in which workers have become partial owners of their firms and thus in effect both employees and stockholders Profit sharing arrangements and gain sharing bonuses which tie compensation directly to a firm's performance also reflect this new attitude toward labor Shared Capitalism at Work analyzes the effects of this trend on workers and firms The contributors focus on four main areas the fraction of firms that participate in shared capitalism programs in the United States and abroad the factors that enable these firms to overcome classic free rider and risk problems the effect of shared capitalism on firm performance and the impact of shared capitalism on worker well being This volume provides essential studies for understanding the increasingly important role of shared capitalism in the modern workplace

Moral Action and Christian Ethics Jean Porter, 1999-03-11 How do we determine whether an action is right or wrong Until recently philosophers assumed that this question could be answered by means of a theory of morality which set forth clearly established rules for moral behaviour More recently however a number of philosophers have challenged a theory of morality in this sense Porter is sympathetic to their criticisms but questions whether they go far enough in offering a positive alternative to a modern view of the moral act She argues that the work of Aquinas offers an alternative account of moral rationality in terms of which moral reasoning is understood as dialectical rather than deductive and questions are resolved in a wider context of ethical thought Aquinas's account of the moral virtues and prudence is seen to offer unexpected insights into the relationship between moral rules and the practice of the virtues thus contributing to our own moral reflection
