Shark True Stories And Lessons From The Deep:

Shark! Peter Benchley, 2002 The author of *Jaws* turns from fiction to fact as he shares his dramatic real life experiences on and under the sea and offers advice on how to stay safe in the ocean Peter Benchley here draws on more than 30 years of experience on and under the water to help the reader approach the ocean and its inhabitants with the understanding and respect they deserve He describes the many types of sharks and the few that pose a genuine threat to man what is and what is not known about shark behaviour the odds against an attack and how to reduce these odds even further all reinforced by personal experience the mistakes he has made and the personal perils he has encountered while producing countless articles and television documentaries as well as his novels Benchley tells us how to swim safely how to read tides and currents and how to survive when danger suddenly strikes He also discusses what to tell children about sharks and the sea and how to develop a healthy respect for the sea *Shark Quest* Karen Romano Young, 2018-08-01 Sharks are in trouble Fifty shark species are at high risk of extinction and another sixty three are threatened These intelligent mysterious and sometimes scary fish evolved about 420 million years ago They have adapted to survive deep in the ocean and in shallow water habitats Commercial fishing and finning are threatening shark populations So is water pollution Marine biologists and others including young people are working together to save these fascinating predators Discover the work of scientists and conservationists as they study shark biology and morphology research migration feeding and mating patterns delve into human climate and other threats to shark habitat and develop sophisticated technologies to aid sharks and shark research See how scientists also educate the public about real and imagined fear of sharks and encourage citizen participation in shark conservation efforts Learn about high tech tagging for tracking shark migration paths Discover the autonomous underwater vehicles and drones that divers use to observe and photograph sharks up close Visit shark sanctuaries in the South Pacific Ocean You ll even meet the Shark Lady a k a Eugenie Clark a pioneer ichthyologist shark scientist Through research and advocacy people around the world are working to protect and admire sharks A n engaging well researched book about a much maligned species of fish that deserves our protection Booklist A remarkably thorough tour of the world of sharks and marine scientists efforts to educate the public about our ocean s apex predators Kirkus Reviews **Deadly Beautiful** Liana Joy Christensen, 2011 Did you know that the humble marmot is responsible for more than one billion human deaths Or that it s possible to be bitten by a snake s head for up to an hour after it s been decapitated On the flip side for every person bitten by a shark each year 25 people are bitten by New Yorkers It seems that truth sometimes is stranger than fiction These facts and many more appear in this fascinating tribute to our world s deadly wildlife At its heart however *Deadly Beautiful* makes a passionate plea for us to learn to better cohabit with our fellow residents of planet Earth Ever increasing concern for the fate of the environment and the world s endangered wildlife means that this book is a particularly timely addition to the world of natural history publishing Dr Liana Joy Christensen one of Australia s foremost nature writers

takes a fresh and entertaining look at the deadly animals with which humans have for so long enjoyed a love hate relationship. These animals are generally not the aggressors nor the lethal killing machines that mythology and tradition would have us believe. Most also serve vital roles in maintaining the ecological balance of their habitats while their fascinating behaviour and often striking beauty make them worthy of close study particularly as so many of them are facing the worst death of all extinction. Beautifully illustrated, *Deadly Beautiful* is certain to foster a new understanding and appreciation of these incredible animals and their importance on a global scale.

Shark Trouble Peter Benchley, 2002-06-04. Drawing on more than three decades of experience writing about sharks and other marine animals, the bestselling author of *Jaws* combines high adventure with practical information in a book that is at once a thriller and a valuable guide to being safe in, on, under and around the sea. Shark attacks on human beings generate a tremendous amount of media coverage. Benchley writes partly because they occur so rarely but mostly I think because people are and always have been simultaneously intrigued and terrified by sharks. Sharks come from a wing of the dark castle where our nightmares live deep water beyond our sight and understanding and so they stimulate our fears and fantasies and imaginations. Benchley describes the many types of sharks including the ones that pose a genuine threat to man, what is and isn't known about shark behavior, the odds against an attack and how to reduce them even further, all reinforced with the lessons he has learned, the mistakes he has made and the personal perils he has encountered while producing television documentaries, bestselling novels and articles about the sea and its inhabitants. He tells how to swim safely in the ocean, how to read the tides and currents, what behavior to avoid and how to survive when danger suddenly strikes. He discusses how to tell children about sharks and the sea and how to develop in young and old alike a healthy respect for the ocean. As Benchley says, 'The ocean is the only alien and potentially hostile environment on the planet into which we tend to venture without thinking about the animals that live there, how they behave, how they support themselves and how they perceive us.' I know of no one who would set off into the jungles of Malaysia armed only with a bathing suit, a tube of suntan cream and a book, and yet that's precisely how we approach the oceans. No longer. Not after you've read *Shark Trouble*.

Movie Monsters of the Deep Faith Roswell, 2025-11-04. From iconic sea creatures in cinema to fearsome deep sea legends, this book explores the allure of underwater monsters in film, from terrifying realities to fantastical tales that captivate and chill audiences alike. Is there a shark movie that is scarier than *Jaws*? What is the sneaky secret hidden in the Loch Ness monster's name? How did the Gill man in *Creature from the Black Lagoon* become a romantic hero? Do mermaids count as sea monsters? What terrifying sea creature was discovered to really exist and just what on earth is a globster? From Kraken to kaiju, *Open Water* to *The Shallows*, monsters of the deep have fascinated and horrified us for centuries. There's even a name for the fear of deep bodies of water: thalassophobia. Humans have a natural fear of predators in the water and yet we just can't stop thinking about them. There are a lot of deep water monster movies out there, good, bad, strange and so bad it's good. This book has collected some of the best, worst and most interesting out there to tell you about. If

you ever wanted to know your crocodile from your Cthulhu and find out how they make the monsters come alive whether you like your monsters in the ocean or in lakes based on real animals or totally made up with fins or tentacles one head or five if you love your movie monsters of the deep then this book was written for you [100 Most Popular Genre Fiction Authors](#)
