An Examination of the Views of Religious Organizations Regarding Global Warming

United States. Congress. Senate. Committee on Environment and Public Works, 2011 *Awaiting the City* Chad Brand, Tom Pratt, 2012-11-13 People of faith have always been on search for the homeland first promised to Abraham in light of the Babylonian civilization he left That future hope was reinterpreted by Jesus and taken up by St Augustine in *The City of God* reinterpreted again by John Calvin in Geneva and given a final form by the Puritan pilgrims who came to America to establish the City upon a Hill Fundamental to this quest for a just holy civilization has been the progress of humankind on the earth in light of the mandate to fill and rule over it Authors Chad Brand and Tom Pratt discuss that progress as they answer the vital questions for praxis How should biblically oriented Christians think of and work toward God's justice along the way How can we steer between a utopian vision and a limited vision to a new rational compassion

A Climate of Crisis Patrick Allitt, 2014-03-20 A provocative history of the environmental movement in America showing how this rise to political and social prominence produced a culture of alarmism that has often distorted the facts Few issues today excite more passion or alarm than the specter of climate change In *A Climate of Crisis* historian Patrick Allitt shows that our present climate of crisis is far from exceptional Indeed the environmental debates of the last half century are defined by exaggeration and fearmongering from all sides often at the expense of the facts In a real sense Allitt shows us collective anxiety about widespread environmental danger began with the atomic bomb As postwar suburbanization transformed the American landscape more research and better tools for measurement began to reveal the consequences of economic success A climate of anxiety became a climate of alarm often at odds with reality The sixties generation transformed environmentalism from a set of special interests into a mass movement By the first Earth Day in 1970 journalists and politicians alike were urging

major initiatives to remedy environmental harm. In fact, the work of the new Environmental Protection Agency and a series of clean air and water acts from a responsive Congress inaugurated a largely successful cleanup. Political polarization around environmental questions after 1980 had consequences that we still feel today. Since then, the general polarization of American politics has mirrored that of environmental politics as pro environmentalists and their critics attribute to one another the worst possible motives. Environmentalists see their critics as greedy special interest groups that show no conscience as they plunder the earth while skeptics see their adversaries as enemies of economic growth whose plans stifle initiative under an avalanche of bureaucratic regulation. There may be a germ of truth in both views but more than a germ of falsehood too. America's worst environmental problems have proven to be manageable; the regulations and cleanups of the last sixty years have often worked and science and technology have continued to improve industrial efficiency. Our present situation is serious, argues Allitt, but it is far from hopeless. Sweeping and provocative, *A Climate of Crisis* challenges our basic assumptions about the environment no matter where we fall along the spectrum, reminding us that the answers to our most pressing questions are sometimes found in understanding the past.
