Shell Collecting An Illustrated History:

A history of shell collecting Dance, 2024-09-02 *Shell Collecting* S. Peter Dance, 1966 *A Field Guide to Shells* Robert Tucker Abbott, Percy A. Morris, 1995 Describes and depicts eight hundred species of shells *Johann Reinhold Forster and the Making of Natural History on Cook's Second Voyage, 1772-1775* Anne Mariss, 2019-09-09 James Cook's voyages of exploration are a turning point not only in the history of the British Empire but also in the history of science and exploration of the Pacific. The last decades have seen a wide ranging scholarly interest in Cook's voyages focusing on their impact on European and Polynesian societies, their scientific results and their protagonists such as Cook himself or the nobleman Joseph Banks who took part in Cook's first voyage of exploration. This book examines the hitherto underestimated role of the German scholar Johann Reinhold Forster who together with his son Georg Forster accompanied Cook on his second voyage of exploration 1772-1775 as a principal naturalist. For a long time the German traveler has remained a rather shadowy figure of Cook's voyages of exploration and has only attracted scholarly attention occasionally. Focusing on the making of knowledge onboard the ship and the islands where it made landfall, the study provides a historical reappraisal of Forster's scientific performance as a leading naturalist of his time. By examining Forster's Resolution Journal, Anne Mariss takes a microhistorical approach toward the making of natural history knowledge during the expedition to the Pacific. Mariss unveils the difficulties the traveling naturalists encountered while collecting, describing, classifying and painting the natural world. Her study brings to light the contribution of the various actors who were involved in this undertaking such as the scientific assistants, sailors, officers and the local actors of the Pacific world. **Made From This Earth** Vera Norwood, 2014-07-01 The broad sweep of environmental and ecological history has until now been written and understood in predominantly male terms. In *Made From This Earth*, Vera Norwood explores the relationship of women to the natural environment through the work of writers, illustrators, landscape and garden designers, ornithologists, botanists, biologists and conservationists. Norwood begins by showing that the study and promotion of botany was an activity deemed appropriate for women in the early 1800s. After highlighting the work of nineteenth century scientific illustrators and garden designers, she focuses on nature's advocates such as Rachel Carson and Dian Fossey who differed strongly with men on both women's nature and the value of the natural world. These women challenged the dominant male controlled ideologies, often framing their critique with reference to values arising from the female experience. Norwood concludes with an analysis of the utopian solutions posed by ecofeminists, the most recent group of women to contest men over the meaning and value of nature. *Asian Marine Biology* 1986 Brian Morton, 1987-06-09 This is the annual journal of the Marine Biological Association of Hong Kong. It contains papers on marine subjects of interest to all Asian biologists. **The Mysterious Science of the Sea, 1775-1943** Natascha Adamowsky, 2015-10-06 The depths of the oceans are the last example of terra incognita on earth. Adamowsky presents a study of the sea, arguing that contrary to popular belief, post-Enlightenment discourse on the sea was

still subject to mystery and wonder and not wholly rationalized by science From Mineralogy to Geology Rachel Laudan, 1994-02-02 A fine treatment of this critical time in geology's history Although it goes against our standard histories of the field Laudan defends her views convincingly Her style is direct with carefully reasoned personal opinions and interpretations clearly defined Jere H Lipps *The Scientist* The Illustrated Natural History John George Wood, 1871

Snail Peter Williams, 2012-01-01 So attached was the author Patricia Highsmith to snails that they became her constant travelling companions Often hidden in a large handbag they provided her with comfort and companionship in what she perceived to be a hostile world Theirs was perhaps an unusual relationship for most of us the tentacled snail with his sticky trail might be a delicious treat served up in garlic butter but certainly not an affectionate pet As well for many a gardener opinions on the snail and slug which is a just a snail without a shell have been shaped by the harm they inflict on vegetable plants and seedlings With *Snail* Peter Williams wishes to change our perspectives on this little but much maligned creature Beginning with an overview of our relationship with snails slugs and sea snails Williams moves on to examine snail evolution snail behavior and habitat snails as food medicine and the source of useful chemicals and dyes snail shells as collectible objects and snails in literature art and popular culture Finally in this appreciative account of the snail Williams offers a plea for a reconsideration of the snail as a dignified ancient creature that deserves our respect Containing beautiful illustrations and written in an approachable informal style *Snail* will help readers get beyond the shell and slime to discover the fascinating creature inside
