Bernhardt**

Longevity Factor:

The Longevity Factor Joseph Maroon, 2008-12-30 Neuroscientist and surgeon Joseph Maroon looks at recent scientific breakthroughs identifying a group of natural substances including the much publicized molecule resveratrol that can actually activate a specific set of genes that promote a longer healthier life These substances which make red wine dark chocolate and green tea good for us appear to stave off a wide array of age related diseases and keep us feeling young and vital Only recently have scientists discovered how to isolate resveratrol and concentrate it into an affordable and safe supplement Already more than 200 supplements featuring resveratrol have flooded the market and there are more on the way What is a consumer to look for Since resveratrol is a natural substance can you get enough of it through diet alone or should you combine diet with a supplement And what lies on the horizon from the pharmaceutical industry These questions and many more are answered here From publisher description

The Longevity Factor Pasquale De Marco, The Longevity Factor takes readers on an enlightening journey into the captivating world of longevity exploring the latest scientific Erkenntnisse and offering practical insights into how we can optimize our health and well being as we age This comprehensive guide delves into the complexities of human aging examining the biological environmental and lifestyle factors that influence our lifespan Discover the groundbreaking research in genetics nutrition and exercise physiology that is revolutionizing our understanding of aging and revealing new pathways to longevity Beyond the scientific realm this book explores the profound philosophical and ethical implications of living longer Contemplate the impact of an aging population on society the changing nature of work and retirement and the quest for immortality Examine the unique challenges and opportunities that come with increased longevity including the need for innovative healthcare systems and the importance of intergenerational relationships Be inspired by the remarkable stories of individuals who have defied the odds and achieved exceptional longevity Their experiences and insights provide valuable lessons on how to live a long healthy and fulfilling life Explore the latest advancements in medical technology and the potential of emerging therapies to further extend human lifespan With The Longevity Factor you ll gain a comprehensive understanding of longevity empowering you with the knowledge and tools to make informed choices that promote your long term health and well being Whether you are seeking to optimize your own longevity or simply curious about the fascinating science of aging this book is an essential guide to navigating the complexities of life s journey In these pages you ll discover The latest scientific Erkenntnisse on aging and longevity Practical strategies for optimizing health and well being throughout the lifespan Inspiring stories of individuals who have achieved exceptional longevity Thought provoking insights into the ethical and philosophical implications of longevity An exploration of the latest advancements in medical technology and emerging therapies The Longevity Factor is an indispensable resource for anyone seeking to live a longer healthier and more fulfilling life If you like this book write a review

The Longevity Factor Lydia Bronte, 1993 Based upon a five year study Lydia Bronte has uncovered a remarkable new fact of American life a

stage of healthy adulthood between the ages of fifty and seventy five that has never existed before created by our nation's advancing longevity

The Longevity Factor Richard A. Passwater, 1993 *Anti-Aging Medicine* Hidekazu Yamada, Yuji Naito, 2025-02-05 This textbook considers aging as a disease and summarizes the leading edge research and facts on anti-aging medicine and the aging mechanism. It provides the basics and biology of aging science followed by presenting clinical studies such as exercise, nutrition, mental health, brain, sleep, and treatment interventions. The book also discusses aging control and considers behavioral, environmental, and societal implications for healthy aging. The field of aging science is interdisciplinary and there are much more uncertainties; thus, it is crucial to summarize what is currently known to set a foundation for future research. The International Classification of Diseases by the World Health Organization (WHO) has given the aging-related disease a subcode of XT9T. This trend advanced research of aging-related sicknesses and the concept that infirmities associated with old age can be controlled such as cancer, dementia, and cardiovascular diseases. Basic research has progressed and clinical applications have become available, resulting in significant social changes. As increased life expectancy is happening over the globe, we are facing unprecedented challenges, and anti-aging medicine is a key to treating population growth, environmental problems, etc., as problems for the entire planet. *Anti-Aging Medicine: Basics and Clinical Practice* is an English translation of the publication by the Japanese Society of Anti-Aging Medicine. It is an insightful source for healthcare professionals and scholars in anti-aging and geriatrics. It will attract pharmaceutical, Information Technology, and Artificial Intelligence industries associated with aging-responsive markets. The English translation of this book, originally in Japanese, was facilitated by artificial intelligence. A subsequent human revision of the content was done by the editors and authors.

Nutrition, Food and Diet in Ageing and Longevity Suresh I. S. Rattan, Gurcharan Kaur, 2021-10-03 This edited volume is a compilation of 30 articles discussing what constitutes food for health and longevity. The aim is to provide up-to-date information, insights, and future tendencies in the ongoing scientific research about nutritional components, food habits, and dietary patterns in different cultures. The health-sustaining and health-promoting effects of food are certainly founded in its overall composition of macronutrients and micronutrients. However, the consumption of these nutrients is normally in the form of raw or prepared food from the animal and plant sources. The book is divided into four parts and a conclusion and successfully conveys the well-established information and knowledge along with the personal views of a diversified group of researchers and academicians on the multifaceted aspects of nutrition, food, and diet. The first part reviews the scientific information about proteins, carbohydrates, fats, and oils, micronutrients, pro and prebiotics, and hormetins along with a discussion of the evolutionary principles and constraints about what is optimal food if any. The second part discusses various kinds of foods and food supplements with respect to their claimed benefits for general health and prevention of some diseases. The third part brings in the cultural aspects such as what are the principles of healthy eating according to the traditional Chinese and Indian systems, what is the importance of meal times and daily rhythms, and how

different cultures have developed different folk wisdoms for eating for health longevity and immortality In the part four various approaches which are either already in practice or are still in the testing and research phases are discussed and evaluated critically for example intermittent fasting and calorie restriction food based short peptides senolytics Ayurvedic compounds optimal food for old people and food for the prevention of obesity and other metabolic disorders The overreaching aim of this book is to inform inspire and encourage students researchers educators and medical health professionals thinking about food and food habits in a holistic context of our habits cultures and patterns Food cannot be reduced to a pill of nutritional components Eating food is a complex human behavior culturally evolved over thousands of years Perhaps the old adage we are what we eat needs to be modified to we eat what we are

Stem Cell Biology and Regenerative Medicine Charles Durand,Pierre Charbord,2022-09-01 The study of stem cell biology is under intensive investigations Because stem cells have the unique capability to self renew and differentiate into one or several cell types they play a critical role in development tissue homeostasis and regeneration Stem cells also constitute promising cell candidates for cell therapy The aim of this book is to provide an accurate knowledge on stem cell biology and regenerative medicine This book will cover many topics in the field and is based on seminars given by recognized scientists involved the international master program on stem cell biology at the University Pierre and Marie Curie UPMC in Paris

Annual Review of Gerontology and Geriatrics, Volume 34, 2014 Richard Sprott,2014-03-20 Enormous advances in our knowledge of genetic contributions to aging and disease and in our understanding of the potential for manipulation of the aging process have taken place during the past 20 years This is the first volume in decades to consolidate this research in one place It provides a broad and current overview of the most promising advances in genetic research on aging current understanding of genetic contributions to the basic processes of aging and age related disease The Review focuses on the aging process from lower organisms to man and is organized in ascending order of biological complexity starting with stem cells and progressing through worms flies mice and humans Where relevant the Review also includes information about yeasts and non human primates The research presented in the Review uses a species comparative approach that makes finding cross species similarities gene conservation and differences gene differentiation apparent This approach reflects the way in which the field is organized making it highly useful for investigators who want quick access and a concise summary of a particular topic Key Features Provides state of the art information about promising advances in genetic research on aging Comprises the first comprehensive volume regarding

genetic research about aging in decades Authored by leading scholars in the field Disseminates enormous advances in our understanding of the aging process *Trust Management* Paddy Nixon,Sotirios Terzis,2003-05-15 This book constitutes the refereed proceedings of the First International Conference on Trust Management iTrust 2003 held in Heraklion Crete Greece in May 2003 The 24 revised full papers presented were carefully reviewed and selected from 58 submissions This first book devoted to the emerging interdisciplinary field of trust management spans the whole range of relevant topics from technical issues in distributed and open systems to legal social and philosophical aspects **Focus on Atherosclerosis Research**

Leon V. Clark,2004 Atherosclerosis is a degenerative condition in which arteries build up deposits called plaques atheromas which consist of lipids mainly cholesterol connective tissue and smooth muscle cells originating from the arterial wall Plaques develop quietly over a period of years and are unnoticeable until there is an interruption in the normal flow of blood Plaques may partially or totally block the blood s flow through an artery Two things that can happen where plaques occur are bleeding hemorrhage into the plaque and formation of a blood clot thrombus on the plaque s surface Atherosclerosis affects large and medium sized arteries The type of artery and where the plaque develops varies with each person Atherosclerosis research has witnessed startling progress in recent years partially due to new drugs as well as to new breakthroughs in molecular medicine **Cytokines** Victor R. Preedy,Ross Hunter,2011-06-24 Cytokines are a group of peptides secreted by cells of the immune system such as macrophages lymphocytes and T cells They can be divided into functional families and have wide ranging impacts that affect cells and molecular pathways to the whole individual Written by distinguished scholars and experts this book is a holistic reference to enabl
