Longitudinal Studies of Adult Psychological Development Klaus Warner Schaie, 1983 **Handbook of the Psychology of Aging** James E. Birren, K Warner Schaie, 2001-08-02 The Handbook of the Psychology of Aging has become the definitive reference source for information on the psychology of adult development and aging The Fifth Edition provides comprehensive reviews of research on biological and social influences on behavior and age related changes in psychological function In addition to covering environmental influences on behavior and aging and gender differences in aging new chapters in the Fifth Edition discuss wisdom creativity and technological change and the older worker This handbook is an essential reference for researchers in adult development and gerontology and suitable as an advanced textbook for courses on the psychology of aging **Intellectual Development in Adulthood** K. Warner Schaie, 1996-01-26 K Warner Schaie analyses his comprehensive study of aging's effects on intelligence **Developmental Influences on Adult Intelligence** K. Warner Schaie, 2012-11-30 Adult cognitive development is one of the most important yet most neglected aspects in the study of human psychology Although the development of cognition and intelligence during childhood and adolescence is of great interest to researchers educators and parents many assume that this development stops progressing in any significant manner when people reach adulthood In fact cognition and intelligence do continue to progress in very significant ways In this second edition of *Developmental Influences on Adult Intelligence* K Warner Schaie presents the history latest data and results from the Seattle Longitudinal Study SLS The purpose of the SLS is to study various aspects of psychological development during the adult years Initiated in 1956 and focusing on a random sample of 500 adults ranging in age from 25 to 95 years old the SLS is organized around five questions Does intelligence change uniformly throughout adulthood or are there different life course ability patterns At what age and at what magnitude can decrement in ability be reliably detected What are the patterns and magnitude of generational differences What accounts for individual differences in age related change in adulthood Can the intellectual decline that increases with age be reversed by educational intervention The first edition of the book provided an account of the SLS through the 1998 seventh wave data collection and of the associated family study through the 1996 second wave data collection Since that time Schaie and his collaborators have conducted several additional data collections These include a further longitudinal follow up in 2005-06 a longitudinal follow up and 3rd data collection for the family study in 2003-04 and acquisition of a 3rd generation sample in 2002 Hence virtually all of the content from the first edition has been updated and expanded and three new chapters are included on Health Behaviors and Intellectual Functioning Biological Influences on Cognitive Change and Prediction of Individual Cognitive Decline This new edition is a valuable resource for researchers and practitioners specializing in adult development aging and adult education as well as students and faculty in developmental cognitive and social psychology psychiatry nursing social work and the social sciences interested in issues of human aging *Attachment from Infancy to Adulthood* Klaus E. Wolfgang Schneider, Merry Bullock, 2010-10-18 Data generated from longitudinal studies allow researchers to better understand how context and experience interact with stable characteristics of the developing person over time This book summarizes a landmark longitudinal study of 200 children from the ages of 3 to 23 The Munich Longitudinal Study on the Ontogenesis of Individual Competencies LOGIC examined the development of individual differences over time and whether it is possible to predict later competencies from earlier ones Offering a snapshot of theory and data on personality social motor moral and cognitive development the contributors help us understand which individual differences can and cannot be altered through schooling and other experiences and how differences seen in the earliest stages are later reflected in adulthood The

results provide valuable insight into the strengths and limitations of early prediction of individual differences This is the second volume to review the wealth of data generated by the study The first volume Weinert and Schneider 1999 traced development from ages 3 to 12 This volume continues the story integrating these early findings with the results from adolescence and young adulthood Each of the chapters provides an overview of current research and addresses how the data help us understand the presence and developmental effects of individual differences Among the findings are results on The relative stability of cognitive competencies The long term effects of shyness and aggression The relation between moral understanding and action and The role of education in the development or maintenance of performance differences Intended for researchers and advanced students in developmental educational personality social and cognitive psychology this book will also appeal to educators especially the chapters that focus on literacy development educational context scientific reasoning and mathematical reasoning

Cognitive Development in Adulthood Mark L. Howe, Charles J. Brainerd, 2012-12-06

For some time now the study of cognitive development has been far and away the most active discipline within developmental psychology Although there would be much disagreement as to the exact proportion of papers published in developmental journals that could be considered cognitive 50% seems like a conservative estimate Hence a series of scholarly books devoted to work in cognitive development is especially appropriate at this time The Springer Series in Cognitive Development contains two basic types of books namely edited collections of original chapters by several authors and original volumes written by one author or a small group of authors The flagship for the Springer Series is a serial publication of the advances type carrying the subtitle Progress in Cognitive Development Research Each volume in the Progress sequence is strongly thematic in that it is limited to some well defined domain of cognitive developmental research e g logical and mathematical development development of learning All Progress volumes will be edited collections Editors of such collections upon consultation with the Series Editor may elect to have their books published either as contributions to the Progress sequence or as separate volumes All books written by one author or a small group of authors are being published as separate volumes within the series A fairly broad definition of cognitive development is being used in the selection of books for this series

The Concise Corsini Encyclopedia of Psychology and Behavioral Science W. Edward Craighead, Charles B. Nemeroff, 2004-04-19

Cognitive Development and Individual Variability Anik De Ribaupierre, Thierry Lecerf, 2019-07-01

The standard approach to cognitive development most frequently consists of cross sectional studies comparing different ages and groups while restricted to a single task The necessity to focus on the individual in an idiographic perspective rather than on the task or the variable has been repeatedly emphasized most recently in several very important papers by Nesselroade and Molenaar

Variability has also emerged as a crucial characteristic. Moreover, understanding the developmental construction of a given cognitive achievement is imperative to understanding cognitive functioning in adulthood. The general objective of this book is to focus on the individual by studying intraindividual and interindividual variability in various cognitive tasks that is intraindividual variability across items of a given task, inconsistency across various cognitive tasks, dispersion and or across years, intraindividual change and of course on interindividual differences in intraindividual variability. This book presents empirical studies that have been conducted by research groups in Europe and in North America prominent in the field of variability and development or methodology. The 26 authors co-authors include senior authors such as Lautrey, Schmiedek, Dauvier, van der Maas, Ghisletta, Stawski, MacDonald and de Ribaupierre.

Development through Adulthood Oliver Robinson, 2020-04-04. Now updated for its second edition, this illuminating textbook explores the developmental stages and changes during adulthood that define some of the most pivotal years of our lives. Relationships, cognitive ageing, parenthood, personality shifts, life crises, fulfilment, funerals, friendships, retirement and death all are presented in light of psychological theory and the latest research. Taking a thematic approach, the chapters cover interdependent areas of our cognitive, psychological, social, cultural and moral lives that constitute this fascinating area in psychology. Providing an empirical analysis, Robinson considers models for understanding behaviour and development, methods of collecting data and study design. Academically rigorous and elegantly written, *Development through Adulthood* is the perfect guide to classic and current research in the field. It is essential reading for students studying adult or lifespan development, gerontology and the psychology of ageing. It will also appeal to those studying an applied social science and anyone interested in fully understanding adulthood and ageing. New to this Edition: Spotlights on landmark studies, fully updated to cover the latest key research in each subject area; Increased focus on gender issues; Real world applications boxes updated with current and relevant examples of important intervention strategies.

Human Development in Adulthood Lewis R. Aiken, 2005-12-21. *Human Development in Adulthood* is a comprehensive multidisciplinary overview of adult development in a number of areas, both personal and societal, from mental and physical health to economic and social conditions. Variables including race, gender, economic status and political and religious affiliation are considered in the discussion of such human issues as love and marital relations, economic concerns including employment and living conditions, violence in its various forms including crime and war, aging and death. The numerous illustrations, chapter summaries and glossary will prove especially useful to students.

Assessing Adolescent and Adult Intelligence Alan S. Kaufman, Elizabeth O. Lichtenberger, 2005-08-05. The classic text now updated with a new interpretive approach to the WAIS III. *Assessing Adolescent and Adult Intelligence* the classic text from Alan Kaufman and Elizabeth Lichtenberger has consistently provided the most comprehensive source of information on cognitive assessment of adults and adolescents. The newly updated Third Edition provides important enhancements and additions that highlight the latest research and interpretive methods for the WAIS III. Augmenting the

traditional sequential and simultaneous WAIS III interpretive methods the authors present a new approach derived from Cattell Horn Carroll CHC theory This approach combines normative assessment performance relative to age peers with ipsative assessment performance relative to the person's own mean level Following Flanagan and Kaufman's work to develop a similar CHC approach for the WISC IV Kaufman and Lichtenberger have applied this system to the WAIS III profile of scores along with integrating recent WAIS III literature Four appendices present the new method in depth In addition to a detailed description the authors provide a blank interpretive worksheet to help examiners make the calculations and decisions needed for applying the additional steps of the new system and norms tables for the new WAIS III subtest combinations added in this approach Assessing Adolescent and Adult Intelligence remains the premier resource for the field covering not only the WAIS III but also the WJ III the KAIT and several brief measures of intelligence as well as laying out a relevant up to date discussion of the discipline The new theory based interpretive approach for the WAIS III makes this a vital resource for practicing psychologists as well as a comprehensive text for graduate students Psychology and Adult Learning Mark

Tennant, 2019-08-29 The fourth edition of Psychology and Adult Learning has been thoroughly updated to encompass shifts in the concerns of adult educators as they respond to changing global social and economic issues It examines the role of psychology in informing adult education practice and explores the seminal traditions of key psychological theories as well as discussing issues and problems in applying them to an understanding of adult learning and development Providing a thoughtful and accessible approach to understanding self and personal change in adult education and with a new emphasis on diversity this new edition has been revised and updated in light of the impact of globalising processes the emphasis on diversity among educators developments in cognitive neuroscience the impact of social media and the theoretical move away from grand theory It examines the formation of identities and places increased emphasis on how a conception of selfhood lies at the heart of teaching adults Considering adult learning in a variety of contexts topics covered include Humanistic psychology Selfhood in the adult years The relevance of neuroscience Adult intelligence and cognition Behaviourism Group learning Transformative learning Psychology and Adult Learning examines the psychological dimension of adult education work by analysing and critiquing key psychological theories that have informed our understanding It is essential reading for all those who seek a critical account of how psychology informs contemporary adult education theory and practice Ageing and Mental Handicap James Hogg, Steve Moss, Diana Cooke, 2024-05-10 In the 1980s there was growing interest in the topic of ageing and learning disabilities for two principal reasons First the life expectancy of people with learning disabilities had risen significantly over the previous decades and many once in infancy had been survived could expect a life span similar to that of non disabled people Secondly a growing commitment on the part of the government and service providers to make provision for people with disabilities in the community rather than in institutions had focused attention on this group Originally published in 1988 reissued here with a new foreword this book was one of the first on this subject It examines

epidemiology and mortality and medical and psychiatric issues compared with non disabled older people It considers how people with learning disabilities change in intellectual and adaptive function with age the nature of family relationships relevant therapeutic programmes and policy and the development of services The book represented a major review of a hitherto neglected topic and would interest gerontologists psychologists and professional health social and educational staff concerned with the welfare of older people with learning disabilities This book is a re issue originally published in 1988 The language used is a reflection of its era and no offence is meant by the Publishers to any reader by this re publication
