A Look Around Endangered Animals Ed Perez,1992 Discusses the extinction and endangerment of animals

Endangered Species Charles E. Gannon,2023-08-01 CAINE RIORDAN RETURNS AND FACES DOWN HIS BIGGEST CHALLENGE YET Caine Riordan has faced many crises in his unintended career as diplomat soldier and first contact specialist but none more challenging than the one he faces now He and twelve of his crew are adrift in uncharted space so far beyond Earth that the starfield is unrecognizable And with the controls and computer destroyed they have no way to calculate their position or call for rescue Instead trapped on a derelict alien ship they have only forty eight hours before its decaying orbit causes it to burn up in the atmosphere of the strange planet beneath them It s a silent and forbidding world of bleak deserts and turbulent seas without any sign of life and dominated by violent storms But since the ship s lander is also useless they ve got only one way to reach the surface flimsy foam inflating cargo drop pods never intended for human use let alone an emergency planet fall And even if they live through the fiery plummet from low orbit they have almost no portable gear with which to survive in an arid alien wilderness However those who make it to the surface discover that the dangers they couldn t see from space are by far the most deadly A variety of bizarre carnivorous species roams the barren wastes desperate for food Their primary competition Deeply devolved transgen humans that are as uncommunicative as they are primitive and ferocious Even more ominous the world s blasted cities have telltale signs which indicate its original masters were none other than humanity s most dangerous foe the Ktor And worst of all they may still be here At the publisher s request this title is sold without DRM Digital Rights Management About Caine s Mutiny This is military Science Fiction the way it s supposed to be written All in all a highly satisfying tale of the Terran Republic that moves the story forward and setting us up for the next chapter which promises to be interesting at worst and explosive at best SFCrowsnest About Raising Caine Raising Caine unveils a lot of thought provoking ideas but ultimately this is a space opera adventure There are space battles daring emergency landings desperate quests hand to hand combat and double and triple crosses It s an engrossing read You owe it to yourself to read the two previous books in order Then enjoy Raising Caine It s an intergalactic thrill ride Fantasy and Science Fiction Book and Audiobook Reviews This is science fiction adventure on a grand scale Kirkus Gannon s harrowing military space opera following Trial by Fire builds well on his established setting Gannon s signature attention to developing realistic alien worlds makes this installment satisfying Publishers Weekly A n incredibly active book as our protagonists are confronted by the beautiful terrible and sometimes lethal variety of the universe and its inhabitants A whole mess of fun that manages to be scientifically accurate while refraining from excessive wonkiness Those who value meticulous worldbuilding will certainly have their needs met BN Sci Fi and Fantasy Blog [Explore and Discover 3 Tm' 2004 Ed. ,](#)

Forest Biodiversity and Clearcutting Prohibition Act United States. Congress. House. Committee on Natural Resources. Subcommittee on National Parks, Forests, and Public Lands,1994 **Case Studies in Educational Psychology** Patricia P.

Willems, Alyssa R. Gonzalez-DeHass, 2017-12-06 This case study book serves as a valuable tool for professors and instructors of educational psychology. It contains 18 cases that represent current areas of interest in Educational Psychology embedded within current challenges that teachers face in today's elementary grade classrooms. The cases are organized into six major parts: Human Development, Individual Differences and Diversity, Learning Theories, Motivation, Classroom Management, Instructional Approaches, and Assessment and Evaluation. Each case describes a detailed teaching scenario written from either the student or the teacher's perspective. To engage students in critical thinking, perspective taking, analysis, problem solving, and decision making, the cases have been intentionally written without a conclusion. Because the cases are open ended, it allows the professor or instructor more flexibility and autonomy in how they use the cases. Each case is followed by thought provoking questions highlighting the significant issues in the case from which to analyze the case and apply various theoretical viewpoints. While the cases do not replace actual classroom experience, they present a way to immerse students in the classroom's culture by providing them with real life teaching examples.

chimpanzee in the world Precocious self conscious and preternaturally gifted young Bruno born and raised in a habitat at the

local zoo falls under the care of a university primatologist named Lydia Littlemore Learning of Bruno's ability to speak Lydia takes Bruno into her home to oversee his education and nurture his passion for painting But for all of his gifts the chimpanzee has a rough time caging his more primal urges His untimely outbursts ultimately cost Lydia her job and send the unlikely pair on the road in what proves to be one of the most unforgettable journeys and most affecting love stories in recent literature Like its protagonist this novel is big loud abrasive witty perverse earnest and amazingly accomplished The Evolution of Bruno Littlemore goes beyond satire by showing us not what it means but what it feels like to be human to love and lose learn aspire grasp and in the end to fail

Home John S Allen, 2015-12-29 A leading anthropologist studies the science behind feeling at home to show us how home made us human Home is where the heart is Security comfort even love are all feelings that are centered on the humble abode But what if there is more to the feeling of being at home Neuroanthropologist John S Allen believes that the human habitat is one of the most important products of human cognitive technological and cultural evolution over the past two million years In Home Allen argues that to feel at home is more than just an expression but reflects a deep seated cognitive basis for the human desire to have use and enjoy a place of one's own Allen addresses the very basic question How did a place to sleep become a home Within human evolution he ranks house and home as a signature development of our species as it emerged alongside cooperative hunting language and other critical aspects of humanity Many animals burrow making permanent home bases but primates generally speaking do not most wander making nests at night wherever they might find themselves This is often in home territory but it isn't quite home Our hominid ancestors were wanderers too so how did we over the past several million years find our way home To tell that story Allen will take us through evolutionary anthropology neuroscience the study of emotion and modern sociology He examines the home from the inside of our heads out homes are built with our brains as much as with our hands and tools Allen argues that the thing that may have been most critical in our evolution is not the physical aspect of a home but developing a feeling of defining creating and being in a home whatever its physical form The result was an environment relatively secure against whatever horrors lurked outside that enabled the expensive but creative human mind to reach its full flowering Today with the threat of homelessness child foster care and foreclosure this idea of having a home is more powerful than ever In a clear and accessible writing style Allen sheds light on the deep cognitive sources of the pleasures of having a home the evolution of those behaviors and why they matter Home is the story about how humans evolved to create a space not only for shelter but also for nurturing creativity innovation and culture and why feeling at home is a fundamental aspect of the human condition
