Looking Backward A Critical Appraisal Of Communitarian Thought:

Looking Backward Derek L. Phillips, 2014-07-14 When social reformers blame the current ills of Western culture on the loss of community they often evoke an ideal past in which societies were characterized by shared values respect for tradition commitment to the common good and similar attributes Communitarians assert that community was prominent in the past and argue that reclaiming the role community formerly played is necessary to counter the negative effects of individualism and liberal thinking Considering the relevance of community for our moral and political life today Derek Phillips offers the first thorough critique of the historical often nostalgic claims that underlie dominant versions of communitarian philosophy Originally published in 1993 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Europe, Phenomenology, and Politics in Husserl and Patocka Lorenzo Girardi, 2023-09-27 Europe is often discussed in the context of crisis usually economic or political Less prominent these days is Europe's spiritual crisis an important topic throughout the previous century Various catastrophes put in doubt the rationalist principles on which Europe had based itself The current relativist intellectual and political climate can still be seen as an expression of this Rather than following attempts to counter this via the restoration of a supposedly European essence often in terms of Christianity or rationalism this book attempts to think the crisis through to its end and to articulate the truth which manifests itself in it The themes of this book Europe phenomenology and politics share a concern with the crisis as the dissolution of the world that is the dissolution of a shared horizon of human existence Among phenomenologists Husserl and Patocka foremost have linked this problematic to reflections on the idea of Europe itself They represent two distinct perspectives corresponding to different historical situations Nonetheless what is presented here is not primarily the continuity between their thought and their historical circumstances but rather the underexamined continuity between their phenomenology and their thought on Europe and politics Applying phenomenology to politics Husserl's and Patocka's

thought are used to assess the justification for and limits of liberal and agonistic political philosophy respectively By analysing the concrete ways in which our world is structured experientially the limits of the ideal of rational reconciliation are shown An alternative conception of politics is developed on the basis of the breakdown of Europe's rationalist ideal that is on the basis of the truth which manifests itself in Europe's crisis without lapsing into a relativism where anything goes This leads to an agonistic conception of liberal democracy based on Patocka's phenomenological concept of problematization

The clamour of nationalism Sivamohan Valluvan, 2019-07-26 Nationalism has reasserted itself today as the political force of our times remaking European politics wherever one looks Britain is no exception and in the midst of Brexit it has even become a vanguard of nationalism's confident return to the mainstream Intellectual attempts to account for nationalism's resurgence have however floundered Desperately trying to read nationalism through one overarching cause as capitalist crisis as cultural backlash or as social media led anti Establishment politics these accounts have proven woefully inadequate This book argues that the only way to understand nationalism is through nationalism itself To understand it as the key force of modernity that calls upon all existing ideological traditions in asserting its appeal whether it is liberal conservative neoliberal or left wing This ideological clamour that characterises today's British nationalism requires both recognition and theorisation A meaningful understanding of new nationalism must reckon with the ideological range animating it and the deeply hostile aversion to different racial minorities that pervades its respective ideologies Drawing on a variety of cultural and political themes ranging from Corbyn's dithering the cult of Churchillism the neoliberal fixation with a point system immigration policy the muscular secularism of Richard Dawkins and friends fears that the white working class have become black and even simply the strange appeal of Harry Potter and Game of Thrones this book provides a dazzling but always detailed study of how nationalism is the politics of today only because it is a politics of everything **Tradition and Modernity** Kwame Gyekye, 1997 Gyekye offers a philosophical interpretation and critical analysis of the African cultural experience in modern times and shows how Western philosophical concepts help in addressing a wide range of specifically African problems **Encyclopedia of Community** DAVID LEVINSON, KAREN CHRISTENSEN, 2003-06-30 Click Additional
