[Exploring Interconnectedness](#) Katja Gorbahn, Erla Hallsteinsdóttir, Jan Engberg, 2023-06-22. This volume explores the socio-cultural and media background of a critical and ongoing political challenge: the complex entanglement between European integration and strong national agendas in the context of globalisation. It does so using educational media both textbooks and digital media as sites of cultural contestation to enquire into the intricate relationships around national and European identities and aspects of students' knowledge and reception. Using a variety of methods and technologies the chapters analyse identity constructions present in educational media discourses embedded as they are in their national and European contexts and as both the catalysts and products of their time. The book is a study of the post-digital condition in an educational context exploring the potential of digital humanities and linguistic approaches for educational media research and employing methods such as eye tracking or concept maps.
