**Cultural and Social Division in Contemporary Japan** Yoshikazu Shiobara,Kohei Kawabata,Joel Matthews,2019-07-30 The recent manifestation of exclusionism in Japan has emerged at a time of intensified

neoliberal economic policies increased cross border migration brought on by globalization the elevated threat of global terrorism heightened tensions between East Asian states over historical and territorial conflicts and a backlash by Japanese conservatives over perceived historical apologism The social and political environment for minorities in Japan has shifted drastically since the 1990s yet many studies of Japan still tend to view Japan through the dominant discourses of ethnic homogeneity *tanitsu minzoku shakai* and middle class society *so churyu shakai* which positions the exclusion of minorities as an exceptional phenomenon While exclusionism has been recognized as a serious threat to minority groups it has not often been considered a representative issue for the whole of Japanese society This tendency will persist until the discourses of *tanitsu minzoku shakai* and *so churyu shakai* are systematically debunked and Japan is widely recognized as both multiethnic and socio economically stratified Today as with most advanced capitalist countries serious social divides occasioned by the impacts of globalization and neoliberalism have destabilized Japanese society This book explores not only how Japanese society is diversified and unequal but also how diversity and inequality have caused people to divide into separate realities from which conflict and violence have emerged It empirically examines the current situation while considering the historical development of exclusionism from the interdisciplinary viewpoints of history policy studies cultural studies sociology and cultural anthropology In addition to analyzing the realities of division and exclusionism the authors propose theoretical alternatives to overcome such cultural and social divides

*Japanese Corrections* Elmer Hubert Johnson, 1996 Criminologist Johnson is one of the few westerners to have access to Japanese prisons His account pivots on the characteristics of the major elements how personnel carry out their responsibilities and why duties and activities are carried out in a particular way He explores cultural reasons for the low number of convicted criminals going to prison and attributes the low degree of prison violence to the industrial operations of adult prisons and the education vocational training and counseling in juvenile prisons Annotation copyright by Book News Inc Portland OR

**Criminalization and Prisoners in Japan** Elmer Hubert Johnson, 1997 In his second book to deal with Japanese corrections Elmer H Johnson explores the cultural heritage and structure of the criminal justice administration that underlies Japan's reluctance to use imprisonment which he first examined in *Japanese Corrections Managing Convicted Offenders in an Orderly Society* Here Johnson introduces the concept of criminalization its implications and its two versions that differentiate four of the six cohorts who have entered prison in increasing numbers in recent decades *yakuza* Japanese mafia adult traffic offenders women drug offenders and juvenile drug and traffic offenders Foreigners and elderly inmates the other two cohorts elude criminalization as groups but also have become prisoners in greater numbers for other reasons

*Disaffected Democracies* Susan J. Pharr, Robert D. Putnam, 2018-06-05 It is a notable irony that as democracy replaces other forms of governing throughout the world citizens of the most established and prosperous democracies the United States and Canada Western European nations and Japan increasingly report dissatisfaction and frustration with their governments Here some of the most influential political

scientists at work today examine why this is so in a volume unique in both its publication of original data and its conclusion that low public confidence in democratic leaders and institutions is a function of actual performance changing expectations and the role of information The culmination of research projects directed by Robert Putnam through the Trilateral Commission and the American Academy of Arts and Sciences these papers present new data that allow more direct comparisons across national borders and more detailed pictures of trends within countries than previously possible They show that citizen disaffection in the Trilateral democracies is not the result of frayed social fabric economic insecurity the end of the Cold War or public cynicism Rather the contributors conclude the trouble lies with governments and politics themselves The sources of the problem include governments diminished capacity to act in an interdependent world and a decline in institutional performance in combination with new public expectations and uses of information that have altered the criteria by which people judge their governments Although the authors diverge in approach ideological affinity and interpretation they adhere to a unified framework and confine themselves to the last quarter of the twentieth century This focus together with the wealth of original research results and the uniform strength of the individual chapters sets the volume above other efforts to address the important and increasingly international question of public dissatisfaction with democratic governance This book will have obvious appeal for a broad audience of political scientists politicians policy wonks and that still sizable group of politically minded citizens on both sides of the Atlantic and Pacific

**A Path Toward Gender Equality** Yoshie Kobayashi, 2004-04-23 The first study of state feminism in a non western nation state this volume focuses on the activities and roles of the Women s Bureau of the Ministry of Labor in post World War II Japan While state feminism theory possesses a strong capability to examine state society relationships in terms of feminist policymaking it tends to neglect a state s activity in improving women s status and rights in non western nations where the feminist movements are apathetic or antagonistic to the state and where the state also creates a vertical relationship with feminist groups
