Loss And Grief Psychological Management In Medical Practice:

Loss and Grief Bernard Schoenberg, 1970 *Hospice Education Program for Nurses: Participant manual*, 1981 **Grief and the Healing Arts** Sandra L. Bertman, 2018-02-06 For nearly three decades Sandra Bertman has been exploring the power of the arts and belief symbols metaphors stories to alleviate psychological and spiritual pain not only of patients grieving family members and affected communities but also of the nurses clergy and physicians who minister to them Her training sessions and clinical interventions are based on the premise that bringing out the creative potential inherent in each of us is just as relevant perhaps more so as psychiatric theory and treatment models since grief and loss are an integral part of life Thus this work was compiled to illuminate the many facets that link grief counseling and creativity The multiple strategies suggested in these essays will help practitioners enlarge their repertoire of hands on skills and foster introspection and empathy in readers **Living With Grief** Kenneth J. Doka, 2019-01-22 While we often discuss how we grieve rarely do we consider the places where we grieve Yet whether at work at school at worship or at home grief not only affects our moods and motivation but our ability to function and our relationships as well This book considers the ways that grief influences us in varied settings offering humane and practical suggestions to organizations such as workplaces schools or places of worship as to how they can assist grievers in their midst struggling with illness and loss First published in 1999 Routledge is an imprint of Taylor Francis an informa company *Military Chaplains' Review*, 1983 **Father Loss** Elyce Wakerman, 2015-11-03 As Elyce Wakerman found in the scores of interviews she conducted the loss of a father through death divorce or abandonment is the event that shapes a girl's life and all her future relationships In my fantasy one woman commented he remains the perfect all giving man a difficult role for any other man to fill Based partly on the author's experience partly on her in depth interviews and partly on a questionnaire she developed with psychologist Holly Barrett to which almost six hundred women responded Father Loss provides the clearest portrait yet of a very special group of women As a group they express their insecurities Sometimes I wonder if I'll ever be able to love a man totally because that would mean I didn't love my father anymore Leslie Yet individually many have become outstanding achievers including Eleanor Roosevelt He dominated my life as long as he lived and was the love of my life for years after he died Helen Gurney Brown People in business my bosses I look to them all as fathers Barbara Streisand Gloria Steinem Geraldine Ferraro and many others A bestseller when it was first published twenty five years ago and now updated and revised Father Loss gives information and insight to fatherless daughters to widows and divorcees with daughters and to every father who needs to understand the vital role he plays in his daughter's life as the first man she ever loves **On Children and Death** Elisabeth Kübler-Ross, 2011-07-26 On Children and Death is a major addition to the classic works of Elisabeth Kübler-Ross whose On Death and Dying and Living with Death and Dying have been continuing sources of strength and solace for tens of millions of devoted readers worldwide Based on a decade of working with dying children this compassionate book offers the families of

dead and dying children the help and hope they need to survive In warm simple language Dr K bler Ross speaks directly to the fears doubts anger confusion and anguish of parents confronting the terminal illness or sudden death of a child

Facing Death: Images, Insights, and Interventions Sandra L. Bertman,2016-01-08 Facing Death is a unique handbook for educators healthcare professionals and counselors It uses materials from the visual arts excerpts from poetry fiction drama and examples from popular culture to sensitize the reader to important universal issues confronting the dying and those responsible for their care

Dying and Death in 18th-21st Century Europe Corina Rotar,Marius Rotar,2014-03-17 This book features the second selection of the most representative papers presented at the international conference Dying and Death in 18th 21st Century Europe ABDD a traditional scientific event organized every year in Alba Iulia Romania The book invites the reader on a fascinating journey across the last three centuries of Europe using the concept of death as a guide The past and present realities of the complex phenomena of death and dying in Romania the United Kingdom Lithuania Serbia Macedonia Poland USA Germany Sweden Finland and Italy are dealt with by authors from varying backgrounds including historians sociologists psychologists priests humanists anthropologists and doctors This is proof that death as a topic cannot be confined to one science the deciphering of its meanings and of the shifts it effects requires a joint interdisciplinary effort

Psychology of Sport Injury Britton W. Brewer,Charles J. Redmond,2016-12-06 From a gymnast hiding ankle pain so she can compete to a basketball player who withdraws from friends after a season ending injury it can be argued that every sport injury affects or is affected in some way by psychological factors Given the widespread importance of psychological issues in sport injury it is important for those working with athletes injured or not to be aware of the latest developments on the subject Written by a sport psychology consultant and an athletic trainer Psychology of Sport Injury provides a thorough explanation of the elements and effects of sport injuries along with up to date research and insights for practical application The authors offer a contemporary approach to preventing treating rehabilitating and communicating professionally about sport injuries that takes into account physical psychological and social factors Psychology of Sport Injury presents sport injury within a broader context of public health and offers insights into the many areas in which psychology may affect athletes such as risk culture the many facets of pain athlete adherence to rehab regimens the relationship between psychological factors and clinical outcomes collaboration and referrals for additional support The book explores the relevant biological psychological and social factors that affect given circumstances The text consists of four parts Understanding and Preventing Sport Injuries Consequences of Sport Injury Rehabilitation of Sport Injury and Communication in Sport Injury Management Psychology of Sport Injury includes evidence based examples and demonstrates real world applications that sport health care professionals often face with athletes Additional pedagogical features include the following Focus on Research boxes provide the what and why of the latest research to complement the applied approach of the text Focus on Application boxes highlight practical examples to illustrate the material and maintain

student engagement Psychosocial content aligned with the latest educational competencies of the National Athletic Trainers Association NATA helps students prepare for athletic training examinations and supports professional development for practitioners A prevention to rehabilitation approach gives a framework for understanding sport injury including precursors to injury pain as a complex phenomenon adherence to rehabilitation and communication and management of injuries with other health care professionals as well as the athlete A set of chapter quizzes and a presentation package aid instructors in testing student comprehension and preparing lectures Psychology of Sport Injury is an educational tool reference text and springboard to new ideas for research and practice in any line of work exposed to sport injury Observing and committing to athletes especially during times of physical trauma and emotional distress which are often not separate times are critical skills for athletic trainers physical therapists sport psychologists coaches and others who work with athletes on a regular basis Individual Family & Community Phoebe A. Dauz-Williams, Arthur R. Williams, 2000 **Beyond Endurance** Ronald J. Knapp PhD, 2005-01-31 No event is as traumatic as the death of a child Dr Knapp has interviewed over 155 families who experienced such a loss to determine how they coped or failed to cope This book presents the results of his research shedding light on constructive measures for responding to the tragedy and calling attention to the special needs of surviving family members Dr Knapp examines three types of death death occurring after a long illness sudden or unexpected death and death by murder *Death, Dying, and Mysticism* T. Cattoi, C. Moreman, G. C. Harcourt, 2015-04-01 This volume offers a sample of reflections from scholars and practitioners on the theme of death and dying from scholars and practitioners ranging from the Christian tradition to Hinduism Lacanian psychoanalysis while also touching on the themes of the afterlife and near death experiences *Childhood Cancer* Adolf E. Christ, Kalman Flomenhaft, 2012-12-06 The past decade has brought extraordinary gains in the outlook for children stricken with cancer Though cancer remains a leading cause of death for children and young adults more victims of childhood cancer today will survive than will die The therapeutic advances and the optimism they instill have prompted researchers and clinicians to analyze the impact of cancer upon young patients and their families and to devise more effective intervention strategies Hope and survival juxtaposed with the continuing high mortality associated with certain forms of the illness add new challenges to management of the psychosocial aspects of cancer To respond to these challenges we need research as rigorous as that which continues to make inroads in treating the physical illness This specific concern for the needs of children suffering from cancer and their families has paralleled an increasing sensitivity on the part of the medical community and the public at large to the limitations of specialized high technology health care practices *A Comprehensive Bibliography of the Thanatology Literature* Martin L. Kutscher, 1975 *More Words on Aging, Supplement, 1971* United States. Aging Administration, 1971 **Behavioral Assessment and Rehabilitation of the Traumatically Brain-Damaged** Barry A. Edelstein, Eugene T. Couture, 2013-11-22 This book developed out of the editors longstanding interest in the retraining of traumatically brain damaged adults and the

management of their behavior by family members A search for relevant experimental evidence to support the clinical use of behavioral principles for retraining which began in 1977 turned up little empirical support Moreover the literature on retraining was dispersed among a variety of journals published in various countries Nowhere was there a compendium of literature that addressed issues of assessment and retraining There was no place to turn if one wanted to move from a standard neuropsychological evaluation to the retraining of skill deficits revealed in the evaluation We have attempted to edit a book that represents what we had hoped to find in the literature and could be used by professionals in clinical psychology clinical neuropsychology rehabilitation medicine physical therapy speech therapy and other disciplines that address rehabilitation of brain damaged adults a book that addresses assessment and rehabilitation issues and is sufficiently detailed to offer the reader a starting point in developing behavioral assessment and rehabilitation programs The book contains conceptual foundations reviews of research descriptions of successful rehabilitation programs and relatively detailed approaches to the retraining of specific skills A shift from an assessment based practice to one encompassing both prescriptive assessment and treatment has become a recognized transition in the neuropsychological literature and was best articulated in an article by Gerald Goldstein in March of 1979 *Health, Medicine, Society* M. Sokolowska, Jacek Holówka, A. Ostrowska, 2012-12-06 This volume contains a selection of papers presented at the International Conference on the Sociology of Medicine held between August 20th and 25th 1973 in Warsaw Jablonna The Conference was organized by the Institute of Philosophy and Sociology of the Polish Academy of Sciences in collaboration with the Research Committee on the Sociology of Medicine of the International Sociological Association The participants included medical sociologists from the United States and from the countries of Western and Eastern Europe including a delegation of general sociologists and physicians and also a group of young medical sociologists from Poland Dr Leo Kaprio Director of the Regional Office for Europe of the World Health Organization together with a member of his staff was also present The Conference was opened by the Deputy Minister of Health and Social Welfare of the Polish People's Republic Dr Ryszard Brzozowski The first Chairman was Prof Jan Szczepanski Vice President of the Polish Academy of Sciences and Director of the Institute of Philosophy and Sociology The first speech was delivered by Prof Jivko Oshavkov from Bulgaria then Vice Chairman of the International Sociological Association The Conference had several objectives which we believe were successfully achieved It was intended first to provide an occasion to bring participants of East and West together and give them a chance to exchange information on the state of medical sociology in different countries *Clinical Training in Serious Mental Illness*, 1990 Personality, Roles, and Social Behavior W. Ickes, E.S. Knowles, 2012-12-06 Personality and Roles Sources of Regularities in Social Behavior For behavioral scientists whether they identify primarily with the science of psychology or with that of sociology there may be no challenge greater than that of discovering regularities and consistencies in social behavior After all it is such regularities and consistencies that lend predictability to the behavior of individuals in social contexts in particular to those events that

constitute dyadic interactions and group processes In the search for behavioral consistencies two theoretical constructs have emerged as guiding principles personality and roles The theoretical construct of personality seeks to understand regularities and consistencies in social behavior in terms of relatively stable traits enduring dispositions and other propensities for example needs motives and attitudes that are thought to reside within individuals Because it focuses primarily on the features of individuals the construct of personality is fundamentally psychological in nature By contrast the theoretical construct of roles seeks to understand regularities and consistencies in social behavior in terms of the directive influence of coherent sets of rules and prescriptions that are provided by the interpersonal occupational and societal categories of which individuals are continuing members Because it focuses primarily on features of social structures the construct of roles is fundamentally sociological in nature
