Lost at the Frontier Deborah Shapley, Rustum Roy, 1985 *Science and Technology Policy* Takefumi Tanaka, 1992 **A History of Science Policy in the United States, 1940-1985**, 1986 **Expanding Underrepresented Minority Participation** Institute of Medicine, National Academy of Engineering, National Academy of Sciences, Policy and Global Affairs, Committee on Science, Engineering, and Public Policy, Committee on Underrepresented Groups and the Expansion of the Science and Engineering Workforce Pipeline, 2011-07-29 In order for the United States to maintain the global leadership and competitiveness in science and technology that are critical to achieving national goals we must invest in research encourage innovation and grow a strong and talented science and technology workforce *Expanding Underrepresented Minority Participation* explores the role of diversity in the science technology engineering and mathematics STEM workforce and its value in keeping America innovative and competitive According to the book the U S labor market is projected to grow faster in science and engineering than in any other sector in the coming years making minority participation in STEM education at all levels a national priority *Expanding Underrepresented Minority Participation* analyzes the rate of change and the challenges the nation currently faces in developing a strong and diverse workforce Although minorities are the fastest growing segment of the population they are underrepresented in the fields of science and engineering Historically there has been a strong connection between increasing educational attainment in the United States and the growth in and global leadership of the economy *Expanding Underrepresented Minority Participation* suggests that the federal government industry and post secondary institutions work collaboratively with K 12 schools and school systems to increase minority access to and demand for post secondary STEM education and technical training The book also identifies best practices and offers a comprehensive road map for increasing involvement of underrepresented minorities and improving the quality of their education It offers recommendations that focus on academic and social support institutional roles teacher preparation affordability and program development *Democratic Theory and Technological Society* Richard B. Day, Ronald Beiner, Joseph Masciulli, 2017-07-05 What are the chief challenges posed to contemporary democracy by modern technology and how can democratic theory best respond to or at least reflect on those challenges Inhabiting the kind of technologically advanced era in which we live what sources are available within political theory for theoretical insight concerning the problem of democratic engagement with technology The purpose of this volume is to canvas a broad range of theorists and theoretical traditions in order to address these questions including Hegel and Marx Rousseau and John Dewey Heidegger and Simone Weil Habermas and Walter Benjamin Hannah Arendt and Hans Jonas Commentaries on all these important thinkers focused on the issue of contemporary technology as posing unique social and political challenges for democratic political life yields rich and ambitious resources for theoretical reflection **Strategic Computing** Alex Roland, Philip Shiman, 2002 The story of the U S Department of Defense s extraordinary effort in the period from 1983 to 1993 to achieve machine

intelligence *NIST Special Publication* ,2000 **Recent Library Additions** ,1985 **NASA DoD aerospace knowledge diffusion research project. Report number 6, The relationship between the use of U.S. government technical reports by U.S. aerospace engineers and scientists and selected institutional and sociometric variables** ,1991 A study was undertaken that investigated the relationship between the use of U S government technical reports by U S aerospace engineers and scientists and selected institutional and sociometric variables Survey research is the methodology used for the study Data were collected by means of a self administered mail questionnaire The approximately 34 000 members of the American Institute of Aeronautics and Astronautics AIAA served as the study population The response rate for the survey was 70 percent A dependent relationship was found to exist between the use of U S government technical reports and three of the institutional variables academic preparation years of professional aerospace work experience and technical discipline The use of U S government technical reports was found to be independent of all of the sociometric variables The institutional variables best explain the use of U S government technical reports by U S aerospace engineers and scientists American Science Policy since World War II Bruce Smith,2011-02-01 Just after the close of World War II America s political and scientific leaders reached an informal consensus on how science could best serve the nation and how government might best support science The consensus lasted a generation before it broke under the pressures created by the Vietnam War Since then the nation has struggled to reestablish shared beliefs about the means and goals of science policy In American Science Policy Since World War II author Bruce L R Smith makes sense of the break between science and government and identifies the patterns on postwar science affairs He explains that what might otherwise seem to be a miscellaneous set of separate episodes actually constituted a continuing debate of national importance that was closely linked to broad political and economic trends Smith s precise and unique analysis gives both the scholar and historian a better understanding of where we are and how we got there while casting a modest light on future policy directions

Where Darwin Meets the Bible Larry Witham,2005 *Where Darwin Meets the Bible* provides an account of the lasting conflict between creationists and evolutionists *NASA Technical Memorandum* ,1991 Peerless Science Daryl E. Chubin,Edward J. Hackett,1990-07-05 This book examines the structure and operation of peer review as a family of quality control mechanisms and looks at the burdens placed on the various forms of peer review Assuming that peer review is central to the functioning of U S science policy Chubin and Hackett explore the symbolic and practical value of peer review in the making implementing and analysis of this policy **Living in the Labyrinth of Technology** Willem H. Vanderburg,2005-12-15 From the very beginnings of their existence human beings have distinguished themselves from other animals by not taking immediate experience for granted Everything was symbolized according to its meaning and value a fallen branch from a tree became a lever a tree trunk floating in the river became a canoe Homo logos created communities based on cultures humanity s first megaproject Further symbolization of the human community and its relation to nature led

to the possibility of creating societies and civilizations Everything changed as these interposed themselves between the group and nature Homo societas created ways of life able to give meaning direction and purpose to many groups by means of very different cultures humanity's second megaproject What Das Kapital did for the nineteenth century and La technique did for the twentieth Willem H Vanderburg's Living in the Labyrinth of Technology seeks to create for the twenty first century an attempt at understanding the world in a manner not shackled to overspecialized scientific knowing and technical doing Western civilization may well be creating humanity's third megaproject based not on symbolization for making sense of and living in the world but on highly specialized desymbolized knowing stripped of all peripheral understanding Vanderburg focuses on two interdependent forces in his narrative namely people changing technology and technology changing people The latter aspect although rarely considered turns out to be the more critical one for understanding the spectacular successes and failures of contemporary ways of life As technology continues to change the social and physical world the experiences of this world grow people's minds and society's cultures thereby re-creating human life in the image of technology Living in the Labyrinth of Technology argues that the twenty first century will be dominated by this pattern unless society intervenes on human as opposed to technical terms

A Final Story Nasser Zakariya, 2017-11-14 Popular science readers embrace epics the sweeping stories that claim to tell the history of all the universe from the cosmological to the biological to the social And the appeal is understandable in writing these works authors such as E O

Wilson or Steven Weinberg deliberately seek to move beyond particular disciplines to create a compelling story weaving together natural historical events scientific endeavor human discovery and contemporary existential concerns In A Final Story Nasser Zakariya delves into the origins and ambitions of these scientific epics from the nineteenth century to the present to see what they reveal about the relationship between storytelling integrated scientific knowledge and historical method While seeking to transcend the perspectives of their own eras the authors of the epics and the debates surrounding them are embedded in political and social struggles of their own times struggles to which the epics in turn respond In attempts to narrate an approach to a final true account these synthesizing efforts shape and orient scientific developments old and new By looking closely at the composition of science epics and the related genres developed along with them we are able to view the historical narrative of science as a form of knowledge itself one that discloses much about the development of our understanding of and relationship to science over time Frontiers Of Illusion Daniel Sarewitz, 2010-06-10 An incisive argument for fostering stronger links between the interests of society and progress in science
