Contesting Earth's History in Transatlantic Literary Culture, 1860-1935
Richard Fallon, 2025-02-14 By the mid nineteenth century geologists and palaeontologists had reconstructed an authoritative narrative of Earth s deep history from the planet s molten origins to the rise of humanity Many figures in transatlantic science across subsequent decades however had problems with this narrative it was too secular inhuman and evolutionary or controlled too exclusively by elite scientists Speaking from palaeoscience s unevenly professionalized and controversy racked borders Christian fundamentalists charismatic psychics and respected scholars alike voiced their objections Until now no study has brought their work together for detailed comparative analysis Spanning from the 1860s to the interwar decades *Contesting Earth s History* examines the fascinating stories of five significant examples of fringe or borderline palaeoscience old and young earth creationism hollow earth theory clairvoyant time travel and sunken continent catastrophism Innovatively combining methods from literary studies with the history of science this book attends not just to the conceptual content of these strange sciences but also to their proponents communication of truth claims through diverse genres ranging from the scientific textbook and the technical monograph to the lost world romance and the epic poem By paying close attention to the hitherto overlooked textual forms and literary strategies of these works of pseudoscience this volume throws into relief the variant conceptions of audience evidence and method that jostled and competed in wider scientific culture during this period It also demonstrates that for all their diversity authors of borderline palaeoscience shared the desire to shift the balance of power creating textual spaces where exclusive hierarchies of scientific expertise could be levelled away These conjurers of lost worlds often captivated wide audiences and many of their bizarre astonishing and iconoclastic ideas remain with us to this day Some even inspired early science fiction by the likes of H P Lovecraft and Edgar Rice Burroughs Hijacking geologists and palaeontologists longstanding effort at making the prehistoric past visible authors on the borderlines of palaeoscience

asserted their right to scientific authority and encouraged readers to gaze into time's abyss with bold new eyes

The Pazyryk Agenda Edward P. Rich, 2004-01-09 This is a policewoman's career on the streets of Chicago and one of its western suburbs about five years from now. A police procedural it is based on actual current regulations. In the world where Helen Bell worked each day any officer's opinions and decisions are shaped by larger inner values; no police department can instill. Each cop sees a slightly different version of every situation and each career has different turning points. Turning points can be fortunate or fatal for a career. An incident involving a shooting can be legally very complex. The shooter is not always responsible for his actions. In training a recruit a subject is shot and gravely injured. As the training officer did she order the recruit to fire. Or did the recruit in his fear and inexperience act on his own? The responsibility of the training officer would have to be court-tested. In their careers things police know or hear; the believed good will of their superiors is the factual information they rely on. Otherwise people and events outside their socially limited world can decide their actions. It was at this point and with these emotions that Helen Bell became exposed to **The Pazyryk Agenda**
