Yujin Nagasawa presents a new, stronger version of perfect being theism: the conception of God as the greatest possible being. Although perfect being theism is the most common form of monotheism in the Judeo-Christian-Islamic tradition, its truth has been disputed by philosophers and theologians for centuries. Nagasawa proposes a new, game-changing defence of perfect being theism by developing what he calls the maximal concept of God. Perfect being theists typically maintain that God is an omniscient, omnipotent, and omnibenevolent being. According to Nagasawa, God should be understood rather as a being that has the maximal consistent set of knowledge, power, and benevolence. Nagasawa argues that once we accept the maximal concept, we can establish perfect being theism on two grounds. First, we can refute nearly all existing arguments against perfect being theism simultaneously. Second, we can construct a novel, strengthened version of the modal ontological argument for perfect being theism. Nagasawa concludes that the maximal concept grants us a unified defence of perfect being theism that is highly effective and economical. This Is Philosophy Steven D. Hales, 2021-03-05. *THIS IS PHILOSOPHY*. The second edition of *This is Philosophy* improves upon an excellent first edition. This clear, succinct book is quite possibly the best introduction to Western philosophy on the market. Gregory Morgan, Stevens Institute of Technology: This is a terrific book. The writing is not only extremely clear, it is downright gripping, with relevant and detailed examples at every turn. Steven Hales has produced not just a great little introduction to philosophy; he has produced a great little book in philosophy period. Michael Lynch, University of Connecticut: Hales clearly explains important philosophical ideas with a minimum of jargon and without sacrificing depth of content, and he consistently gives a fair and accurate presentation of both sides of central philosophical disputes. Matthew Van Cleave, Teaching

[A Cosmological Reformulation of Anselm's Proof That God Exists](#) Richard Campbell, 2021-11-15 In this book Richard Campbell reformulates Anselm's proof to show that factual evidence confirmed by modern cosmology validly implies that God exists Anselm's proof which was never the ontological argument attributed to him emerges as engaging with current philosophical issues concerning existence and scientific explanation Because every observable thing has a beginning it can be deduced that there is always in reality something than which a greater cannot be thought which exists necessarily It follows that its non existence is inconceivable Anselm then proves that this is the God in whom he believes who alone so truly exists that He could not be thought not to exist The contingent nature of the universe is therefore a consequence of the proven belief that God is the Creator of everything else
