Reformulation and Acquisition of Linguistic Complexity Claire Martinot, Tomislava Bošnjak Botica, Sonia Gerolimich, Urszula Paprocka-Piotrowska, 2019-03-07 Reformulation and Acquisition of Linguistic Complexity proposes a new answer to the question of the appropriation or acquisition of a mother tongue a complex object one that is both stable and perpetually evolving This answer is based on the reformulating principle that children spontaneously apply a principle that is illustrated here with children retelling the same story These children are all 6 8 or 10 years old and speak French Italian Croatian or Polish as a first language This book demonstrates that the acquisition of any mother tongue is explained by the application of various reformulation procedures between source predications and reformulated predications These procedures are comparable from one language to another and different from one age group to another This book also studies certain complex phenomena at the lexical and syntactical levels and analyzes how children depending on their age treat these phenomena Finally we show that the acquisition of a mother tongue is a fundamentally linguistic activity

Method and Theory in Linguistics Paul L. Garvin, 2014-12-03 No detailed description available for Method and Theory in Linguistics **Dictionary of Scientific and Technical Terminology**, 2013-11-11 Scientific and technical contacts between nations have necessitated the publication of various language textbooks manuals and reference books Particularly important among them are multilingual scientific and technical dictionaries This English German French Dutch Russian Dictionary of Scientific and Technical Terms contains some 9000 entries The main feature of the Dictionary is that it includes first and foremost general scientific terms needed by an engineer working in any branch of science and technology Besides the Dictionary includes the basic terms used in physics mathematics the fundamentals of electrical engineering and chemistry and also the most essential terms pertaining to manufacturing processes machine design testing methods etc The Compilers were confronted with a difficult task as nowadays science and technology are developing rapidly and the minimum
