The Oxford Illustrated History of the Reformation Peter Marshall, 2015-01-22 The Reformation was a seismic event in history whose consequences are still working themselves out in Europe and across the world The protests against the marketing of indulgences staged by the German monk Martin Luther in 1517 belonged to a long standing pattern of calls for internal reform and renewal in the Christian Church But they rapidly took a radical and unexpected turn engulfing first Germany and then Europe as a whole in furious arguments about how God's will was to be saved However these debates did not remain confined to a narrow sphere of theology They came to reshape politics and international relations social cultural and artistic developments relations between the sexes and the patterns and performances of everyday life They were also the stimulus for Christianity's transformation into a truly global religion as agents of the Roman Catholic Church sought to compensate for losses in Europe with new conversions in Asia and the Americas Covering both Protestant and Catholic reform movements in Europe and across the wider world this beautifully illustrated volume tells the story of the Reformation from its immediate explosive beginnings through to its profound longer term consequences and legacy for the modern world The story is not one of an inevitable triumph of liberty over oppression enlightenment over ignorance Rather it tells how a multitude of rival groups and individuals with or without the support of political power strove after visions of reform And how in spite of themselves they laid the foundations for the plural and conflicted world we now inhabit

Reformations also belongs on the bookshelves of theological seminary students and anyone with a keen interest in the Reformation and its ongoing impact on faith and society *It All Depends on the Dose* Ole Peter Grell, Andrew Cunningham, Jon Arrizabalaga, 2018-05-11 This is the first volume to take a broad historical sweep of the close relation between medicines and poisons in the Western tradition and their interconnectedness They are like two ends of a spectrum for the same natural material can be medicine or poison depending on the dose and poisons can be transformed into medicines while medicines can turn out to be poisons The book looks at important moments in the history of the relationship between poisons and medicines in European history from Roman times with the Greek physician Galen through the Renaissance and the maverick physician Paracelsus to the present when poisons are actively being turned into beneficial medicines *We Are All Priests* Roger Whittall, 2023-12-11 In this book Roger Whittall argues that Luther's teaching on the common priesthood the priesthood of believers was a persistent element of Luther's ecclesiology and closely related to his understanding of the church as the communion of saints Whittall's focus is the common priesthood's activity in the Christian community moving beyond its contested relationship to the church's ordained ministry or the views that limit its appearance to Luther's early polemical writings Rather the common priesthood stands alongside the public ministry They are equal partners in the church's mandate to receive and speak God's word to respond in prayer praise and joyful service of God's world and all its people This wide ranging investigation features later material not often considered in relation to the common priesthood For Luther priesthood was a biblical expression of Christian spiritual life worship and service forming both the personal faith of individual Christians and the corporate nature of the Christian community Whittall also examines Luther's use of key biblical texts to link church and priesthood through the themes of unity and community equality and participation Understood in this way this priesthood still speaks powerfully to the identity and mission of the church today *Diversity in Gender and Visual Representation* Russell Luyt, Christina Welch, Rosemary Lobban, 2019-05-16 This book aims to encourage and develop understanding of the social category of gender the concept of visual representation and the relationship between the two with contributions stimulating discussion within and between disciplines research paradigms and methods By emphasising real world issues drawn from across the globe the book aims to contribute towards and inspire broader feminist activism Inviting readers to approach in an interdisciplinary spirit the contributions suspend assumptions and ask us to accept conceptual contradictions and tensions as they may arise aspiring to re-centre the concept of representation when considering the social category of gender within our dynamic and changing digital age This book will be of interest to academics students and practitioners from a range of disciplines with an interest in gender studies and in particular the visual representation of gender This book was originally published as a special issue of the Journal of Gender Studies *Lutheran Identity and Political Theology* Carl-Henric Grenholm, Göran Gunner, 2014-11-04 Lutheran tradition has in various ways influenced attitudes to work the economy the state education and health care One reason that Lutheran

theology has been interpreted in various ways is that it is always influenced by surrounding social and cultural contexts In a society where the church has lost a great deal of its cultural impact and authority and where there is a plurality of religious convictions the question of Lutheran identity has never been more urgent However this question is also raised in the Global South where Lutheran churches need to find their identity in a relationship with several other religions Here this relationship is developed from a minority perspective Is it possible to develop a Lutheran political theology that gives adequate contributions to issues concerning social and economic justice What is the role of women in church and society around the world Is it possible to interpret Lutheran theology in such a way that it includes liberating perspectives These are some of the questions and issues discussed in this book *Gender Issues in Ancient and Reformation Translations of Genesis 1-4* Helen Kraus, 2011-10-20 This study looks at the representation of gender issues in Genesis 1-4 in five influential translations from the Hebrew original Each chapter contains a textual analysis section that provides detailed and clearly structured analysis of specific verses
