**Worship Wars in Early Lutheranism** Joseph Herl,2008 How important was music to Martin Luther Drawing on hundreds of liturgical documents contemporary accounts of services books on church music and other sources Joseph Herl rewrites the history of music and congregational song in German Lutheran churches Herl traces the path of music and congregational song in the Lutheran church from the Reformation to 1800 to show how it acquired its reputation as the singing church In the centuries after its founding in a debate that was to have a strong impact on Johann Sebastian Bach and his contemporaries the Lutheran church was torn over a new style of church music that many found more entertaining than devotional By the end of the eighteenth century Lutherans were trying to hold their own against a new secularism and many members of the clergy favored wholesale revision or even abandonment of the historic liturgy in order to make worship more relevant in contemporary society Herl paints a vivid picture of these developments using as a backdrop the gradual transition from a choral to a congregational liturgy The author eschews the usual analyses of musical repertoire and deals instead with events people and ideas drawing readers inside the story and helping them sense what it must have been like to attend a Lutheran church in the sixteenth through eighteenth centuries Parallel developments in Catholic churches are discussed as are the rise of organ accompaniment of hymns and questions of musical performance practice Although written with academic precision the writing is clear and comprehensible to the nonspecialist and entertaining anecdotes abound Appendixes include translations of several important historical documents and a set of tables outlining the Lutheran mass as presented in 172 different liturgical orders The bibliography includes 400 Lutheran church orders and reports of ecclesiastical visitations read by the author      *Church and Worship Music in the United States* James Michael Floyd,Avery

Walter J. Palmer,2016-02-11 While international negotiations to reduce greenhouse gas GHG emissions have been less than satisfactory there is a presumption that a significant level of multi lateral commitment will be realized at some point International air and marine travel have been left to one side in past talks because the pursuit of agreement proceeds on the basis of commitment by sovereign nations and the effects of these specific commercial activities are by their nature difficult to corral and assign to specific national jurisdictions However air travel is increasing and unless something is done emissions from this segment of our world economy will form a progressively larger percentage of the total especially as emissions fall in other activities This book focuses on fuel The aim is to provide background in technical and policy terms from the broadest reliable sources of information available for the necessary discourse on society s reaction to the evolving aviation emissions profile It considers what policy has been why and how commercial air travel is committed to its current liquid fuel how that fuel can be made without using fossil source materials and the barriers to change It also advances some elements of policy remedies that make sense in providing an environmentally and economically sound way forward in a context that comprehends a more complete vision of sustainability than renewable fuels traditionally have The goal of *Will Sustainability Fly* is to broaden and contextualize the knowledge resource available to academics policy makers air industry leaders and stakeholders and interested members of the public
