Intellectual Property Management Klaus Jennewein,2006-03-30 Innovation is a source of competitive advantage In other words firms may leverage innovation to generate rents at least temporarily And this is intended to be a self sustained business model part of the rent extracted from the market may be re invested into new technological developments which in turn permit additional innovations thus regenerating the sources of rents This is the positive loop of innovation In this sense business would be a permanent hunt for innovations in search of rents Yet innovations need to be protected if firms want to benefit from rents over long periods of time However the strategic management literature tends to suggests that patents are a weak protection against aggressive imitators Secrecy may help but we also know that technology ends up leaking in most cases Speed in new developments to cut time to market may be another way of protecting the technological advance of the firm But again this may not be enough as start ups may out compete the established firm in the race for innovation This is where Dr Klaus Jennewein s key idea comes into the picture The core of his thesis is that brand equity may be combined to technological protections such as patents to build a multi layer complex intricate shield to protect the sources of rents against competitors and imitators

que renferme ce nouvel ordre mondial. Parmi les conséquences les plus drastiques on s'attachera à montrer qu'à travers l'encartement de nos pratiques quotidiennes s'opère un lent délitement de la réciprocité du change. Le paiement se faisant de manière difficile et comme indolore l'ancien schéma constitutif de nos pratiques sociales est sur le point d'être remplacé par d'autres procédures caractéristiques techniques n'engageant plus notre réflexivité mais une simple posture réactive.
