Jellinger, F. Seitelberger, 2013-06-29 More than 150 years have passed since involvement of the nervous system in leukemia was first reported by BURNS while the possibility of the primary brain tumor derived from the lymphoreticular tissue was recognized much later BAILEY in 1929 described such neoplasms under the term perithelial sarcoma Later these tumors of the nervous system have been variously designated as Perivascular of perithelial sarcomas reticulum cell sarcomas or microgliomas as controversy has evolved and still exists on the definition of this group of neoplasms and on the nature of their cells of origin Much of the unfortunate confusion concerning the neoplastic lesions attributed to microglia and other derivations of the RE system arose because their close relationship to extra neural cells has been ignored On the other hand communication in the field of malignant lymphomas has become increasingly difficult because of the termino logic maze and conceptual diversities of traditional morphological classifications that have limited valid comparisons Although at present we are still far from a precise recognition of the basic features of lymphoproliferative processes and from a fairly general agreement on the terminology of non Hodgkin lymphomas there is encouraging evidence recently of some enlightment on the nature of tumor cells that provides the basis for a reasonable and generally acceptable lymphoma classification **Aggressive Lymphomas** Georg Lenz, Gilles Salles, 2018-12-27 This book summarizes current knowledge of the biology and molecular pathogenesis of aggressive lymphomas and reviews the state of the art in diagnostic and therapeutic strategies. The aim is both to provide the reader with a sound understanding of the very significant progress that has been achieved in the understanding and management of these malignancies over recent years and to facilitate appropriate choice of the therapeutic strategy in individual cases The assessment of different prognostic parameters are clearly presented in order to permits effective risk stratification that impacts on treatment choice Recent insights into lymphomagenesis are exemplified and may assist in identifying emerging therapeutic targets The comprehensive and up to date nature of the book will make it an ideal reference for all physicians and researchers interested in lymphoma including clinicians from various medical specialties biologists pathologists radiologists and nuclear medicine specialist as well as students Non-Hodgkin's Lymphoma in Childhood and Adolescence Oussama Abla, Andishe Attarbaschi, 2019-04-09 This text provides a state of the art overview on Non Hodgkin's lymphoma NHL in children and adolescents The volume is divided into seven sections each of which focuses on a critical component of pediatric NHL including history and epidemiology pathology and molecular biology disease evaluation and response common and rare sub types of NHL and current and novel treatment strategies.
