CIPS Session '78 ,1978 Proceedings ,1978 **Turing's Legacy** David M. Yates,1997 During the second half of the twentieth century the use of computers has transformed working life in the developed world The National Physical Laboratory NPL is one of the cradles of this revolution This book outlines its contribution to modern computing history covering the vital role played by Alan Turing the Pilot ACE and ACE computers developed from his plans and the fertile marriage of computers and communications in the 1960s *Fachtagung "Cognitive Verfahren und Systeme," Hamburg, 11.-13. April 1973* Theodor Einsele,Wolfgang Giloi,H. H. Nagel,1973 **International machine tool design research conference. Sixte** ,1976 Bibliographie zu Verfahren der multivariaten Statistik, der mehrdimensionalen Klassifikation und ihre Anwendungen in Natur- und Gesellschaftswissenschaften, 1901-1975 Jürgen Wilke,1978 **Transactions of the SPWLA ... Annual Logging Symposium** ,1984 *Pattern Recognition Theory and Application* King Sun Fu,A.B. Whinston,1977-12-31 Research in the field of pattern recognition both in theoretical terms and in the area of application continues to flourish Pattern recognition is a fairly diverse field involving researchers whose primary disciplines spread over at least a half dozen fields Possibly because of the great diversity of backgrounds but a common interest in certain broad areas of application the field has grown so rapidly and yet seems to promise at least a similar growth rate for the future This book is a collection containing some of the papers that were presented at the NATO Advanced Study Institute held in Bandol France September 1975 The main purpose of the institute was to present material which would provide a basic background in the field Thus survey papers covering syntactic methods picture processing classification theory and speech recognition were presented This should have provided the listener and we hope now the reader with an acquaintance with the basic tools a look at some of the applications and an appraisal of how each of the particular topics will evolve A more recent addition to the pattern recognition family is the work in the areas of economics and group choice Since the process of recognizing and interpreting patterns is so fundamental it probably is no surprise when a particular discipline is discovered to be amenable to the already developed techniques Second International Joint Conference on Pattern Recognition, August 13-15, 1974 ,1974 *Digital Image Processing* Gregory A. Baxes,1984 The scope of this book is broad providing coverage on the introductory topics associated with digital image processing Whether used in the lab as a practical and visual support to a standard college level text or as a primer for the uninitiated this book is intended to provide a fundamental resource **Conference on Software for Control** Institution of Electrical Engineers.
