*Machine Politics in Transition* Thomas M. Guterbock, 1980-03-01 Since 1932 elections and decision making in Chicago have been dominated by the Regular Democratic Organization of Cook County led for a quarter of a century by the late Mayor Richard J Daley The extraordinary longevity of this Democratic machine provides the basis for this penetrating investigation into the nature of machine politics and grassroots party organization For three years Thomas M Guterbock participated in the daily activities of the Regular Democratic Organization in one North Side Chicago ward in order to discover how political machines win the support of the urban electorate Guterbock's participant observation data supplemented by a sample survey of ward residents attitudes toward and contacts with the machine provide convincing evidence that the most widely accepted notions of how political machines work are no longer correct Contrary to conventional wisdom about the machine Guterbock finds that the party does not secure votes by doing favors for people nor do services rendered determine actual voting behavior Instead party loyalty is governed by such factors as social status educational achievement and bureaucratic competence Guterbock finds that Democratic loyalists are drawn disproportionately from the ward's lowest strata Ironically the characteristics of these loyal Democrats contrast sharply with the characteristics of those most likely to use party services What keeps the machine going then To answer this question Guterbock takes us behind the scenes for a unique look inside the ward club He shows how members develop loyalty and motivation beyond concern for their own pocketbooks And he analyzes the public involvement of machine politicians in neighborhood affairs describing the skillful sometimes devious ways in which they appeal to their constituents sense of community By focusing on the interplay of party loyalty and community attachments Guterbock is able to explain the continued hegemony of Chicago's political machine and its enduring image of legitimacy

**Electoral Politics and Africa's Urban Transition** Noah L. Nathan, 2019-02-28 Two aspects of contemporary urban life in Africa are often described as sources of political change the emergence of a large urban middle class and high levels of ethnic diversity and inter ethnic social contact Many expected that these factors would help spark a transition away from ethnic competition and clientelism toward more programmatic elections Focusing on urban Ghana this book shows that the growing middle class and high levels of ethnic diversity are not having the anticipated political effects Instead urban Ghana is stuck in a trap clientelism and ethnic voting persist in many urban neighborhoods despite changes to the socio economic characteristics and policy preferences of voters Through a unique examination of intra urban variation in patterns of electoral competition Nathan explains why this trap exists demonstrates its effects on political behavior and explores how new democracies like Ghana can move past it

**Migrants and Machine Politics** Adam Michael Auerbach, Tariq Thachil, 2023-01-03 How poor migrants shape city politics during urbanization As the Global South rapidly urbanizes millions of people have migrated from the countryside to urban slums which now house one billion people worldwide The transformative potential of urbanization hinges on whether and how poor migrants are integrated into city politics Popular and scholarly accounts paint migrant slums as exhausted by dispossession subdued by local dons bought off by wily politicians or polarized by ethnic appeals Migrants and Machine Politics shows how slum residents in India routinely defy such portrayals actively constructing and wielding political machine networks to demand important albeit imperfect representation and responsiveness within the country's expanding cities Drawing on years of pioneering fieldwork in India's slums including ethnographic observation interviews surveys and experiments Adam Michael Auerbach and Tariq Thachil reveal how migrants harness forces of political competition as residents voters community leaders and party workers to sow unexpected seeds of accountability within city politics This multifaceted agency provokes new questions about how political networks form during urbanization In answering these questions this book overturns longstanding assumptions about how political machines exploit the urban poor to stifle competition foster ethnic favoritism and entrench vote buying By documenting how poor migrants actively shape urban politics in counterintuitive ways Migrants and Machine Politics sheds new light on the political consequences of urbanization across India and the Global South

**Rescaling Sustainability Transitions** Maija Halonen,Moritz Albrecht,Irene Kuhmonen,2024-10-28 This Open Access book explores sustainability transitions with a focus on their influence on the relationships between cores and peripheries the rural and the urban and the large and the small scale The societal changes induced by sustainability transitions are expected to assemble as a variegated and heterogeneous process reproduced by different spatial contexts and scales Hence the practical solutions and impacts of processes framed as sustainability transitions are expected to vary between different localities in terms of their natural material or human resources the heritage of the development their power and market relations virtual and physical connections as well as shifting individual rationalities within and across certain socio economic spaces To highlight these socio spatial processes their alignments frictions and contradictions for sustainability transitions this book and its contributions call for an increased engagement in the scalar aspects of sustainability transitions and their governance The

authors argue that rescaling follows from two observations on the extant literature concerning sustainability transitions Firstly there is a call for a stronger engagement of sustainability transitions research with questions of place and relocalization practices their embedded power relations but also questions on small scale trajectories for the territorial and economic materializations in terms of production and market reach as an alternative to the large scale dominance of resource exploitation and use Secondly there is a call for increased attention to the relational processes and ontological framing that reproduce mobilities and scalar shifts in governance arrangements

*Understanding Ukrainian Politics: Power, Politics, and Institutional Design* Paul D'Anieri, 2015-01-28 Ukraine made headlines around the world during the winter of 2004/05 as the colorful banners of the Orange Revolution unfurled against the snowy backdrop of Kyiv signaling the bright promise of democratic rebirth But is that what is really happening in Ukraine In the early post Soviet period Ukraine appeared to be firmly on the path to democracy The peaceful transfer of power from Leonid Kravchuk to Leonid Kuchma in the election of 1994 followed by the adoption of a western style democratic constitution in 1996 seemed to complete the picture But the Kuchma presidency was soon clouded by dark rumors of corruption and even political murder and by 2004 the country was in full blown political crisis A three stage presidential contest was ultimately won by Viktor Yushchenko who took office in 2005 and appointed Yulia Tymoshenko as premier but the turmoil was far from over The new government quickly faltered and splintered This introduction to Ukrainian politics looks beyond these dramatic events and compelling personalities to identify the actual play of power in Ukraine and the operation of its political system The author seeks to explain how it is that after each new beginning power politics has trumped democratic institution building in Ukraine as in so many other post Soviet states What is really at work here and how can Ukraine break the cycle of hope and disillusionment

tourism systems after crisis events such as wars and the competitiveness of ski areas in light of climate change Overall the book offers a thoughtful study of the role of geographical and temporal scales for tourism during periods of unprecedented transition equipping readers with new ways of conceptualizing change and adaptation      **Transitions in American Education** Donald Parkerson, Jo Ann Pakerson, 2014-03-05 This book is a concise social history of teaching from the colonial period to the present By revealing the words of teachers themselves it brings their stories to life Synthesizing decades of research on teaching it places important topics such as discipline in the classroom technology and cultural diversity within historical perspective      American Apartheid Douglas S.
