Trade Secrets Law Society of Upper Canada, 1990

The Law and Theory of Trade Secrecy Rochelle C. Dreyfuss, Katherine J. Strandburg, 2011 This timely Handbook marks a major shift in innovation studies moving the focus of attention from the standard intellectual property regimes of copyright patent and trademark to an exploration of trade secrecy and the laws governing know how tacit knowledge and confidential relationships The editors introduce the long tradition of trade secrecy protection and its emerging importance as a focus of scholarly inquiry The book then presents theoretical doctrinal and comparative considerations of the foundations of trade secrecy before moving on to study the impact of trade secrecy regimes on innovation and on other social values Coverage includes topics such as sharing norms expressive interests culture politics competition health and the environment This important Handbook offers the first modern exploration of trade secrecy law and will strongly appeal to intellectual property academics and to students and lawyers practicing in the intellectual property area Professors in competition law constitutional law and environmental law will also find much to interest them in this book as will innovation theorists

Legal Secrets Kim Lane Scheppele, 1988 Does the seller of a house have to tell the buyer that the water is turned off twelve hours a day Does the buyer of a great quantity of tobacco have to inform the seller that the military blockade of the local port which had depressed tobacco sales and lowered prices is about to end Courts say yes in the first case no in the second How can we understand the difference in judgments And what does it

say about whether the psychiatrist should disclose to his patient's girlfriend that the patient wants to kill her Kim Lane Scheppelle answers the question Which secrets are legal secrets and what makes them so She challenges the economic theory of law which argues that judges decide cases in ways that maximize efficiency and she shows that judges use equality as an important principle in their decisions In the course of thinking about secrets Scheppelle also explores broader questions about judicial reasoning how judges find meaning in legal texts and how they infuse every fact summary with the values of their legal culture Finally the specific insights about secrecy are shown to be consistent with a general moral theory of law that indicates what the content of law should be if the law is to be legitimate a theory that sees legal justification as the opportunity to attract consent This is more than a book about secrets It is also a book about the limits of an economic view of law Ultimately it is a work in constructive legal theory one that draws on moral philosophy sociology economics and political theory to develop a new view of legal interpretation and legal morality

Manufacturing and Transportation Jessica Cohn, 2007 A four year degree is not always necessary for students looking to pursue a career in manufacturing and transportation This title covers many popular careers in the Manufacturing and Transportation field for students with an associate's degree comparable certification and work life experience
