Lessons Learned From The Use Of The Machine Gun During The Russo-Japanese War LCDR Daniel J. Kenda, 2014-08-15 Dr Richard Gatling invented the world's first practical machine gun in 1862 Between that weapon and subsequent improved designs the world's armies had roughly 50 years to adopt the machine gun and perfect its employment before it helped wreak the carnage of World War I However for some reason or combination of reasons none of the armies of the day saw fit to do so This thesis explores the potential explanations behind this phenomenon by using the Russo Japanese War as a case study The Russo Japanese War should have demonstrated to the world how the machine gun fundamentally altered the conduct of land warfare especially since the major world powers all sent military observers to report on the war's events This thesis will show however that because of a complex combination of the prevalent military tactical culture bureaucratic pragmatism and logistical concerns the five major protagonist armies of World War I generally failed to apply the lessons they learned about machine gun employment from the Russo Japanese War and as a result were completely surprised by the weapon's impact on the battlefield ten years later *Practical Guide to the Operational Use of the PK/PKM Machine Gun* Erik Lawrence, 2015-03-13 The most current up to date full color manual anywhere on the PKM Machine Gun system Authored by Erik Lawrence former Special Forces Instructor and owner of one of the most realistic and experienced training companies in the US 108 pages of great to know information with procedures that have been vetted over time 100 color pictures to better explain the listed procedures Developed for weapons familiarization classes and instructor development the best Team Room reference library available The objective of this manual is to allow the reader to be able to use the PKM Machine Gun system safely and competently The practical guide will give the reader background specifications of the weapon and its capability Multiple descriptive photographs instructions on its operation disassembly and assembly

Hotchkiss Machine Guns John Walter, 2019-11-28 Created by a long forgotten Austrian nobleman Adolf Odkolek von Auges the air cooled Hotchkiss machine gun was the first to function effectively by tapping propellant gas from the bore as the gun fired Although the Hotchkiss would be overshadowed by the water cooled Maxim and Vickers Guns it proved its effectiveness during the Russo Japanese War The gun quirky though it was was successful enough to persuade Laurence Ben t and Henri Merci to develop the Mod le Portative a man portable version which it was hoped could move with infantrymen as they advanced Later mounted on tanks and aircraft it became the first automatic weapon to obtain a kill in aerial combat Though it served the French and US armies during World War I and also the British in areas where French and British units fought alongside each other the Odkolek Hotchkiss system was to have its longest term effect in Japan Here a succession of derivatives found favour in theatres of operations in which water cooling could be more of a liability than an asset When US forces landed on Saipan Guam and Iwo Jima battling their way from island to island across the Pacific it was the Woodpecker the Type 92 Hotchkiss with its characteristically slow rate of fire which cut swathes through their ranks Supported by contemporary photographs and full colour illustrations this title explores the exciting and eventful history of the first successful gas operated machine gun
