Hot Talk, Cold Science S. Fred Singer,David R. Legates,Anthony R.

Lupo,2021-01-18 The revised and expanded third edition of Hot Talk Cold Science forms the capstone of the distinguished astrophysicist Dr S Fred Singer s lucid yet hard scientific look at climate change And the book is no less explosive than its predecessors and certainly never more timely Singer explores the inaccuracies in historical climate data and the failures of climate models as well as the impact of solar variability clouds ocean currents and sea levels on global climate plus factors that could mitigate any human impact on world climate Singer s masterful analysis decisively shows that the pessimistic and often alarming global warming scenarios depicted in the media have no scientific basis In fact he finds that many aspects of increased levels of CO2 as well as any modest warming such as a longer growing seasons for food and a reduced need to use fossil fuels for heating would have a highly positive impact on the human race As alarmists clamor to impose draconian government restrictions on entire populations in order to combat climate change this book reveals some other startling stubborn contradictory facts including CO2 has not caused temperatures or sea levels to rise beyond historical rates Severe storms have not increased in frequency or intensity since 1970 neither have heat waves nor droughts Global climate change is not harming coral reefs Any increases in CO2 concentrations across huge time spans haven t preceded rising global temperatures they ve followed them by about 600 to 800 years just the opposite of alarmist claims Carbon taxes and other solutions to the global warming crisis would have severe consequences for economically disadvantaged groups and nations Alarmist climate scientists have hidden their raw temperature data and deleted emails then undermined the peer review system to squelch debate In sum despite all the hot talk and outright duplicity there is no climate crisis resulting from human activities and no such threat on the horizon
