Cornelius, 2012-12-06 Crying is a typical human expression of emotion Surprisingly until now little scientific attention has been devoted to this phenomenon Many textbooks on emotion fail to pay attention to it and in scientific journals there are hardly any contributions focusing on this behavior In contrast there is much interest from the lay public allowing pseudo scientists to formulate theories that have little or no scientific basis Is there any evidence in support of statements that crying is healthy or that not crying may result in toxification How do people react to the crying of others Is crying important for the diagnosis of depression and if so how This book aims to fill this gap in scientific literature Crying is discussed from several perspectives and specific attention is given to methodological issues and assessment Each chapter provides a review and a summary of the relevant scientific literature **GameAxis Unwired**, 2005-11 GameAxis Unwired is a magazine

Why Only Humans Weep Ad Vingerhoets, 2013-02-28

Crying has fascinated mankind for millenia Since ancient times we have known that emotional tears are a unique human characteristic Unsurprisingly over hundreds of years scholars from different backgrounds have speculated about the origin and functions of human tears According to Charles Darwin tears fulfilled no adaptive function And yet this seems in sharp contrast to statements in the popular media about the significance of crying Crying is thought to bring relief and is considered healthy and withholding tears unhealthy In addition tears have been said to inhibit aggression in assaulters and to promote social bonding Perhaps that could explain why tears have been so important in our evolution Ad Vingerhoets is one of the few scientists in the world to have studied crying He examines in *Why only humans weep* which claims about crying are scientifically tenable which are fact and which are fiction Though a psychologist he doesn't just restrict himself to the current psychological literature but also explores work in evolutionary biology neurosciences theology art history and anthropology to provide an integrated perspective on this complex phenomenon Written throughout in an academically accessible style this book is groundbreaking in contributing to a modern scientific understanding of crying It will have broad appeal to psychologists psychiatrists philosophers biologists and anthropologists

Root, 1991 A survey of the composing processes of seven working writers columnist essayists Jim Fitzgerald and Kathleen Stocking political columnists Tom Wicker and Richard Reeves drama critic Walter Kerr and film critics David Denby and Neal Gabler Working at Writing offers rich and unique insights into how writing is actually done The book has three interlocking elements edited transcripts of interviews with the writers about their composing processes and the composition of specific works copies of the works discussed in the transcripts and a series of chapters that analyze the interviews and articles in the context of current research into composing Through this unusual structure Root investigates both the ways in which the working practices of the seven writers relate to one another and to current models of composing and the ways in which such a discussion will be of value to others particularly to student writers and their teachers By considering the comments of practicing writers and the examples of their compositions and by comparing the evidence of research findings with those examples of practical experience Root gives student writers and their teachers as well the opportunity to better understand the paradigms that govern their own composing and to confirm modify abandon or replace them The final chapter discusses the implications of these professionals' experience for those who hope to become working writers Stressing the importance of assiduous stringsaving immersion in context regular composition the rhetorical situation and the writer's understanding of his or her own process Root suggests both what separates the novice from the expert and how novices can apply the insights of this book as they work at their own writing *Charming the Prince* Teresa

A.S. King,2024-10-08 A new edition of Michael L Printz Award winner A S King s brilliant and bizarre story of teenage trauma and standardized tests Kurt Vonnegut might have written a book like this New York Times Book Review Four accomplished teenagers are on the verge of explosion The anxieties they face at every turn have nearly pushed them to the point of surrender senseless high stakes testing the lingering damage of trauma the buried grief and guilt of tragic loss They are desperate to cope but no one is listening So they will lie They will split in two They will turn inside out They will build an invisible helicopter to fly themselves far away from the pressure but nothing releases the pressure Because as they discover the only way to truly escape their world is to fly right into it A S King reaches new heights in this groundbreaking work of surrealist fiction it will mesmerize readers with its deeply affecting exploration of how we crawl through traumatic experience and find the way out
