The Impact of Legislatures Philip Norton, 2020-09-10 The Impact of Legislatures brings together key articles and path breaking scholarship published in The Journal of Legislative Studies during its first 25 years of publication enabling the reader to make sense of the impact of legislatures in the modern world Encompassing theory comparative analysis and county based empirical studies the volume examines the impact of legislatures as the key representative institutions of nations addressing their relationships both to government and to the people Legislatures are ubiquitous They provide legitimacy to measures of public policy and to government As such they are key to how a nation is governed But they do much more than confer legitimacy They are generally multi functional and functionally adaptable bodies and are an essential link between citizen and government However scholarship on them has not been extensive and has often been descriptive and country specific limiting the capacity to make sense of them as a particular species of institution The chapters in this volume reflect scholarship that helps the reader appreciate the significance of the place and consequences of legislatures examining not only the relationship between the legislature and the executive but also the oft neglected relationship between legislatures and the people Reflecting the growing body of research in the field of legislative studies carried by The Journal of Legislative Studies since its inception in 1995 The Impact of Legislatures is essential reading for anyone wishing to understand the impact of legislatures in the world today

Historical Dictionary of Democracy
Norman Abjorensen, 2019-06-15 Democracy is easy to talk about but hard to define in other than broad generalizations its history is a long complex and contested subject What this volume seeks to do is to explore the general evolution of political and social thinking that would eventually coalesce into what we now know as democracy for all its imperfections and shortcomings The question of just why some societies evolved into a democratic trajectory and others did not continues to engage the interest of historians political scientists sociologists and anthropologists Much conjecture surrounds the rise of certain elements we now recognize if not as democratic then proto democratic such as collective decision making constraints on the exercise of power and a degree of accountability of the ruler to the ruled If democracy in the sense of rule by the people has two essential qualities rule by the majority and the equal treatment of free citizens then its origins however feeble are to be found in these early examples of government *Historical Dictionary of Democracy* contains a chronology an introduction a glossary and an extensive bibliography The dictionary section has over 600 cross referenced entries This book is an excellent resource for students researchers and anyone wanting to know more about democracy

Saxonhouse,2005-12-19 This book illuminates the distinctive character of our modern understanding of the basis and value of free speech by contrasting it with the very different form of free speech that was practised by the ancient Athenians in their democratic regime Free speech in the ancient democracy was not a protected right but an expression of the freedom from hierarchy awe reverence and shame It was thus an essential ingredient of the egalitarianism of that regime That freedom was challenged by the consequences of the rejection of shame *aidos* which had served as a cohesive force within the polity Through readings of Socrates's trial Greek tragedy and comedy Thucydides's History and Plato's Protagoras this volume explores the paradoxical connections between free speech democracy shame and Socratic philosophy and Thucydidean history as practices of uncovering **Special Bibliography Series** ,1957 **Theorising Democide** M. Chou,2013-04-23 Beginning with the premise that democracies are often deeply implicated in their own downfall The Theory of Democide challenges the conventional view of how and why democracies collapse by demonstrating that democratic collapse is often a direct result of the inherent logic of democracy itself *Embattled* Emily Katz Anhalt,2021-09-14 An incisive exploration of the way Greek myths empower us to defeat tyranny As tyrannical passions increasingly plague twenty first century politics tales told in ancient Greek epics and tragedies provide a vital antidote Democracy as a concept did not exist until the Greeks coined the term and tried the experiment but the idea can be traced to stories that the ancient Greeks told and retold From the eighth through the fifth centuries BCE Homeric epics and Athenian tragedies exposed the tyrannical potential of individuals and groups large and small These stories identified abuses of power as self defeating They initiated and fostered a movement away from despotism and toward broader forms of political participation Following her highly praised book *Enraged Why Violent Times Need Ancient Greek Myths* the classicist Emily Katz Anhalt retells tales from key ancient Greek texts and proceeds to interpret the important message they hold for us today As she reveals Homer's Iliad and Odyssey Aeschylus's Oresteia and Sophocles's Antigone encourage us as they encouraged the ancient Greeks to take responsibility for our own choices and their consequences These stories emphasize the responsibilities that come with power any power whether derived from birth wealth personal talents or numerical advantage reminding us that the powerful and the powerless alike have obligations to each other They assist us in restraining destructive passions and balancing tribal

allegiances with civic responsibilities They empower us to resist the tyrannical impulses not only of others but also in ourselves In an era of political polarization Embattled demonstrates that if we seek to eradicate tyranny in all its toxic forms ancient Greek epics and tragedies can point the way

Fighting for Political Freedom Terence C. Halliday, Lucien Karpik, Malcolm Feeley, 2007-12-20 Across the world political liberalism is being fought for consolidated and defended That is the case for nations that have never enjoyed a liberal political society for nations that have advanced towards and then retreated from political liberalism for nations that have recently shifted from authoritarian to liberal political systems and for mature democracies facing terrorism and domestic conflict This book tests for the contemporary world the proposition that lawyers are active agents in the construction of liberal political regimes It examines the efficacy of a framework that postulates that legal professions not only orient themselves to a market for their services but can frequently be seen in the forefront of actors seeking to institutionalise political liberalism On the basis of some 16 case studies from across the world the authors present a theoretical link between lawyers and political liberalism having wide ranging application over radically diverse situations in Asia and the Middle East North and South America and Europe They argue that it is not the politics of lawyers alone but the politics of a legal complex of legally trained occupations centred on lawyers and judges that drives advances or retreats from political liberalism that political liberalism itself is everywhere in play in countries with established democracies and those without liberal politics and that it is now clear that the legal arena is a central field of struggle over the shape of political power The case studies presented here provide powerful evidence that the nexus of bar and bench in transitions towards or away from political liberalism is a force which has universal application

Annuario della Scuola Archeologica di Atene e delle Missioni Italiane in Oriente, Supplemento 13. Athens and Attica from the Late Bronze Age to the end of the Archaic period. The spatial roots of politics and society Alain Duploux, Nikolaos Arvanitis, 2024-12-27 This volume contains the proceedings of the international conference Attica from the Late Bronze Age to the End of the Archaic Period The Spatial Roots of Politics and Society organised by the Italian Archaeological School at Athens and the University Paris 1 Panth on Sorbonne on 10 and 11 June 2021 The venue was originally scheduled for 13 and 14 March 2020 in Athens but the event fell victim to the global COVID19 crisis and was eventually reorganised as an online conference in June 2021 The conference was organised in connection with the research project Lands of Meaning A GIS Study of Space and Social Praxis in Ancient Attica from the Mycenaean Age to the Birth of Democracy 1200-480 BC which was carried out as a Marie Skłodowska Curie Action MSCA between 2017 and 2019 at the University Paris 1 Panth on Sorbonne The Lands of Meaning project aimed to re-examine the

Athenian territory from the end of the Bronze Age to the beginning of the Classical period by considering Attica as a space that was socially constructed through a constant dialogue between the landscape and the communities that inhabited it The aim of the project was to integrate the large amount of archaeological data collected throughout the 20th c into a heuristic and hermeneutic framework that considers the spatial and ecological dimensions of historical cultural political and social phenomena The Lands of Meaning project was originally conceived as a two year pilot project to introduce new digital methods and heuristic social theories of space The project will be further developed at the University Paris 1 Panth on Sorbonne as a long term endeavour to incorporate space into archaeological thinking and to consider the material and territorial conditions of the emergence of the city state in Athens and more broadly in ancient Greece The conference programme can be found below The presentations were not recorded to allow for a lively discussion Most of the speeches given online were then converted into the contributions collected in this volume supplemented by a chapter by Pavlos Karvonis on Roman Attica and a description of the Thorikos Archive by the Belgian team Unfortunately some of the lectures given at the conference could not be included in the volume First of all we would like to thank Emanuele Papi Director of the Italian Archaeological School at Athens who fully supported the project and proposed to host the conference which was to take place in March 2020 at the School s premises in Athens Our heartfelt thanks go to our Greek colleagues from the Hellenic Ministry of Culture and the Ephorates of Antiquities of Attica Eleni Andrikou Stella Chrysoulaki Anastasia Gadoulou and Christina Merkouri who agreed to chair the conference sessions and led fascinating and disciplined discussions We also invited four titans as we amicably called them during the conference to a final round of talks Tonio Ho Ischer Irene Lemos Robin Osborne and Francis de Polignac took up the challenge and drew fascinating conclusions from the presentations as well as some key ideas for the elaboration of ancient history from archaeological evidence As it would have been difficult to render these lively thoughts into formal papers we have decided to preserve them in our oral memory Finally we would like to thank the Italian Archaeological School at Athens for including the publication of the conference in its collections as well as the two anonymous reviewers whose comments have given the authors food for thoughts This book was published with the support of the Marie Skłodowska Curie Action the University Paris 1 Panth on Sorbonne and the research unit Trajectoires UMR 8215 While Nikolaos Arvanitis was involved in the organisation of the conference as part of his MSCA scholarship Alain Duplouy compiled and edited all the contributions on his own We are also indebted to Mariana Silva Porto who thoroughly re read all contributions especially those written by non native speakers and significantly improved the texts As a doctoral student working on the Paris project she deserves full credit for contributing to the edition of the volume
