## **Making Capitalism In China:**

Making Capitalism in China You-tien Hsing, 1998 *Making Capitalism in China The Taiwan Connection* shows that small and medium sized Taiwanese investors are organized in production and marketing networks not vertically integrated conglomerates. When in China they directly negotiate and establish partnerships with entrepreneurial local officials not the central bureaucracy. Also they effectively transfer a capitalist ideology of production to Chinese factory workers. Importantly the investors attribute their business successes in China to the cultural historical and linguistic affinities they share with these local agents. Connections regarding socio cultural identity do more than facilitate business dealings or ease labor relations. Hsing asserts that partnerships between mainland settlements and overseas Chinese investors constitute a local global coalition of economic reform one that strengthens local autonomy in China and bypasses the control of the central government. This coalition is nothing short of a new pattern of foreign direct investment one profoundly influenced by both cultural boundaries usually deemed insignificant in matters of capital flow and globalization and local state agents who operate in this case as crucial business partners. A notable work that will appeal to all students of East Asian economic organization ethnic business networks international investment and the political economy of socialist transition. Hsing's book is based on hundreds of interviews and participatory observations that she conducted between 1991 and 1996 with investors local officials and factory workers in Taiwan Hong Kong Guangdong Fujian and Shanghai.

**Making Capitalism in Rural China** Michael John Webber, 2012-01-01 This stimulating and challenging book explores the duplicitous nature of development in China. On the positive side it brings longer and healthier lives fewer children dead before they are five years old more comfort and security from famine and disaster more education more communication more travel less war. But from another darker perspective development brings violence to some people those who are in the way of the new things those who cannot adapt to the new ways and it threatens old knowledges habits and societies as it disrupts old power structures. Michael Webber presents fascinating case studies that demonstrate what these forms of development mean for people who are relatively weak or powerless those who post colonial theorists call the subalterns. The cases illustrate how development can change the manner in which people relate to each other and threatens their entire environment. Through this detailed consideration of the impacts of development on the people who live in those places he examines whether these changes represent the emergence of capitalism or a transition. He develops a theory of relationships between economy and daily life and questions the very nature of Chinese capitalism. This multidisciplinary study encompasses the social sciences to provide a coherent view of the forms that development takes in various places within rural China. As such it will prove a fascinating and thought provoking read for undergraduates postgraduate students and researchers within economics Asian studies development studies and geography.

*China's Urban Space* Terry McGee, George C.S. Lin, Mark Wang, Andrew Marton, Jiaping Wu, 2007-10-18 China's urban growth is unparalleled in the history of global urbanization and will undoubtedly create huge challenges to China as it modernizes its society Adopting an interdisciplinary approach this book presents an overview of the radical transformation of China's urban space since the 1970s arguing that to study the Chinese urbanization process one must recognize the distinctive political economy of China

After a long period as a planned socialist economy China's rapid entry into the global economy has raised suggestions that modernization in China will inevitably result in urban patterns and features like those of cities in developed market economies. This book argues that this is unlikely in the short term because processes of urban transition in China must be interpreted through the lens of a unique and unprecedented juxtaposition of socialism and the market economy which is leading to distinctive patterns of Chinese urbanization. Richly illustrated with maps, diagrams and in-depth case studies, this book will be an invaluable resource to students and scholars of urban economics and policy, geography and the development of China.

*Internationalizing China* David Zweig, 2018-05-31 China began opening to the outside world in 1978. This process was designed to remain under the state's control. But the relative value of goods and services inside and outside China drove cities, enterprises, local governments and individuals with comparative advantage in international transactions to seek global linkages. These contacts, David Zweig asserts, led to the deregulation of China's mercantilist regime. Through extensive field research, Zweig surveys the extraordinary changes in four sectors of China's domestic political economy: the establishment of development zones, rural joint ventures, the struggle over foreign aid and higher education. He also addresses the crucial question of whether, on balance, internationalization weakens or strengthens state power.

*The Global Rise of China* Alvin Y. So, Yin-Wah Chu, 2015-12-08 This book sets out to unravel and explain the puzzle of the global rise of China: how, in just forty years, China has been quickly transformed from a poor, backward third world country to one of the world's core economic powerhouses. Exactly how did this Chinese developmental miracle happen? Focusing on the key historical turning point in China's post-socialist development, the book examines the complex processes through which China interacted with the global neoliberal project of the late twentieth century. Alvin Y. So and Yin Wah Chu reveal the centrality of the communist party state in propelling China onto the world scene and how it has successfully responded to the developmental challenges of technological upgrading, environmental degradation, inter-state rivalry and maintaining its power. This book provides a comprehensive and insightful study of the rise of China, not solely from an economic, social and political perspective but also from a global and historical perspective. It will be an invaluable guide for students and non-specialists interested in post-socialist development and the global rise of China in the twenty-first century.

*China's Reform in Global Perspective* John Wong, Zhiyue Bo, 2010 This book provides a fascinating perspective of the experiences of China's reform in the past three decades by focusing on China's interaction with and learning from the external world in her unprecedented efforts to reform and open up. After three introductory chapters on broad scope of reform in the political, economic and social realms, this book deals with lessons from the Eastern Bloc, China's reform in East Asian context and China and the developed world. The book concludes with two chapters looking to the future of China's political and economic development. In the existing literature of China's reform experience, this book is unique in perspective, topic selection and in-depth analyses. With contributions from a group of prominent scholars in the field of China studies, such as John Wong, Zheng Yongnian, Thomas P. Bernstein, Dorothy J.

Solinger and Bo Zhiyue it will be of immense value to anyone who is interested in China      Understanding Globalization
