Making Health Happen:

Exploring Opportunities for Collaboration Between Health and Education to Improve Population Health Institute of Medicine, Board on Population Health and Public Health Practice, Roundtable on Population Health Improvement, 2015-08-27 Research based on decades of experience in the developing world has identified educational status especially the status of the mother as a major predictor of health outcomes and that the literature indicates that the gradient in health outcomes by educational attainment has steepened over the last four decades across the United States Since the 1990s while the average life expectancy in the United States has been steadily increasing life expectancy has actually decreased for people without a high school education especially white women To understand the complex relationship between education and health and how this understanding could inform our nation's investments and policies the Institute of Medicine Roundtable on Population Health Improvement held a public workshop in Washington DC on June 5 2014 This workshop which featured presentations and extensive discussion periods also explored how the health and education sectors can work together more effectively to achieve improvements in both health status and educational achievement This report summarizes the presentations and discussion of the workshop

The Nature of Health Michael Fine, James Peters, 2018-04-19 This pioneering work addresses a key issue that confronts all industrialised nations How do we organise healthcare services in accordance with fundamental human rights whilst competing with scientific and technological advances powerful commercial interests and widespread public ignorance The Nature of Health presents a coherent affordable and logical way to build a healthcare system It argues against a health system fixated on the pursuit of longevity and suggests an alternative where the ability of an individual to function in worthwhile relationships is a better more human goal By reviewing the etymology sociology and anthropology of health this controversial guide examines the meaning of health and proves how a community centred healthcare system improves local economy creates social capital and is affordable rational personal and just This is badly needed nourishment for a medical system glutted on technology individualism profit and the pursuit of longevity Read and be fed Christopher Koller Health Insurance Commissioner The State of Rhode Island USA Unique Surprising A real eye opener Just about everyone who doesn't have a vested financial interest in maintaining the status quo will agree that U S healthcare is badly broken This book is making it possible for us to refocus from how to provide healthcare to how to achieve health Their description of health as successful functioning in community rather than as a measure of longevity is a definition that can make a reader feel healthier as they take gradually appreciate the power of the concept On this foundation it is not as hard as one might think to outline a healthcare system that is equitable affordable and achievable Alexander Blount EdD Professor of Family Medicine University of Massachusetts Medical Center
