Making Human Rights Work Globally:

Making Human Rights Work Globally Anthony Woodiwiss, 2012-09-10 This book is one of the first studies in the new field of the sociology of human rights and it centres its analysis on labour rights. Such rights are of critical importance in this field, work being the defining aspect of many peoples' lives and a central concern of sociology. **Making Human Rights a Reality** Emilie M. Hafner-Burton, 2013-03-21 In the last six decades one of the most striking developments in international law is the emergence of a massive body of legal norms and procedures aimed at protecting human rights. In many countries though there is little relationship between international law and the actual protection of human rights on the ground. **Making Human Rights a Reality** takes a fresh look at why it's been so hard for international law to have much impact in parts of the world where human rights are most at risk. Emilie Hafner-Burton argues that more progress is possible if human rights promoters work strategically with the group of states that have dedicated resources to human rights protection. These human rights stewards can focus their resources on places where the tangible benefits to human rights are greatest. Success will require setting priorities as well as engaging local stakeholders such as nongovernmental organizations and national human rights institutions. To date promoters of international human rights law have relied too heavily on setting universal goals and procedures and not enough on assessing what actually works and setting priorities. Hafner-Burton illustrates how with a different strategy human rights stewards can make international law more effective and also safeguard human rights for more of the world population. **Human Rights in Transition** Nehal Bhuta, 2024 Human Rights in Transition combines rich theoretical reflections with practice informed observations about human rights to consider the present, the recent and distant past and the future of human rights. **Making Human Dignity Central to International Human Rights Law** Matthew McManus, 2019-09-15 In recent years there has been an explosion of writing on the topic of human dignity across a plethora of different academic disciplines. Despite this explosion of interest there is one group, critical legal scholars, that has devoted little if any attention to human dignity. This book argues that these scholars should attend to human dignity, a concept rich enough to support a whole range of progressive ambitions particularly in the field of international law. It synthesizes certain liberal arguments about the good of self authorship with the critical legal philosophy of Roberto Unger and the capabilities approach to agency of Amartya Sen to formulate a unique conception of human dignity. The author argues how human dignity flows from an individual's capacity for self authorship as defined by the set of expressive capabilities s/he possesses and the book demonstrates how this conception can enrich our understanding of international human rights law by making the amplification of human dignity its fundamental orientation. ***Interpreting Human Rights*** Rhiannon Morgan, Bryan Turner, 2009-05-07 Written by an international group of leading social science scholars in the field of human rights, this volume situates the study of human rights in an open interdisciplinary terrain. Ranging over diverse topics and pathways in the theory and practice of human rights, this volume will be an invaluable aid to those seeking to understand the complex

meanings institutions and practices of human rights

Why Human Rights Still Matter in Contemporary Global Affairs Mahmood Monshipouri, 2020-04-29 This book elucidates why human rights still matter in contemporary global affairs and what can lead to better protection of international human rights in a post liberal order It blends theoretical empirical and normative perspectives while providing much needed analysis in light of the perils of populism authoritarianism and toxic nationalism as well as highlighting the hopes with which people around the world view human rights in the new millennium Systematically combining theoretical perspectives from across the disciplines with numerous case studies it demonstrates not only the complexities of the domestic conditions involved but also the ways in which human dignity can be preserved and promoted during periods of rapid change and uncertainty Finally the book addresses the question of how to protect human rights in such a world in which the active promotion of democratic values and enforcement of human rights may not be necessarily aligned with evolving economic and geopolitical interests of many great and diverse powers on the global scene As such it is a timely intervention for human rights as a concept as it has been attacked and eroded by the instability in our world today This book will be of key interest to scholars and students of human rights in politics law philosophy sociology and

International Encyclopedia of Economic Sociology Jens Beckert, Milan Zafirovski, 2005-10-27 The International Encyclopedia of Economic Sociology is the first encyclopedia in the field and a timely response to the surge of interest in economic sociology over the last 30 years Economic Sociology deals with the multiple and complex relations between economy and society In particular it focuses on the impact of social political and cultural **Reconstructing Human Rights** Joe Hoover, 2016-05-27 We live in a human rights world The language of human rights claims and numerous human rights institutions shape almost all aspects of our political lives yet we struggle to know how to judge this development Scholars give us good reason to be both supportive and sceptical of the universal claims that human rights enable alternatively suggesting that they are pillars of cross cultural understanding of justice or the ideological justification of a violent and exclusionary global order All too often however our evaluations of our human rights world are not based on sustained consideration of their complex ambiguous and often contradictory consequences Reconstructing Human Rights argues that human rights are only as good as the ends they help us realise We must attend to what ethical principles actually do in the world to know their value So for human rights we need to consider how the identity of humanity and the concept of rights shape our thinking structure our political activity and contribute to social change Reconstructing Human Rights defends human rights as a tool that should enable us to challenge political authority and established constellations of political membership by making new claims possible Human rights mobilise the identity of humanity to make demands upon the terms of legitimate authority and challenges established political memberships In this work it is argued that this tool should be guided by a democratising ethos in pursuit of that enables claims for more democratic forms of politics and more inclusive political communities While this work directly engages with debates about human rights in philosophy and political theory in connecting our evaluations of the value of human rights to their worldly consequences it will also be of interest to scholars considering human rights across disciplines including Law Sociology and Anthropology
