Making Institutions Work:

Making Global Institutions Work Kate Brennan, 2014-09-19 This book seeks to think differently about what we recognize as global institutions and how they could work better for the people who need them most. By so doing, the contributions show that there is a group of institutions that influence enough people's lives in significant enough ways through what they protect, provide or enable that they should be considered together as global institutions. The United Nations, the World Bank, the internet as well as private military and security companies leave a heavy footprint on the social, political and economic landscape of the planet. We are all aware in different ways of the existence of these global institutions but their importance in achieving change in the twenty-first century is often underestimated. In this book, contributors seek to explain what associations exist between change in global institutions and the reduction of poverty and inequality as well as the achievement of security and justice. The work makes sense of processes of change and identifies the most significant obstacles that exist, offering suggestions for future action that will be of interest to students and scholars of global institutions.

Making International Institutions Work Ranjit Lall, 2023-02-23 International institutions are essential for tackling many of the most urgent challenges facing the world from pandemics to humanitarian crises yet we know little about when they succeed, when they fail and why. This book proposes a new theory of institutional performance and tests it using a diverse array of sources including the most comprehensive dataset on the topic. Challenging popular characterizations of international institutions as runaway bureaucracies, Ranjit Lall argues that the most serious threat to performance comes from the pursuit of narrow political interests by states; paradoxically, the same actors who create and give purpose to institutions. The discreet operational processes through which international bureaucrats cultivate and sustain autonomy vis-à-vis governments, he contends, are critical to making institutions work. The findings enhance our understanding of international cooperation, public goods and organizational behavior while offering practical lessons to policymakers, NGOs, businesses and citizens interested in improving institutional effectiveness.
