Making Of An American Community A Case:

Making Of Asian America Pei-Te Lien, 2010-06-17 Asian Americans are widely believed to be passive and compliant participants in the U S political process if they participate at all In this ground breaking book Pei te Lien maps the actions and strategies of Asian Americans as they negotiate a space in the American political arena Professor Lien looks at political participation by Asian Americans prior to 1965 and then examines at both organizational and mass politics levels how race ethnicity and transnationalism help to construct a complex American electorate She looks not only at rates of participation among Asian Americans as compared with blacks Latinos American Indians and non Hispanic whites but also among specific groups of Asian Americans Chinese Japanese Filipinos Koreans Asian Indians and Vietnamese She also discusses how gender socioeconomic class and place of birth affect political participation With documentation ranging from historical narrative to opinion survey data Professor Lien creates a picture of a diverse group of politically active people who are intent on carving out a place for themselves in American political life

The American Political Nation, 1838-1893 Joel Silbey, 1994-07-01 This is a detailed analysis and description of a unique era in American political history one in which political parties were the dominant dynamic force at work structuring and directing the political world

God's Interpreters: The Making of an American Mission and an African Church Les Switzer, 2023-10-20 This study of the pioneer mission to the Zulu people differs from others in South African mission studies by offering a more nuanced understanding of the relationship between mission and church during the formative stages in the making of an African Christian community both in America and in British Natal Critical scholars continue to view the Western mission enterprise as an adjunct if not a tool of colonialism or at best a clash of cultures between white mission powerbrokers and powerless black Christian acolytes The author argues that they were partners from the beginning and in this endeavor the Christian identities of the missionaries as well as the Zulu were changed forever

Frontiers of Historical Imagination Kerwin Lee Klein, 2023-11-15 The American frontier a potent symbol since Europeans first stepped ashore on North America serves as the touchstone for Kerwin Klein s analysis of the narrating of history Klein explores the traditions through which historians philosophers anthropologists and literary critics have understood the story of America s origin and the way those understandings have shaped and been shaped by changing conceptions of history The American West was once the frontier space where migrating Europe collided with Native America where the historical civilizations of the Old World met the nonhistorical wilds of the New It was not only the cultural combat zone where American democracy was forged but also the ragged edge of History itself where historical and nonhistorical defied and defined each other Klein maintains that the idea of a collision between people with and without history still dominates public memory But the collision he believes resounds even more powerfully in the historical imagination which creates conflicts between narration and knowledge and carries them into the language used to describe the American frontier In Klein s words We remain obscurely entangled in philosophies of history we no longer profess and

the very idea of America balances on history's shifting frontiers The American frontier a potent symbol since Europeans first stepped ashore on North America serves as the touchstone for Kerwin Klein's analysis of the narrating of history Klein explores the traditions through which historians philosophers anthropologists and others have shaped the American West **The Legacy of Conquest: The Unbroken Past of the American West** Patricia Nelson Limerick, 2011-02-07 Limerick is one of the most engaging historians writing today Richard White The settling of the American West has been perceived throughout the world as a series of quaint violent and romantic adventures But in fact Patricia Nelson Limerick argues the West has a history grounded primarily in economic reality in hardheaded questions of profit loss competition and consolidation Here she interprets the stories and the characters in a new way the trappers traders Indians farmers oilmen cowboys and sheriffs of the Old West meant business in more ways than one and their descendants mean business today **The Politics of Community** Kenneth J. Winkle, 2002-07-25 Winkle explores the influence of migration as they all emerged before the Civil War *Foundations of Community Journalism* Bill Reader, John A. Hatcher, 2012 This is the first and only book to focus on how to understand and conduct research in this ever increasing field **The Growth of the American Thought** Merle Eugene Curti, Hailed as a pioneer achievement upon its original publication and awarded the Pulitzer Prize in history in 1944 The Growth of American Thought has won appreciative reviews and earned the highest regard among historians of the national experience With his elaboration of the complex interrelationships between the growth of American thought and the whole American social milieu Curti creates not only an intellectual history but a social history of American thought **Jews of the American West** Moses Rischin, John Livingston, 1991 In a series of nine original essays the editors and other leading American historians bring dramatically new perspectives to bear on our understanding of the West its Jews and other Americans both old and new Whether comparing the history of the Jews of the West with the Jewish experience in the older regions of the country or bringing attention to the uniquely local aspects of the western experience the contributors to this landmark volume perceive the West as an increasingly important and vital presence in the nation's history The agrarians of Utah's Clarion and the cureseekers of Denver no less than the boomers of Tucson have been representative Americans Jews and westerners Essays on the role of intermarriage the shared encounter of immigrants and migrants and the response to the founding of the State of Israel by western pioneer families tell us much about the interaction of the West with our American world nation

Changing and Unchanging Face of United States Civil Society Marcella Ridlen Ray, Ray has written a book that should be read by anyone interested in the current debates about the general health of civil society in the United States American Journal of Sociology The formation maintenance and well being of American civil society is a topic of intense debate in the social sciences Until now this debate has lacked rigor with the term civil society commonly used interchangeably and imprecisely with other terms such as civic engagement Today's discourse also lacks methodological discipline and relies too heavily on narrowly selected evidence in support of a particular argument In this invaluable

contribution to the debate Marcella Ridlen Ray supplies an empirical study based on a theoretical model of democratic civil society one that posits high levels of communication diversity autonomy mediation and voluntary association In Ray s account the emergent story of U S civil society is that of a dynamic institution not necessarily one that is linear in its progression It is a tale of flux resilience and stability over the long term that is consistent with subtexts on political equilibrium she notes in the work of early political analysts such as Aristotle Machiavelli Locke Burke and later Tocqueville Ray dispels the widely accepted myth that Americans are increasingly apathetic and withdrawn from common interests The evidence reveals a persistence of long standing public spiritedness despite the fact that individuals use wider discretion in deciding if and how to attach to community and despite a historical lack of enthusiasm for performing civic duties in lieu of more pleasurable leisure activity This public spiritedness continues to reflect embedded religious cultural values that disproportionately influence how and when people dedicate time and money to associational life U S civil society has grown more inclusive and democratic as Americans venture at growing rates across differences in perspective ideas beliefs and experience to form diverse networks of interest association and community No longer confined to an immediate or local area the social space of Americans now incorporates national international and cyber spatial dimensions Social connectedness is extensive due to the expansion of social space and the multiplication of weak social ties that transcend geographic and spatial boundaries Ray s theoretical model gives form and coherence to her massive compilation of quantitative and qualitative data She uses this to improve the visibility of civil society an institution essential to democracy itself This volume provides the basis for a systematic evaluation of a major American institution as well as a framework for comparison with other Western democracies Marcella Ridlen Ray is senior fellow School of Public Policy and adjunct professor in Sociology and Anthropology at George Mason University in Fairfax Virginia

The Making of the American Landscape Michael P. Conzen, 2014-06-03 The only compact yet comprehensive survey of environmental and cultural forces that have shaped the visual character and geographical diversity of the settled American landscape The book examines the large scale historical influences that have molded the varied human adaptation of the continent s physical topography to its needs over more than 500 years It presents a synoptic view of myriad historical processes working together or in conflict and illustrates them through their survival in or disappearance from the everyday landscapes of today

Republic of the Dispossessed Rowland Berthoff, 1997 Berthoff history Washington U St Louis argues that modern American society is distinctive from contemporary European thought by virtue of its middle class Over the course of ten essays the author develops the idea of an American middle class who brought with them from Europe a set of social values that has acted as a template for middle class values These ideals of a balance between personal liberty and communal equality have inspired a peculiarly American reaction to the modern changes of industrialization urbanization and immigration causing a reactive apprehension in the middle class that they are like their peasant and artisan ancestors once again being dispossessed Annotation copyrighted by Book News Inc Portland OR
