Sinha,2021-10-10 This book provides a comprehensive overview of the theory and praxis of Big Data Analytics and how these are used to extract cognition related information from social media and literary texts It presents analytics that transcends the borders of discipline specific academic research and focuses on knowledge extraction prediction and decision making in the context of individual social and national development The content is divided into three main sections the first of which discusses various approaches associated with Big Data

Analytics while the second addresses the security and privacy of big data in social media and the last focuses on the literary text as the literary data in Big Data Analytics Sharing valuable insights into the etiology behind human cognition and its reflection in social media and literary texts the book benefits all those interested in analytics that can be applied to literature history philosophy linguistics literary theory media communication studies and computational digital humanities The Making Of Literature. Some Principles of Criticism Examined in the Light of Ancient and Modern Theory R. A.

Scott-James,1948 **The Librarian and Book World** ,1929 *Cognitive Science Foundations of Instruction* Mitchell Rabinowitz,2020-02-13 This volume presents and discusses current research that makes the connection between cognitive theory and instructional application Addressing two general issues the first set of chapters specifies the relation between cognitive theory and the development and evaluation of instruction while the second set deals with the questions involved in understanding and assessing cognitive skills The outstanding feature of these chapters is that they all present in depth discussions of the theoretical issues underlying instructional decisions Many present specific implementations that provide examples of concrete applications of theory In addition the settings for implementing these examples span a broad range of instructional areas and environments illustrating the generality and transferability of the application of theory to practice

*Political Theory, Science Fiction, and Utopian Literature* Tony Burns,2010-02-19 Ursula K Le Guin s *The Dispossessed* is of interest to political theorists partly because of its association with anarchism and partly because it is thought to represent a turning point in the history of utopian dystopian political thought and literature and of science fiction Published in 1974 it marked a revival of utopianism after decades of dystopian writing According to this widely accepted view *The Dispossessed* represents a new kind of literary utopia which Tom Moylan calls a critical utopia The present work challenges this reading of *The Dispossessed* and its place in the histories of utopian dystopian literature and science fiction It explores the difference between traditional literary utopia and novels and suggests that *The Dispossessed* is not a literary utopia but a novel about utopianism in politics Le Guin s concerns have more to do with those of the novelists of the 19th century writing in the tradition of European Realism than they do with the science fiction or utopian literature It also claims that her theory of the novel has an affinity with the ancient Greek tragedy This implies that there is a conservatism in Le Guin s work as a creative writer or as a novelist which fits uneasily with her personal commitment to anarchism *Whitaker's Cumulative Book List* ,1928 **Introduction to English Literature** Henry Reed,1855 **Associative Democracy and the Crises of**

**Representative Democracies** Veit Bader,Marcel Maussen,2023-08-18 The familiar problems of democratic capitalism have given way to a deep crisis challenging the basic forms of governance introduced around the late 18th century and then gradually expanded and developed until the late 20th century *Associative Democracy and the Crises of Representative Democracies* argues that we are in urgent need of normative guidelines and a strong understanding of a broad range of institutional options and innovative experiments in associative democracy in order to address the structural problems that

existing institutional arrangements are confronted with whilst maintaining and strengthening democratic forms of government and governance The argument is developed against the background of a thorough survey of empirical social scientific studies on the crises of capitalisms and representative democracies This book focuses primarily on democratic alternatives though it also works out principles and institutions of democratic socialism as alternatives to capitalism After introducing the theoretical approach the book illustrates the ways this framework of analysis can be of use with particular focus on three issues that are highly topical when it comes to the challenges our institutions are confronted with democratic governance in relation to ecological crises and uncertainty the threats to democracy raised by the crisis of political parties and representative party democracy and the challenges related to privatization and marketization of public services particularly in healthcare The book concludes by exploring opportunities to democratize the economy locating viable alternatives to capitalism in the tradition of democratic socialism This urgent and thought provoking book will be of great interest to academics and students in various disciplines in the humanities and social sciences including political science sociology and economics
